1500 Science Test Questions w/ Keys, Answers, Statistical Analysis For Science Teachers – Upper Elementary to College – Dr. Hooker researched and developed a book of 1500 Science Test Questions – together with the Bloom's Taxonomy, Discrimination Index, the Key, etc. The book was funded

through the National Science Foundation for teachers of Upper Middle School through College Science Programs. 1500 Science Test Questions is an excellent tool for teachers to develop their own tests - and for students to study for High School and College proficiency exams.

The pendulum is a universal topic in primary and secondary schools, but its full potential for learning about physics, the nature of science, and the relationships between science, mathematics, technology, society and culture is seldom realised. Contributions to this 32-chapter anthology deal with the science, history, methodology and pedagogy of pendulum motion. There is ample material for the richer and more cross-disciplinary treatment of the pendulum from elementary school to high school, and through to advanced university classes. Scientists will value the studies on the physics of the pendulum; historians will appreciate the detailed treatment of Galileo, Huygens, Newton and Foucault's pendulum investigations; psychologists and educators will learn from the papers on Piaget; teachers will welcome the many contributions to pendulum pedagogy. All readers will come away with a new awareness of the importance of the pendulum in the foundation and development of modern science; and for its centrality in so many facets of society and culture.

Radionuclides produced by past nuclear weapon test explosions comprise the largest source of anthropogenic radioactivity released into the earth's atmosphere to date. This volume presents data and models about the fate of the released radionuclides and their possible effects on human health. It is divided into the following three parts: - Source Term Studies; - Dose Reconstruction; - Ecological and Health Effects, and comprises both Western and formerly secret Soviet research studies, illuminates past and current research.

Broken down into four volumes—Regulation, Auditing and Attestation, Financial Accounting and Reporting, and Business Environment and Concepts—these top CPA Exam review study guides worldwide provide: More than 2,700 practice questions Complete information on the new simulation questions A unique modular structure that divides content into self-contained study modules AICPA content requirements and three times as many examples as other study guides

Assessment has long been recognized as a key feature in learning efficacy, especially through formative evaluation. Item banking, the storage and classification of test items, is an essential part of systematic assessment. This volume is based on a NATO Advanced Research Workshop held as part of the Special Programme on Advanced Educational Technology. The workshop brought together scholars from around the world to discuss and critically analyze the issues and problems associated with Subjective Probability Measurement (SPM) or the more generic research area called self-assessment. Recent advances in computer technology (expert systems, interactive video disks, and hypermedia) along with the developing sophistication of self-assessment scoring systems based on SPM made this conference particularly important and timely. The book is divided into three main parts: - The input: item banking and hypermedia - The process: subjective probabilities - The output: teaching and learning feedbacks. In summary, although SPM is a difficult theoretical concept for most educators to comprehend, the sophisticated nature of modern computer systems coupled with comprehensive formative and summative evaluation and self-assessment systems make SPM transparent to the user.

Everything today's CPA candidates need to pass the CPA Exam Published annually, this Auditing and Attestation volume of the comprehensive four-volume paperback reviews all current AICPA content requirements in auditing and attestation. Many of the questions are taken directly from previous CPA exams. Vol. 2: Published for the first time in English alphabetical order, vol. 2 (of the 5 original volumes) of "Canon of Medicine" (Law of Natural Healing), is an essential addition to the history of medicine as it holds a treasure of information on natural pharmaceuticals used for over 1000 years to heal various diseases and disorders. Fully color illustrated with a 150 page, 7000 word index of the healing properties of each of the entries, the text itself is an alphabetical listing of the natural pharmaceuticals of the simple compounds. By simple compounds, Avicenna includes the individual plants, herbs, animals and minerals that have healing properties. Avicenna lists 800 tested natural pharmaceuticals including plant, animal and mineral substances. The compiler has included the Latin, Persian and Arabic names of the drugs along with artistic renderings of the drugs as illustrations as well as Avicenna's Tables or Grid for each entry that describes the individual, specific qualities of simple drugs.

The Auditing and Attestation Volume of the Wiley CPA Examination Study Guides arms readers with detailed outlines and study guidelines, plus skill-building problems and solutions, that help the CPA candidates identify, focus on, and master the specific topics that need the most work. Many of the practice questions are taken from previous exams, and care was taken to ensure that they cover all the information candidates need to master in order to pass the new computerized Uniform CPA Examination.
