

National Geographic Readers Snakes

A high-interest science-inquiry book in an exciting and easy-to-read format on the ever popular subject of snakes

Introduces some of the most dangerous animals on Earth, describing the physical characteristics and behavior that makes them deadly, including such creatures as saltwater crocodiles, poison dart frogs, box jellyfish, and scorpions.

Presents general information about different types of reptiles, looking at what they are, how they are classified, the characteristics of different species, their origins, and fun facts about them.--

They're SSSSLITHERY! SLIPPERY! They creep us out! But get to know them and you'll find snakes private, quiet types who just want a cool, shady place to call home. From the tip of their forked tongues, to skin that sheds, to the rattles on certain tails, these creatures have secrets all kids will love. Cool photos and fun facts slip us inside their surprising world. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

Join National Geographic expert and TV personality

Brady Barr on some wild adventures with snakes! Readers won't believe their eyes as they read Barr's hilarious—and completely true!—accounts of his interactions with some of the biggest, weirdest, and craziest snakes on Earth. Filled with engaging photos, fast facts, and fascinating sidebars, readers won't want to put this book down.

Discusses the real-life adventures of a zoologist who studies crocodiles by dressing up in a special crocodile suit, and discusses the behaviors and habitats of the large aquatic reptiles.

There are about 3,000 kinds of snakes. Here is information about the different functions of these cold-blooded animals' physical characteristics. One also learns how they live, how they give birth (most lay eggs, some give birth to live babies), and how they eat (they swallow their prey whole, sometimes while it is still alive).

Knowing about snakes, from the most ordinary garden variety to the most exotic constrictors and poisonous

snakes, is to admire and respect these extraordinary reptiles.

Sharks!

Spiders

National Geographic Readers: Deadly Predators

National Geographic Readers: Cheetahs

Examines creatures that live in the sea, including the blobfish, jellyfish, and moray eels.

Snakes do not just live on land! Sea snakes thrive in the warm, salty waters of the coral reef. They can breathe through their skin and expel salt through special glands! Readers will be introduced these adaptations and more in this low-level title about sea snakes. Special features support the text with extra information about range, conservation status, life span, and diet.

Who could resist celebrating sea turtles? They may seem like lazy ocean reptiles drifting with the oceans' currents, but they are actually long-distance swimmers that spend their entire lives searching for food and a mate. What's more, they come with their own built-in GPS, returning to the exact beach where they were born to lay their own eggs. Kids will learn all about these tranquil and mysterious animals through brilliant photography and illustrations, plus the trusted and distinctive content you love from NG Kids!

Presents an introduction to bats, discussing their physical characteristics, habitat, feeding habits, and predators.
