It is revolutionizing industries the world over, and changing how we fundamentally view and understand work. Superhuman Innovation argues that AI will supercharge the workforce and the world of work, can be harnessed to deliver powerful change to how companies innovate and gain competitive advantage. It is a practical guide to how AI and Machine Learning are impacting not only how businesses, brands, and agencies innovate, but also what they innovate: products, services and content. In a world of product and pricing parity, the delivery of superior service experience has become the new marketing, and the new real competitive edge. With AI companies can harness the power of data, personalization and on-demand availability, at the touch of an intelligent button. Superhuman Innovation discusses how AI will serve the superstar innovators of tomorrow, by enabling them to see deeper insights and set sail for higher goals. It unearths a powerful five-pronged model which describes how AI enables innovation through the offerings of Speed (facilitating work processes), Understanding (revealing and mastering deep insights), Performance (customization of delivery to customers), Experimentation (the iterative process of reinvention and feedback) and Results (tangible, measurable and optimizable results). "With the ever increasing global economic interaction that often involves the workplace, it is imperative that we deepen our understanding of the dynamics of communication among different cultures. Through clear and precise examples, Dr. Theresa Paris' book succinctly exemplifies the basic broad differences of cultures and the importance of understanding cultural interaction in the workplace, based on work developed by Dr. Geert Hofstede, a pioneer and international leading scientist in the field of International Communication. These basic principles are applicable to most cultures. This book is a must for managers and students, and offers general information to all who wish to expand their knowledge of people to people interaction." Hector Robertin Ph.D."Multiculturalism in the Workplace engages everyone from the expert to the lay reader in principles validated through academic research. Through Barb's story, the reader is invited to explore the high level of misunderstanding among cultures and seek solutions for collaborative team development. Dr. Paris has simplified the understanding of Hofstede's research on cultural measurements in business by connecting them to different cultural traits, such as individualism and collectivism. Even the newest person to the study of multiculturalism will acquire excellent tools for interpreting actions and behaviors within his/her own environment." Sharon Seeberger, B.A.
