First settled in 1643, Throggs Neck-Pelham Bay lies along the west bank of Eastchester Bay in the Bronx. It was once an area of grand estates and farms and was home to some of the wealthiest people in America, including Collis P. Huntington and Catherine Lorillard Wolfe. Discover the history of the early residents of the community and its place in an ever-changing America in this unique and unprecedented pictorial collection. Throggs Neck-Pelham Bay offers a unique glimpse into the past, through carefully preserved images and a thoroughly researched text. Readers will delight in the memories of yesteryear and the images of a young and undaunted America. The images in this volume cover all of the communities included in the charter granted to John Throckmorton by the Dutch in 1642. Called Vriedlandt or "Land of Peace" by Dutch authorities, the area eventually fell prey to the burdens of war during the American Revolution. The images in Throggs Neck-Pelham Bay depict all aspects of life, from work to play. View the early modes of transportation used by

the residents, the schools and churches they attended, the homes they lived in, and the activities they enjoyed.

This book presents the papers from the Internal Combustion Engines:

Performance, fuel economy and emissions held in London, UK. This popular

international conference from the Institution of Mechanical Engineers

provides a forum for IC engine experts looking closely at developments for

personal transport applications, though many of the drivers of change apply to

light and heavy duty, on and off highway, transport and other sectors.

These are exciting times to be working in the IC engine field. With the move

towards downsizing, advances in FIE and alternative fuels, new engine

architectures and the introduction of Euro 6 in 2014, there are plenty of

challenges. The aim remains to reduce both CO2 emissions and the dependence

on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

You're no idiot, of course. You host the most fabulous dinner parties and select just the right wines. But when it comes time to play some bridge, you

You'll learn how to deal and play a "rubber" (that's bridge-talk for a game), how to keep score, and even how to deal with less-than perfect partners!

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun and Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate

Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.
