This project attempts to tackle several challenges: - to experience the variety of different teaching cultures as a source of innovation and an obstacle; - to adopt a pluridisciplinary approach by introducing references taken from the social sciences in order to develop reflective role of languages in social cohesion; - to try and provide answers to a question hitherto rarely raised in the didactics of languages and namely the place of cultural mediation itself. **The focus of Paradigms in Word Formation: Theory and applications is on the relevance of paradigms for linguistic description. Paradigmatic organization has traditionally been considered an inherent feature of inflectional morphology, but research in the last decades clearly shows the existence of paradigms in word formation, especially in affixal derivation, often at the expense of other word-formation processes. This volume seeks to address the role that paradigms may play in the description of compounding, conversion and participles. This volume should be of interest to anyone specialized in the field of English morphology and word formation.**
