Provides a comprehensive atlas of the world, including population demographics, physical features, climate, and political borders.

Illustrations and maps introduce the geography, culture, and trivia facts of each continent, and suggests activities to explore geography in depth.

This comprehensive historical atlas concentrates on the Mediterranean world but also shows what happened across the globe between A.D. 400 and 1500--from the fall of Rome to the age of discovery. Sumptuously illustrated, it features period works of art, fascinating maps, quotes from medieval figures, close-ups of intriguing artifacts, and rich landscape photographs. For every century, a signature city is spotlighted to represent that era's developments, and time lines connect the many dramatic events that took place in these dark and exciting times.

Introduction to Geography

Scotland has a distinctive place in the world. Nation to Nation explores how this unique relationship with the rest of the world has developed over the years and how it manifests itself today. In this book Stephen Gethins combines his knowledge from years of work in the field - from the conflict zones of the former Soviet Union to the corridors of power in Westminster and Brussels - with insights from political, cultural and academic figures who have been at the heart

National Geographic Compact Atlas of the World

Introduction to Geography: People, Places, &

Environment, Fifth Edition emphasizes that what happens in places depends increasingly on what happens among places--and that mapped patterns can be understood only by recognizing the movement that creates and continuously rearranges them. The authors emphasize the integration of various aspects of geographic processes and systems by discussing what happens in one set of geographic processes and how that affects others. For example, what happens in economic systems affects environmental conditions; what happens to

climate affects political dynamics. In this text, the major tools, techniques, and methodological approaches of the discipline of geography are introduced.

Maps and text provide information on the geography, industries, and other vital facts of the countries of the world.
