The Industrial College of the Armed Forces was established to prepare selected officers of the Armed Forces, both Regular and Reserve, and civilian executives for important managerial positions in time of emergency. Instruction is provided in three forms: (1) resident, (2) correspondence, and (3) traveling lecture teams. The base for all three types of instruction is the same.

Experience attests to the great value of the correspondence course. The subject matter is presented in small volumes for convenience, each volume representing a major division of the subject. They are reorganized and revised from time to time to bring them up to date and to place emphasis as change may dictate upon those phases of the course deemed most important. Considerable background and illustrative materials are included as a basis for broad and comprehensive education in the field of world resources and their use in support of national objectives.

The texts consist of materials written by members of the faculty of the Industrial College, of selected lectures delivered at the College, and of selections from various publications. The texts in use were prepared mainly by the Correspondence Text Committee of the Education Division of the College. Current revisions of these texts are prepared by the Branches of the Education Division and coordinated by the Committee, which consists of Dr. Benjamin H. Williams, Chairman, Dr. Harold J. Clem, Dr. Louis C. Hunter, Dr. Andrew J. Kress, and Dr. Samuel H. McGuire. Suggestions and recommendations are based on the instructional policy of the Correspondence Study Branch as well as on student reactions to text materials.

The Industrial College owes a debt of gratitude to a number of lecturers, writers, and publishers who have permitted the use of their materials in this series of texts. Specific acknowledgments are made in each volume for these contributions.

Going Greek offers an unprecedented look at the relationship between American Jewish students and fraternity life during its heyday in the first half of the twentieth century. More than secret social clubs, fraternities and sororities profoundly shaped the lives of members long after they left college—often dictating choices in marriage as well as business alliances. Widely viewed as a key to success, membership in these self-governing, sectarian organizations was desirable but not easily accessible, especially to non-Protestants and nonwhites. In Going Greek Marianne Sanua examines the founding of Jewish fraternities in light of such topics as antisemitism, the unique challenges faced by Jewish students on campuses across the United States, responses to World War II, and questions pertaining to assimilation and/or identity reinforcement. The book covers a vast array of information, from the many famous people who belonged to Jewish fraternities to the songs they sang. Snobbery within the fraternities—what behavior constituted the "proper image" for an American Jew—comes up for discussion, but so does the increasing awareness of Jewish students toward issues of social justice. For several generations of leaders in the national Jewish community, fraternities were central to their lives. Going Greek thus provides historians and biographers with a window onto an important aspect of American Jewish cultural experience.

This is a thoroughly revised edition of the Historical Atlas of Colorado, which was coauthored by Tom Noel and published in 1994. Chock-full of the best and latest information on Colorado, this new edition features thirty new chapters, updated text, more than 100 color maps and 100 color photos, and a best-of listing of Colorado authors and books, as well as a guide to hundreds of tourist attractions. Colorado received its name (Spanish for "red") after much debate and many possibilities, including Idaho (an "Indian" name meaning "gem of the mountains" later discovered to be a fabrication) and Yampa (Ute for "bear"). Noel includes other little-known but significant facts about the state, from its status as first state in the Union to elect women to its legislature, to its controversial "highest state" designation, elevated by the 2013 legalization of recreational cannabis. Noel and cartographer Carol Zuber-Mallison map and describe Colorado's spectacular geography and its fascinating past. The book's eight parts survey natural Colorado, from rivers and mountains to dinosaurs and mammals; history, from prehistoric peoples to twenty-first-century Color-oddities; mining and manufacturing, from the gold rush to alternative energy sources; agriculture, including wineries and brewpubs; transportation, from stagecoach

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

"An introductory American government textbook should do more than simply tell students that politics is relevant today, that it will affect their lives in meaningful ways. Students are best prepared to recognize this basic fact when they understand the bigger picture of how the system works, how it got that way, and what are the possibilities for change. Cal Jillson's American Government: Political Development and Institutional Change shows students how the nation's past is present in all aspects of contemporary politics, using the dynamics of change as a tool to understand how politics works and how institutions, systems, avenues of participation, and policies have evolved over time to produce today's political environment in the United States. Going one step further, Jillson identifies the critical question of how American democracy might evolve further, focusing in every chapter on reform and change into the future".
