The dual biography of Moses Louis Annenberg and his son, Walter, details their colorful, entrepreneurial lives and careers, from the father's racketeering fortune building and tax-evasion prosecution to the son's current publishing and political ventures

To uphold family honor and tradition, Sheetal Prasad is forced to forsake the man she loves and marry playboy millionaire Rakesh Dhanraj while the citizens of Raigun, India, watch in envy. On her wedding night, however, Sheetal quickly learns that the stranger she married is as cold as the marble floors of the Dhanraj mansion. Forced to smile at family members and cameras and pretend there's nothing wrong with her marriage, Sheetal begins to discover that the family she married into harbors secrets, lies and deceptions powerful enough to tear apart her world. With no one to rely on and no escape, Sheetal must ally with her husband in an attempt to protect her infant son from the tyranny of his family.

This book examines the human auditory effects of exposure to directed beams of high-power microwave pulses, which research results have shown can cause a cascade of health events when aimed at a human subject or the subject's head. The book details multidisciplinary investigations using physical theories and models, physiological events and phenomena, and computer analysis and simulation. Coverage includes brain anatomy and physiology, dosimetry of microwave power deposition, microwave auditory effect, interaction mechanisms, shock/pressure wave induction, Havana syndrome, and application in microwave thermoacoustic tomography (MTT). The book will be welcomed by scientists, academics, health professionals, government officials, and practicing biomedical engineers as an important contribution to the continuing study of the effects of microwave pulse absorption on humans.

Computer-Aided Design of Fluid Mixing Equipment: A Guide and Tool for Practicing Engineers helps practicing design and operations engineers in solving their agitation and mixing problems. The book provides the practicing engineer with the tools necessary to evaluate the performance of existing agitation and mixing equipment, along with tactics on how to design new equipment using computerized rating and design methods. The most appropriate design techniques are also included in computer programs for solving mixing problems for the practicing engineer. Excel solutions are available through the WEB for 40 example problems in the book. WEB based, general purpose CalcEdge design programs are also available; the TK6 source codes are also available. Provides the practicing engineer with the tools necessary to evaluate the performance of existing equipment and to design new equipment using computerized rating and design methods Explains the principles required to understand and use recommended design methods Implements design methods that are readily available and easy-to-use Presents sufficient worked examples--using provided canned programs--to guide the user in analyzing and designing mixing equipment

Large, mature companies often struggle when it comes to the uncertain process of breakthrough innovation. But innovation is an imperative in today's cutthroat business

environment. To fulfill its potential, there has to be a better way—and there is. Beyond the Champion argues that innovation is a talent all its own that requires distinct skills and expertise, just like finance or marketing. Viewing innovation as a discipline in its own right, it is easy to see that breakthrough wins require an organizational design with clearly delineated roles, responsibilities, and career tracks for those who shoulder the responsibility for new products. Drawing on the results of a four-year study and two decades of related research, this book outlines three fundamental competencies necessary for innovation: discovery, incubation, and acceleration. Mapping these skills onto roles and opportunities for advancement, the authors deliver a pioneering blueprint for sustainable innovation.

Somewhere between global and local, the nation still lingers as a concept. National art histories continue to be written – some for the first time – while innovative methods and practices redraw the boundaries of these imagined communities. Narratives Unfolding considers the mobility of ideas, transnationalism, and entangled histories in essays that define new ways to see national art in ever-changing nations. Examining works that were designed to reclaim or rethink issues of territory and dispossession, home and exile, contributors to this volume demonstrate that the writing of national art histories is a vital project for intergenerational exchange of knowledge and its visual formations. Essays showcase revealing moments of modern and contemporary art history in Canada, Egypt, Iceland, India, Ireland, Israel/Palestine, Romania, Scotland, Turkey, and the United Arab Emirates, paying particular attention to the agency of institutions such as archives, art galleries, milestone exhibitions, and artist retreats. Old and emergent art cities, including Cairo, Dubai, New York, and Vancouver, are also examined in light of avant-gardism, cosmopolitanism, and migration. Narratives Unfolding is both a survey of current art historical approaches and their connection to the source: art-making and art experience happening somewhere.

Marvin's Monster Diary 4: Neighborhood Bully

Dated 28 January 2020. Formerly GG 000 December 2020

This book gives a systematic account of the structure and representation theory of finite-dimensional complex Lie superalgebras of classical type and serves as a good introduction to representation theory of Lie superalgebras. Several folklore results are rigorously proved (and occasionally corrected in detail), sometimes with new proofs. Three important dualities are presented in the book, with the unifying theme of determining irreducible characters of Lie superalgebras. In order of increasing sophistication, they are Schur duality, Howe duality, and super duality. The combinatorics of symmetric functions is developed as needed in connections to Harish-Chandra homomorphism as well as irreducible characters for Lie superalgebras. Schur-Sergeev duality for the queer Lie superalgebra is presented from scratch with complete detail. Howe duality for Lie superalgebras is presented in book form for the first time. Super duality is a new approach developed in the past few years toward understanding the Bernstein-Gelfand-Gelfand category of modules for classical Lie superalgebras. Super duality relates the representation theory of classical Lie superalgebras directly to the representation theory of classical Lie algebras and thus gives a solution to the irreducible character problem of Lie superalgebras via the Kazhdan-Lusztig polynomials of classical Lie algebras.

Torn apart by grief, can two sisters rediscover joy in the memory of their mother's love? Romy Moore has always cherished the warm embrace of her family home in the foothills of the Dublin

Mountains--a welcome escape from life on the lower rungs of the London career ladder. It is her mother Cathy's encouragement that has kept Romy chasing her dreams, so when she loses her, Romy feels more adrift than ever. Ambitious and unflappable Joanna has always been the sister with her act together, but the birth of her twin daughters and the loss of her mother changes everything. Torn between giving her children the same start in life that she had and missing her high-powered tech career in Silicon Valley, she can't help wondering: was she right to swap ambition for family? As the first reunion looms, Romy notices that the home that once rang with laughter now feels empty, her father a passing shadow and her brother brooding and silent. But when she discovers their mother has left behind some important words of wisdom as a helping hand for them to carry on without her, a glimmer of hope sparks to life. Can Cathy's loving reminder of beautiful little family memories guide her children through the festive season--and on into a future without her?

Warning: This erotica contains scenes and elements that may be disturbing to some readers. Please review the full content warning below. Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The "freak," Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? This book contains intense fantasy scenes of hard kinks/edgeplay, graphic sex, and harsh language. It is intended only for an adult audience. Beware: this is a dark, weird, kinky read. The activities depicted therein are dangerous and are not meant to be an example of realistic BDSM. Reader discretion is advised. Kinks/Fetishes within: erotic humiliation, fearplay, painplay, knifeplay, consensual non-consent (CNC), orgasm denial, boot worship, spanking, crying, blowjobs, clowns, group sexual activities, spit, bondage, public play, bloodplay.
