The book manages to combine humor, adventure, tragedy, triumph, heroism, and even some forays into the risqué ... while chronicling the careers of 20 enduring personalities that helped make diving what it is today. Some of those interviewed are retired now, one (author Peter Benchley of *Jaws* fame) recently passed away, and many are still making history through their ongoing work. It's quite a group. Consider that the lineup includes actress and Sea Hunt star Zale Parry who also set the depth record for women divers back in 1954. Stan Waterman provides both the book's Foreword and a revealing insider look at his seven decades in diving. Living legend Bev Morgan pioneered the first dive training programs along with revolutionizing

commercial diving equipment. His image in full hardhat dress also graces the book's cover. Morgan's candor and humor set the pace for the lively montage of dialogues to follow with Australian couple Ron and Valerie Taylor who rose to fame in the iconic shark documentary film *Blue Water, White Death*. They are joined by others from diving's first generation including filmmaker Al Giddings (*The Deep*, *Abyss*, *Titanic*, etc.), retail pioneer and cameraman Chuck Nicklin (*The Diving Locker*), manufacturers Dick Bonin (*Scubapro*) and Bob Hollis (*Oceanic*), photography masters Ernie Brooks and Paul Humann, as well as deep ocean explorer Dr. Bob Ballard who discovered the wrecks of the *Titanic*, *Bismarck*, and *PT-109*. Diving's second generation of innovators includes cave explorer Wes Skiles, filmmaker Mike deGruy, wreck explorer John Chatterton (of *Shadow Divers* fame), IMAX film producer

Greg MacGillivray, and the dynamic husband/wife team of Howard and Michele Hall who seem to dominate the realm of documentary underwater films now (Island of the Sharks, Coral Reef Adventure, Deep Sea 3D). Last but not least, Stan Waterman talked Gilliam into sitting for an interview about his own amazing career and, typically, he shares a wicked sense of humor along with some biting perspective about what it was like to champion new technologies and daring approaches to diving business when the sport's ultra-conservatives wanted to suppress nitrox, liveboards, technical diving, diving computers, training methods, and honest journalism. Each chapter is a slice of human interest that lets the reader briefly pull back the curtain on the personal lives of diving's heroes and feel like they are part of the conversation. The full color book is lavishly illustrated with great photographs that capture each interviewee throughout

their diving careers. It's a very personal journey and the reader will feel like they pulled up a chair and shared a cup of coffee around a table with each person. Gilliam enlisted help from other leading writers for some interviews he couldn't conduct himself and Fred Garth, Lina Hitchcock, Eric Hanauer, Douglas Seifert and Michel Gilbert & Danielle Alary all make significant contributions to round out the book. It's a massive volume, 8x11 inches in size, 496 pages, hard bound, and weighing in at a whopping eight pounds per copy.

It is unusual that a scuba diving liveaboard should be known for anything other than the quality of the diving service it offers. The MV *Salutay* is that rare exception. Not only does she offer a top and innovative diving service and access to some of the best diving around the United Kingdom and Northern France, she also has divers returning every year because of the wonders that her galley

produces. Chef Freda Wright has been getting requests for recipes for many years and generations of divers have begged her to produce a cookbook, so that they can continue to enjoy her mouth-watering meals and snacks when they go home. This is the cookbook that they wanted: a selection of soups, main courses, desserts and snacks that divers aboard the MV Salutay have been enjoying for decades and that now you can cook at home for family and friends. As well as the easy-to-follow recipes, this book also includes diving tales from the three decades that Freda and her husband, captain and technical diving pioneer Al Wright, have been exploring British, Irish and French waters. From the story of how Al discovered three major shipwrecks off Malin Head, Ireland at the dawn of the technical diving revolution to diving with seals in St. Kilda and descriptions of exploring the D-Day wrecks in the Baie de Seine, these anecdotes

Divin medicine explain by experts in clear and simple terms and in a very intersting and entertaining manner.

SCUBA is a fun, relaxing, educational, interesting, and -- if approached properly -- safe activity, it is nonetheless a sport that has risks. SCUBA diving is in fact an extreme sport that can injure or even kill very quickly, and in some very nasty ways. What we are doing is entering an alien environment that is normally hostile to human life. We cannot breathe in water without some kind of

mechanical assistance. These are facts and the details should be covered in every Open Water (OW) class. All too often in today's society, however, people do not want to take the time to properly prepare and get the education to safely take on new tasks. Some agencies appear to have responded to this by developing training programs that turn out high numbers of certified divers in shorter time frames, necessitating the reduction of time spent on what I consider to be some necessary basic skills. While this has resulted in great numbers of new divers entering the water, it has

not resulted in many of those divers staying in the water. New divers are often given just enough training to enable them to dive in the most benign conditions under close supervision. Even then, there are still those who find out their initial training was just not adequate. It is at this point that they either make the decision to get more training or they leave the sport. The latter happens all too often. The former, when it does happen, does not always occur for the right reasons. Students should return to training to expand their diving and learn new skills; they

should not have to return for new training just to be able to enjoy the sport safely. To require students to come back for basic information is something I find very troubling, and in some cases, has actually cost divers their lives. A lack of rescue instruction has resulted in a number of diver deaths when buddies did not know how to drop weights, support a diver at the surface, or even stay in contact with their buddy. This is another area frequently talked about, but all too often not actually put into practice. The concept of always diving with a buddy and just what

that means in the "real world" is often given too little attention.

Unfortunately, it is impossible to foresee every conceivable situation that can arise, but there are many basic issues that can be covered. The following chapters will hopefully address much of what is being overlooked or delayed in many programs as they exist today. It is my hope that this information also finds its way into the hands of those who have not yet begun the training process. I have included a chapter on how to select an instructor based on the quality of instruction and the content
