Mass shootings have become the “new normal” in American life. The same can be said for the public debate that follows a shooting: blame is cast, political postures are assumed, but no meaningful policy changes are enacted. In After Gun Violence, Craig Rood argues that this cycle is the result of a communication problem. Without advocating for specific policies, Rood examines how Americans talk about gun violence and suggests how we might discuss the issues more productively and move beyond our current, tragic impasse. Exploring the ways advocacy groups, community leaders, politicians, and everyday citizens talk about gun violence, Rood reveals how the gun debate is about far more than just guns. He details the role of public memory in shaping the discourse, showing how memories of the victims of gun violence, the Second Amendment, and race relations influence how gun policy is discussed. In doing so, Rood argues that forgetting and misremembering this history leads interest groups and public officials to entrenched positions and political failure and drives the public further apart. Timely and innovative, After Gun Violence advances our understanding of public discourse in an age of gridlock by illustrating how public deliberation and public memory shape and misshape one another. It is a search to understand why public discourse fails and how we can do better.

A former firearms executive pulls back the curtain on America's multibillion-dollar gun industry, exposing how it fostered extremism and racism, radicalizing the nation and bringing cultural division to a boiling point. As an avid hunter, outdoorsman, and conservationist—all things that the firearms industry was built on—Ryan Busse chased a childhood dream and built a successful career selling millions of firearms for one of America’s most popular gun companies. But blinded by the promise of massive profits, the gun industry abandoned its self-imposed decency in favor of hardline conservatism and McCarthyesque internal policing, sowing irreparable division in our politics and society. That drove Busse to do something few other gun executives have done: he's ending his 30-year career in the industry to show us how and why we got here. Gunfight is an insider’s call-out of a wild, secretive, and critically important industry. It shows us how America's gun industry shifted from prioritizing safety and ethics to one that is addicted to fear, conspiracy, intolerance, and secrecy. It recounts Busse's personal transformation and shows how authoritarianism spreads in the guise of freedom, how voicing one's conscience becomes an act of treason in a culture that demands sameness and loyalty. Gunfight offers a valuable perspective as the nation struggles to choose between armed violence or healing.

Having firearms for self-defense, sport, and hunting is your individual constitutional right. But exercising that right carries extraordinary responsibilities. Along with your responsibility to know and follow safety procedures, you have an obligation to comply with all applicable state, federal, and local laws. [This book] explores and explains the California laws that affect firearm owners. There are over 800 California state statutes regulating the manufacture, distribution, sale, possession, and use of firearms. There are thousands of overlapping federal laws regulating firearms. And there are hundreds of administrative regulations, local ordinances, and California Department of Justice Bureau of Firearms' written and unwritten policies that also apply to California gun owners. With all the overlapping regulations, it's no wonder that confusion runs rampant among California gun owners, as well as among police, prosecutors, and judges.

The growing concern over the number of accidental firearm shootings, especially those involving children, prompted passage of the initial handgun safety law which went into effect in 1994. The stated intent of the California Legislature in enacting the current FSC law is for persons who obtain firearms to have a basic familiarity with those firearms, including, but not limited to, the safe handling and storage of those firearms. The statutory authority for this program is contained in Penal Code sections 26840 and 31610 through 31700. These statutes mandate DOJ to develop, implement and maintain the FSC Program. Pursuant to Penal Code section 26840, a firearms dealer cannot deliver a firearm unless the person receiving the firearm presents a valid FSC, which is obtained by passing a written test on firearm safety. Prior to taking delivery of a firearm from a licensed firearms dealer, the purchaser/recipient must also successfully perform a safe handling demonstration with that firearm..
