To control the migration of radioactive and hazardous wastes currently contained underground, barriers made of natural materials and man-made substances are constructed atop, and possibly around, the contaminated area. Barrier Technologies for Environmental Management provides a brief summary of the key issues that arose during the Workshop on Barriers for Long-Term Isolation. Recurring themes from the session include the importance of quality control during installation, followed by periodic inspection, maintenance, and monitoring, and documentation of installation and performance data. The book includes papers by the workshop presenters.

Arguably one of the most important cars of this century so far, the Nissan LEAF is one of the most talked about cars in the world. It is the world's best selling electric car, a former World Car of the Year winner and one of the most environmentally friendly cars you can buy today. In this all-new guide, best selling technology author and LEAF owner, Michael Boxwell, explains what you need to know about owning and using a LEAF. He reveals why driving electric is not just good for the environment, but provides a terrific driving experience that is good for your wallet as well. Michael Boxwell has been involved in the electric vehicle industry since 2003 and has owned and driven electric cars since 2006. He is currently on his second Nissan LEAF.

When you hear that now ubiquitous phrase 'I find that offensive', you know you're being told to shut up. While the terrible murder of the Charlie Hebdo cartoonists demonstrated that those who offend can face the most brutal form of censorship, it also served only to intensify the pre-existing climate that dictates we all have to walk on eggshells to avoid saying anything offensive - or else. Indeed, competitive offence-claiming is ratcheting up well beyond religious sensibilities. So, while Islamists and feminists may seem to have little in common, they are both united in demanding retribution in the form of bans, penalties and censorship of those who hurt their feelings. But how did we become so thin-skinned? In 'I Find That Offensive!' Claire Fox addresses the possible causes of what is fast becoming known as 'Generation Snowflake' head-on (no 'safe spaces' here) in a call to toughen up, become more robust and make a virtue of the right to be offensive.

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Hybrid drives and the operation of hybrid vehicles are

characteristic of contemporary automotive technology. Together with the electronic driver assistant systems, hybrid technology is of the greatest importance and both cannot be ignored by today's car drivers. This technical reference book provides the reader with a firsthand comprehensive description of significant components of automotive technology. All texts are complemented by numerous detailed illustrations.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

A woman contemplates suicide as her best friend lies dying. A touching graveside ritual keeps love alive. The cracks in a long-time marriage are revealed when the scotch runs out. A young couple experience the ecstasy and agony of first love. A Month of Sundays shines a light on our most vulnerable moments and finds the grace and dignity within. There is beauty in survival, in knowing we can overcome. We suffer unbearable losses, love the wrong people, and make a mess of our lives, but we go on. Some of the most important moments happen when we are raw and exposed. This collection of a dozen stories explores those dark corners that define us, the emotional spaces we prefer to avoid.

Matthew Ferry presents his Rapid Enlightenment Process inside his new book Quiet Mind Epic Life."Enlightenment is not a place. It's not a destination. It's a state. It's a point of view. Enlightenment is a contextual framework that makes living an epic life possible. Let me give you my definition of Enlightenment so you understand our endgame together...Enlightenment is the recognition that the source of life within you... is also the source of life in everyone else... and everything else. We are all one thing expressing itself with infinite variety.When you truly see that the source of life within you is also the source of life in everyone else, and everything else, you enter into an enlightened state. When you see that we are all one thing expressing itself with an infinite variety, and the only thing that makes us different, is our perspective about it.... boom! Everything changes and fear disappears.From this new perspective, you rise above the limitations of cultural conditioning. You don't have to follow the rules anymore. Everything is up for evaluation. You see dogma for what it is, just stories that were made up by well-meaning people. But stories none the less. Not valid. Not true. Not real. Finally,

you feel free. The invisible barriers disappear. This is what I want for you. This is the promise of Quiet Mind Epic Life." - Matthew Ferry

This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagon. Also in these pages, you'll find details on such lesser-known yet no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

The role of stakeholders is integral to corporate sustainability as society increasingly demands that corporations play a role in achieving environmental objectives in addition to building shareholder wealth. In this, the first book to gather cutting-edge

world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical

active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs)
Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. The British public adored Nigel Mansell more than any other driver. When he was at his height, crowds at the British Grand Prix were bigger – and more fervently patriotic – than at any time before or since. Mansell has always been the consummate showman, wringing every ounce of speed from a car, racing wheel-to-wheel with the fiercest rival and exhibiting incredible tenacity. This superbly produced book brings Mansell's career vividly to life through stunning images sourced exclusively from the archives of LAT, the world's biggest library of motor racing photographs.

The 1970s was a great decade for British racing drivers, but it was also the era in which the nation lost a generation of brilliant young drivers – Roger Williamson, Tony Brise and Tom Pryce – in tragic accidents. All had the potential to be World Champions. With access to their families, friends and race colleagues, David Tremayne tells their full stories in this superb book, now available in paperback. It makes for poignant but uplifting reading.
