Internationally sponsored development of biological nitrogen fixation technology. Research on biological nitrogen fixation in the international agricultural research centers.

The subsistence agriculture of the pre-chemical era efficiently sustained the

Get Free N2 March Common Paper For 2014

nitrogen status of soils by maintaining a balance between N loss and N gain from biological nitrogen fixation (BNF): the microbial conversion of atmospheric N to a form usable by plants. This was possible with less intensive cropping, adaptation of rational crop rotations

Get Free N2 March Common Paper For 2014

and intercropping schemes, and the use of legumes as green manure. Modern agriculture concentrates on maximum output, however, overlooking input efficiency; It is not sustainable. Intensive monocropping, with no or inadequate crop rotations or green manuring,

Get Free N2 March Common Paper For 2014

together with the excessive use of chemical N fertilizers, results in an imbalance between N gain and N loss. The losses are often larger than the gains, and soil N status declines. The challenge is to sustain soil N fertility in many different tropical and temperate

Get Free N2 March Common Paper For 2014

farming systems operating at high productivity levels. This requires judicious integration of BNF components, maintaining a good balance between N losses and gains. In this book, papers on BNF in crop forage and tree legumes are augmented with discussions

Get Free N2 March Common Paper For 2014

of integrated farming systems involving BNF, soil and N management, and recycling of legume residues. BNF by non-legumes are discussed, and attempts to transform cereals into nodulating plants are critically reviewed. Advances in the development of novel

Get Free N2 March Common Paper For 2014

methodologies to understand symbiotic relations and to assess N₂ fixation in the field are described, and means are presented to enhance BNF through plant and soil management or breeding and selection. Problems encountered in exploiting BNF under field conditions

Get Free N2 March Common Paper For 2014

are examined, as are promising approaches to improving BNF exploitation.

Canberra, Australia, 26 August – 4 September 1979

This book constitutes the thoroughly refereed post-workshop proceedings of the Third International Workshop on Semantics in Data and Knowledge Bases, SDKB 2008, held in Nantes,

Get Free N2 March Common Paper For 2014

France, on March 29, 2008. The 6 revised full papers presented together with 4 invited papers and a survey on the state of the art in the field, were carefully reviewed and selected for inclusion in the book. The SDKB workshop presented original

Get Free N2 March Common Paper For 2014

contributions demonstrating the use of logic, discrete mathematics, combinatorics, domain theory and other mathematical theories of semantics for database and knowledge bases, computational linguistics and semiotics, and information and

Get Free N2 March Common Paper For 2014

knowledge-based systems.

This volume contains a selection of papers presented to the Fourth International Symposium on Environmental Biogeochemistry (ISEB), and a conference on Biogeochemistry in Relation to

Get Free N2 March Common Paper For 2014

Mining Industry and Environmental Pollution (Leaching Conference), held in Canberra, Australia on August 26-31 and September 3-4, 1979, respectively. The ISEB were established to provide "a forum for uninhibited exchange of information

Get Free N2 March Common Paper For 2014

and ideas among the biological, chemical, atmospheric and geolorical scientists working in the common area of biogeochemistry, encompassing soil and other earth sciences as well as the hydrosphere and atmosphere", By linking the fourth ISEB with the

Get Free N2 March Common Paper For 2014

Leachin~ Conference the scope of discussions was extended to encompass the application of biogeochemical processes to the mining industry. This wide-ranging philosophy is reflected in the breadth and diversity of the subjects covered in

Get Free N2 March Common Paper For 2014

this book. The published papers are expanded versions of those presented at the meetings. They have all been scrutinized by at least one referee in addition to the editors. About 20% of the contributions to the meetings are not included, either because authors

Get Free N2 March Common Paper For 2014

did not wish to publish or because the papers were not accepted by the editors.

symposium, held in Lome, Togo, March 25–28, 1985

Food security, one of the basic human rights, seems to be ever eluding the people of sub-Saharan Africa. With each occurrence of crop failure, agriculturalists around

Get Free N2 March Common Paper For 2014

the world reawaken to the challenge of ensuring stable, adequate food production in the tropical African environments. The International Fertilizer Development Center (IFDC), with its mandate of alleviating food shortages through

Get Free N2 March Common Paper For 2014

judicial use of fertilizers, formulated a program to study fertilizer use strategies for sub-Saharan Africa. With generous financial assistance from the International Fund for Agricultural Development (IFAD), IFDC, in collaboration with the

Get Free N2 March Common Paper For 2014

International Crop Research Institute for the Semi-Arid Tropics (ICRISAT) and the International Institute for Tropical Agriculture (IITA), initiated a research project aimed at assessing means to remedy soil nutrient deficiencies

