This volume documents the 20th Münster Lectures in Philosophy with Robert Audi. In the last decades, Audi's work has deeply influenced different important philosophical discussions, ranging from epistemology, theory of action, and philosophy of

**rationality to ethics,
philosophy of religion,
and political
philosophy. The
critical examinations
collected in this book
reflect the breadth of
Audi's contributions
in discussing topics as
diverse as
epistemological
foundationalism and
the theory of
testimony, ethical**

**intuitionism, the
problem of evil and
religion's public place
within a liberal
democracy. Besides his
replies to each critical
engagement, the
volume contains an
extensive essay on the
problems of perception
and cognition written
by Audi himself. This
volume will be of
enormous use to all**

scholars interested in the younger history of American philosophy and one of its leading figures. It will also appeal to philosophers and curious readers with an interest in the endeavor of designing a comprehensive theory of rationality and human reasoning. MOST (Media Oriented Systems

Transport) is a multimedia network technology developed to enable an efficient transport of streaming, packet and control data in an automobile. It is the communication backbone of an infotainment system in a car. MOST can also be used in other product areas such as

cybersecurity. An
important focus of the
book is centered on
doing business in the
Digital Age-

are covered today.

Each part has its own
flavor and
personality,
reflective of its goals
and purpose. Part 1 is
a bit more futuristic,
Part 2 a bit more
experiential, and Part
3 a bit more practical.
How we work together,
