East Africa is rapidly becoming one of the most popular areas in the world among the increasing numbers of travellers who are prepared to venture outside their own continent. To those of us fortunate enough to live here, the reasons for the popularity are quite apparent. Much of the region enjoys an equable climate all the year round with no extremes of either heat or cold and with plenty of sunshine. Scenically the area is one of the most beautiful on earth with a marvellous variety of landscape. The beaches are vast and clean and unspoilt. But the outstanding attractions of East Africa, for most people, are its fascinating

peoples and the unparalleled abundance of its wild life. This guide is the first of three planned to cover the whole region of East Africa. It deals with Kenya and Northern Tanzania. The other guides will deal with Uganda and the rest of Tanzania. Many books have been written about East Africa. They come into four main categories; the magnificent picture books, the geography books, the stories about animals and the detailed technical books on such special aspects as game conservation, bird life, prehistory, or butterflies. None of these is suitable as a practical guide for either the local resident or the average intelligent visitor, who is interested in everything but is not an enthusiastic specialist in any particular subject.

The Best Place for Garbage is the best place to learn about composting with earthworms. Worms can easily turn your organic waste into very valuable fertilizer that you can use to make anything green grow better and stronger. Use it in your garden, on your lawn, on your houseplants, even to make the green in your wallet grow faster by selling worm compost. Whether you are new to this wonderful process or you want to expand your expertise, this comprehensive tutorial has it all. Everything is covered: from indoor and outdoor worm homes, how to feed your worms, what to feed your worms, how to harvest the castings and, most importantly, both how and why to use them. What sets this book apart is not the telling of what to do (though that part is pretty darn good!), but you will also learn why you are doing what you are doing. This makes it easy for you to figure out things on your own once you get going. There are great trouble-shooting tips and tricks to make sure you never fall victim to a smelly worm bin or worse: dead worms. There are actually many myths surrounding what worms can and cannot eat and where and how they can or cannot live. Find out the real truth in The Best Place for Garbage as you learn how these myths came to be and why they really are just urban legends (Yes, worms can eat meat. And citrus. And bananas. No, you do not need to drill holes in your bin. Really!) Told with a very heavy dose of humor and an even bigger helping of common sense, this book is perfect for anyone who gardens, anyone who recycles, anyone who eats. It is currently estimated that over a third of all waste is made up of organic matter that can be recycled. Recycling plastics and such is awesome, but in this case, you can personally make a difference and get something valuable in return. Try that with a water bottle. Also includes a bonus section of ideas for school and college level science projects. Incisive historical and cultural essays illuminate lost Mayan civilizations and their modern descendants while lively reviews point out the best places to eat, drink, and stay in northern Mexico and the Yucatan Peninsula, Guatemala, Belize, Honduras, and El Salvador. 57 maps. of color photos.
