This book offers an original collection of international studies on indigenous entrepreneurship. Through these specific lenses, entrepreneurship greatly appears as a set of cultural values-based behaviours. Once more culture and human values are placed at the heart of entrepreneurship as an economic and social phenomenon.' - Alain Fayolle, EM Lyon and CERAG Laboratory, France and Solvay Business School, Belgium. `A must-have for researchers of developmental

Communities Dominate Brands: Business and marketing challenges for the 21st century is a book about how the new phenomenon of digitally connected communities are emerging as a force to counterbalance the power of the big brands and advertising. The book explores the problems faced by branding, marketing and advertising facing multiple

radical changes in this decade. Communities Dominate Brands discusses how disruptive effects of digitalisation and connectedness introduce threats and opportunities. The authors compellingly illustrate how modern consumers are forming communities and peer-groups to pool their power resulting in a dramatic revolution of how businesses interact with their customers. The book provides practical guidance of how to move from obsolete interruptive advertising to interactive engagement marketing and community based communications, with

dozens of real business examples from around the world. Communities Dominate Brands addresses its topic from a marketing (including advertising and branding) perspective and maintains a rigorous focus on business and profit dimensions of the issues involved. The book discusses such recent phenomena as blogging, virtual environments, mobile phone based swarming and massively multiplayer games. The book introduces a new generation of consumers called Generation-C (for Community). The book also discusses such new concepts as the Connected Age, Reachability, the Four C's,

Alpha Users, and introduces Communities as an unavoidable new element into the traditional communication model. Combining the digital trends, modern management theories, and emerging new customer behaviour, Communities Dominate Brands arrives to its conclusion, that traditional marketing methods are increasingly ineffective and even becoming counterproductive. The power of the brands and the abuses by marketing have created a vacuum for a counterbalance, and digitally connected communities, the blogosphere, gamers, and

especially the always-on connectedness of those on mobile phone networks, are emerging as the counterforce to redress the balance. The power of smart mobs and digitally enlightened communities will react rapidly to marketing excesses as the natural force balancing the power of the brands. The way a business can and must interact with the powerful new communities is through engagement marketing, by enticing the communities to interact with the brands. Communities Dominate Brands covers the major changes taking place in business and industry worldwide from

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive,

they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There is detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

Information and communication technologies of the 20th century have had a significant impact on our daily lives. They have brought new opportunities as well as new challenges for human development. The Philosopher: Luciano Floridi claims that these new technologies have led to a revolutionary shift in our understanding of humanity's nature and its role in the universe. Floridi's philosophical analysis of new technologies leads to a novel metaphysical framework in which our understanding of the ultimate nature of reality shifts from a materialist one to an informational one. In this world, all entities, be they natural or artificial, are

is to describe what the philosophy of information is, its problems, approaches, and methods. Its introductory goal is to help the reader to gain a better grasp of the complex and multifarious nature of the various concepts and phenomena related to information. Its analytic goal is to answer several key theoretical questions of great philosophical interest, arising from the investigation of semantic information.
