The future is big right now—for perhaps the first time, our society is more focused on what is going to happen in the future than what is happening right now. In *Trees on Mars: Our Obsession with the Future*, cultural critic and indie entrepreneur Hal Niedzviecki asks how and when we started believing we could and should “create the future.” What is it like to live in a society utterly focused on what is going to happen next? Through visits to colleges, corporations, tech conferences, factories and more, Niedzviecki traces the story of how owning the future has become irresistible to us. In deep conversation with both the beneficiaries and victims of our relentless obsession with the future, Niedzviecki asks crucial questions: Where are we actually heading? How will we get there? And whom may we be leaving behind?

Introduces the world of Roshar through the experiences of a war-weary royal compelled by visions, a highborn youth condemned to military slavery, and a woman who is desperate to save her impoverished house.

Our love affair with the digital interface is out of control. We've embraced it in the boardroom,

the bedroom, and the bathroom. Screens have taken over our lives. Most people spend over eight hours a day staring at a screen, and some "technological innovators" are hoping to grab even more of your eyeball time. You have screens in your pocket, in your car, on your appliances, and maybe even on your face. Average smartphone users check their phones 150 times a day, responding to the addictive buzz of Facebook or emails or Twitter. Are you sick? There's an app for that! Need to pray? There's an app for that! Dead? Well, there's an app for that, too! And most apps are intentionally addictive distractions that end up taking our attention away from things like family, friends, sleep, and oncoming traffic. There's a better way. In this book, innovator Golden Krishna challenges our world of nagging, screen-based bondage, and shows how we can build a technologically advanced world without digital interfaces. In his insightful, raw, and often hilarious criticism, Golden reveals fascinating ways to think beyond screens using three principles that lead to more meaningful innovation. Whether you're working in technology, or just wary of a gadget-filled future, you'll be enlightened and entertained while discovering that the best interface is no interface.

Explains how to use the portable device to make and receive phone calls, set up iTunes, take photographs, use Siri, send and receive e-mail, browse the Internet, and play podcasts, music, video, and photograph slideshows.

*Steve Jobs weathered the deepest betrayals, endured relentless public humiliations and was pushed to the brink of bankruptcy. When he returned to the company he had co-founded, he was welcomed home by an Apple that was just as battered and bruised as he was, and on the brink of the abyss. How these two entities, Steve the man, and Apple the company, healed each other, is well worth learning. Ninety days from bankruptcy, Apple welcomed home its founder in 1996. In less than a decade, Steve accomplished the impossible - Apple was now a trillion dollar juggernaut. Their domain included Music, Books, SmartPhones, Tablets, Laptops and more. *LEGOified: Building Blocks as Media provides a multi-faceted exploration of LEGO fandom, addressing a blindspot in current accounts of LEGO and an emerging area of interest to media scholars: namely, the role of hobbyist enthusiasts and content producers in LEGO's emergence as a ubiquitous transmedia franchise. This book examines a range of LEGO hobbyism and their attendant forms of mediated self-expression and identity (their "technicities"): artists, aspiring Master Builders, collectors, and entrepreneurs who refashion LEGO bricks into new commodities (sets, tchotchkes, and minifigures). The practices and perspectives that constitute this diverse scene lie at the intersection of multiple transformations in contemporary culture, including the shifting relationships between culture industries and the audiences that form their most ardent consumer base, but also the emerging forms of entrepreneurialism, professionalization, and globalization that characterize the burgeoning DIY movement. What makes this a compelling project for media scholars is its multi-dimensional articulation of how LEGO functions not just as a toy, cultural icon, or as transmedia franchise, but as a media platform. LEGOified is centered around their shared experiences, qualitative observations, and semi-structured interviews at a number of LEGO hobbyist conventions. Working outwards from these conventions, each chapter engages additional modes of inquiry—media archaeology, aesthetics, posthumanist philosophy, feminist media studies, and science and technology studies—to explore the origins, permutations and implications of different aspects of the contemporary LEGO fandom scene.*
