

National Geographic Readers Monkeys

National Geographic Primary Readers is a high-interest series of beginning reading books that have been developed in consultation with education experts. The books pair magnificent National Geographic photographs with lively text by skilled children’s book authors across four reading levels. Level 1: Early readerThese books contain simple sentences and are just right for kids who can decode with ease and are beginning to read fluently. They are ideal for readers of Yellow and Blue banded books. Hang On, Monkey! uses simple vocabulary and fun pictures to capture the interest and help develop the skills of early readers. Told in simple yet lively text, Hang On, Monkey! will enchant kids who are just beginning their reading journey. Developed by National Geographic in consultation with literacy education experts, a series of high-interest, exciting and easy-to-read books contain simple text, National Geographic photography and kid-friendly design, as well as loads of information about subjects that really matter to kids. Simultaneous.

Explains how the behaviors and characteristics of different predatory animals, including wolves, polar bears, army ants, and orcas, are valuable in their pursuit of food.

Pounce! Follow a little kitten through its day to learn all about these young cats. Through text features such as the vocabulary tree and the wrap-up activity, kids will be introduced to vocabulary in concept groups—helping them make connections between words and expand their understanding of the world.

Aligned with the Common Core ’s standards of promoting the independent reading and comprehension of informative texts, this book uses a question/answer format for maximum simplicity and appeal. The differences between monkeys and apes, unique traits and behaviors of a variety of species, and mini-activities have been carefully combined to create a winning—and educational—mix that will delight young readers.

Cutest Animals Collection

A True Story

Monkeys

Monkey with a Tool Belt

All About books for kids are designed around the research and findings of child psychologists and teachers including Dr. Susan Rich Sheridan. This series is targeted toward early readers between ages 3 to 7. This series engages young minds with short, simple sentences and facts paired with vivid full-page images that will help to retain your child’s attention as you guide their reading. This is an educational series; they are not storybooks. “All About Monkeys” introduces your child to this amazing animal with facts such as “Young monkeys are usually considered to be adults once they are around 4-5 years old.” and “Monkeys have good vision, but most monkeys can only see in black and white.” and many more. The colorful, vivid and engaging photos will capture your child attention and imagination. This collection is specifically for guided reading; these books are short and factual, helping to ensure that the information can be retained with time and practice. Unlike many Early Learning Children’s books such as “Pete the cat” or “The Bad Seed”, All About books for kids does not introduce a story line. Instead, the series is focused on short, interesting facts that your child will remember and be able to use in conversation. Take a look inside of the book before you buy it using Amazon’s “Looks inside” feature (the link is right above the book’s cover image). If you purchase the 8.5”x8.5” paperback collection, we encourage you to allow your children to draw, write and scribble their thoughts in the ample space provided on each page; hand-marking is key for successful learning for children.

They’re SSSSLITHERY! SLIPPERY! They creep us out! But get to know them and you’ll find snakes private, quiet types who just want a cool, shady place to call home. From the tip of their forked tongues, to skin that sheds, to the rattles on certain tails, these creatures have secrets all kids will love. Cool photos and fun facts slip us inside their surprising world.

This comical, adorable, and fascinating reader documents the lives of monkeys living in the wild and includes details regarding their behavior, families, and environment. The carefully constructed text guarantees a successful and rewarding reading experience for level 2 readers who are able to read alone, with minor assistance. The photography and extras featured in this title ensure a fun and interactive experience for the reader. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! Inspiration for the Netflix series Chico Bon Bon! Whether you need a beebersaw or a chisel, Chico Bon Bon’s your monkey. He can build or fix just about anything—from a dock for the ducks to a clock for the Clucks, even a small roller coaster for local chipmunks. But will his tools and his sharp wit save him when an organ grinder sets his sights on making Chico a circus star? Chris Monroe’s quirky hero and detailed illustrations will absorb readers in an entertaining adventure that shows there is an inventive way out of every problem—if you have the right tools.

NAMED A NEW YORK TIMES NOTABLE BOOK OF 2017#1 New York Times and #1 Wall Street Journal bestseller! A five-hundred-year-old legend. An ancient curse. A stunning medical mystery. And a pioneering journey into the unknown heart of the world’s densest jungle. Since the days of conquistador Hernán Cortés, rumors have circulated about a lost city of immense wealth hidden somewhere in the Honduran interior, called the White City or the Lost City of the Monkey God. Indigenous tribes speak of ancestors who fled there to escape the Spanish invaders, and they warn that anyone who enters this sacred city will fall ill and die. In 1940, swashbuckling journalist Theodore Morde returned from the rainforest with hundreds of artifacts and an electrifying story of having found the Lost City of the Monkey God-but then committed suicide without revealing its location. Three quarters of a century later, bestselling author Doug Preston joined a team of scientists on a groundbreaking new quest. In 2012 he climbed aboard a rickety, single-engine plane carrying the machine that would change everything: lidar, a highly advanced, classified technology that could map the terrain under the densest rainforest canopy. In an unexplored valley ringed by steep mountains, that flight revealed the unmistakable image of a sprawling metropolis, tantalizing evidence of not just an undiscovered city but an enigmatic, lost civilization. Venturing into this raw, treacherous, but breathtakingly beautiful wilderness to confirm the discovery, Preston and the team battled torrential rains, quickmud, disease-carrying insects, jaguars, and deadly snakes. But it wasn’t until they returned that tragedy struck: Preston and others found they had contracted in the ruins a horrifying, sometimes lethal-and incurable-disease. Suspenseful and shocking, filled with colorful history, hair-raising adventure, and dramatic twists of fortune, THE LOST CITY OF THE MONKEY GOD is the absolutely true, eyewitness account of one of the great discoveries of the twenty-first century.