Get Free N2 March Common Paper For 2014

that constrain food production in the humid, subhumid, and semiarid tropics of Africa. The results of this project were summarized during a workshop held in Togo, March 25-28, 1985; the proceedings of that meetings are found in this vol

Get Free N2 March Common Paper For 2014

ume. The project established collaboration with numerous national programs that were responsible for much of the data collection. The data presented in Chapters 6 and 9 include much of this information. We wish to

Indigenous Peoples and Human Rights explores how general human rights standards have enabled, empowered and constrained indigenous peoples in

Get Free N2 March Common Paper For 2014

claiming and defending their essential economic, social, cultural, civil and political interests. The book examines the jurisprudence of United Nations treaty committees and regional human rights bodies (in Africa, the Americas and

Get Free N2 March Common Paper For 2014

Europe) that have interpreted and applied human rights standards to the special circumstances and experiences of indigenous peoples. It focuses particularly on how human rights laws since the 1960s have been drawn upon by

Get Free N2 March Common Paper For 2014

indigenous activists and victims to protect their interests in ancestral lands, natural resources, culture and language. It further explores the right to indigenous self-determination; civil and political rights; economic, social and cultural

Get Free N2 March Common Paper For 2014

rights (including labour rights); family and children's rights; violence and discrimination against indigenous peoples; and access to justice and remedies for violations. The book also discusses international and regional efforts to

Get Free N2 March Common Paper For 2014

define who is 'indigenous' and who is a 'minority', and the legal relationship between indigenous individuals and their communities. The jurisprudence considered in this book significantly shaped the UN Declaration on the Rights of

Get Free N2 March Common Paper For 2014

Indigenous Peoples 2007, which particularises and adapts general human rights standards for indigenous peoples. The book concludes by exploring future normative and implementation challenges in the light of the

Get Free N2 March Common Paper For 2014

standard setting and consolidation, and political momentum, surrounding the UN Declaration and associated UN human rights mechanisms.

This book constitutes revised selected papers of the First

Get Free N2 March Common Paper For 2014

International Conference on Computing Science, Communication and Security, COMS2 2020, held in March 2020. Due to the COVID-19 pandemic the conference was held virtually. The 26 full papers and 1 short paper

Get Free N2 March Common Paper For 2014

were thoroughly reviewed and selected from 79 submissions. Papers are organised according to the topical sections on artificial intelligence and machine learning; network, communication and security; computing science.

Nitrogen fertilizers are the inescapable necessity to enhance agricultural production and to sustain food security. However, their inefficient use accrues from inherent limitations of the crop plants as well

Get Free N2 March Common Paper For 2014

as the manner in which N fertilizers are formulated, applied and managed. Excessive accumulation of N in the environment leads to soil acidification, pollution of groundwater and eutrophication of surface water, posing a public health problem as well

Get Free N2 March Common Paper For 2014

as ecosystem imbalance. Moreover, the ozone layer depletion and greenhouse effects of NOx gases have global implications. Agricultural Nitrogen Use: Environmental Implications provides a comprehensive, interdisciplinary description of

Get Free N2 March Common Paper For 2014

problems related to the efficient use of nitrogen in agriculture, in the overall context of the nitrogen cycle, its environmental and human health implications, as well as various approaches to improve N use efficiency. The book is presented in six

Get Free N2 March Common Paper For 2014

sections: N Use, Flows and Cycling in Agricultural Systems; N Use Efficiency in Crop Ecosystems; Management Options and Strategies for Enhancing N Use Efficiency; Plant Physiological and Molecular Aspects of Enhancing N Use

Get Free N2 March Common Paper For 2014

Efficiency; Role of Legumes and Biofertilizers in Agricultural N Economy; and Environmental and Human Health Implications.

This volume documents the proceedings of the Symposium on Emissions from Continuous

Get Free N2 March Common Paper For 2014

Combustion Systems that was held at the General Motors Research Laboratories, Warren, Michigan on September 27 and 28, 1971. This symposium was the fifteenth in an annual series presented by the Research Laboratories. Each

Get Free N2 March Common Paper For 2014

symposium has covered a different technical discipline. To be selected as the theme of a symposium, the subject must be timely and of vital interest to General Motors as well as to the technical community at large. For each symposium, the practice is to

Get Free N2 March Common Paper For 2014

solicit papers at the forefront of research from recognized authorities in the technical discipline of interest. Approximately sixty scientists and engineers from academic, government and industrial circles in this country and abroad are then invited to join

Get Free N2 March Common Paper For 2014

about an equal number of General Motors technical personnel to discuss freely the commissioned papers. The technical portion of the meeting is supplemented by social functions at which ample time is afforded for informal exchanges of ideas amongst

Get Free N2 March Common Paper For 2014

the participants. By such a direct interaction of a small and select group of informed participants, it is hoped to extend the boundaries of research in the selected technical field.
