Nursing Council Of Kenya Past Papers

Giving Through Teaching presents compelling stories of nurse educators and their students who have given their time, talents, skills, and resources to make the world a better place. Sharing stories from more than 70 nurse educators, this unique book inspires nurses to continue the work of their peers and to tell their own stories. Highlighting the efforts of U.S. nurse educators both at home and abroad-from areas devastated by Hurricane Katrina to Iraq-the text showcases the diversity of the nursing profession itself. This collection of stories also examines how the knowledge and expertise of nurse educators can help to improve health care standards and achieve the United Nations (UN) Millennium Development Goals (MDGs), such as improving maternal health and combating HIV/AIDS, malaria, and other diseases. A must-have book for current and future generations of nurse educators, Giving Through Teaching: Explores global- and U.S.-based education partnerships, with stories of nurses working to improve schools, hospitals, and communities around the world Helps readers build interpersonal relationships with others Includes stories from nurse educators who have been honored by their peers, including Legends of the American Academy of Nursing and recipients of the International Council of Nurses International Achievement Award Will contribute funds raised from book sales to scholarships for future nursing students through the NLN Foundation (NLNF)
Health systems in low- and middle-income countries: an economic and policy perspective outlines the key aspects and issues concerning health systems of low- and middle-income countries, recognising the current global context within which these systems operate and the dynamics of this context. It brings together a set of renowned authors to tackle the issues that face population health and health care in the twenty-first century. The focus is predominantly low- and middle-income countries, with a distinct meeting of economic and policy perspectives, and grounding analysis of key issues within the broader international context. The book therefore provides a unique and comprehensive analysis of health systems, with a very different and unique 'flavour' in the field. It should have wide appeal to those engaged in health and health care, including health professionals, researchers and students, as well as those outside traditional health professions but with increasing interest within health issues, such as trade policy makers, researchers and students.
Information and Communication Technologies for Women's Socioeconomic Empowerment
Making Change and Claiming the Future
African Perspectives on Ethics for Healthcare Professionals

This handbook presents a thorough examination of the intricate interplay of race, ethnicity, and culture in mental health – historical origins, subsequent transformations, and the discourses generated from past and present mental health and wellness practices. The text demonstrates how socio-cultural identities including race, gender, class, sexual orientation, disability, religion, and age intersect with clinical work in a range of settings. Case vignettes and recommendations for best practice help ground each in a clinical focus, guiding practitioners and educators to actively increase their understanding of non-Western and indigenous healing techniques, as well as their awareness of contemporary mental health theories as a product of Western culture with a particular historical and cultural perspective. The international contributors also discuss ways in which global mental health practices transcend racial, cultural, ethnic, linguistic, and political boundaries. The Routledge International Handbook of

Race, Culture and Mental Health is an essential resource for students, researchers, and professionals alike as it addresses the complexity of mental health issues from a critical, global perspective.

This book focuses on ethical issues faced by a variety of healthcare practitioners across the Anglophone African continent. This important resource contains in-depth discussions of the most salient current ethical issues by experts in various healthcare fields. Each profession is described from both an African and a South African perspective, and thus contributes to dialogue and critical thinking around African ethics and decision-making. In this way the book provides readers with an understanding of the ethical issues at hand in various professions, including the practical implications of the ethical issues and how to address those effectively. This is a beneficial resource for all those involved in the various healthcare professions addressed in this book, including undergraduate students, lecturers, researchers and practitioners across the continent. Simply put, with the dynamic changes and challenges in healthcare across the globe and in Africa, this is an indispensable resource for healthcare practitioners.

Health Systems in Low- and Middle-Income Countries

The Routledge International Handbook of Race, Culture and Mental Health

Perspectives from Developing Countries

Most accounts of health and healthcare in Africa are written by foreigners. African Health Leaders: Making Change and Claiming the Future redresses the balance. Written by Africans, who have themselves led improvements in their own countries, the book discusses the creativity, innovation and leadership that has been involved tackling everything from HIV/AIDs, to maternal, and child mortality and neglected tropical diseases. It celebrates their achievements and shows how, over three generations, African health leaders are creating a distinctively African vision of health and health systems. The book reveals how African Health Leaders are claiming the future - in Africa, but also by sharing their insights and knowledge globally and contributing fully to improving health throughout the world. It illustrates how African leadership can enable foreign agencies and individuals working in Africa to avoid all those misunderstandings and misinterpretations of culture and context which lead to wasted efforts and frustrated hopes. African Health Leaders challenges Africans to do more for themselves; build on success; tackle weak governance, corrupt systems and low expectations and claim the future. It sets out what Africa needs from the rest of the world in the spirit of global solidarity - not primarily in aid, but through investment, collaboration, partnership and co-development. It concludes with a vision for improvement based on three foundations: an understanding that 'health is made at home'; the determination to offer access to health services for everyone; and an insistence on the pursuit of quality.

?Joan?s very impressive book makes accessible the leadership practices that have a life-changing power that I have experienced in others and myself. They are a gift. I love this

book; it makes a valuable contribution.? ?John Humphrey, Founding Chairman of The Forum Corporation, the global business learning and development firm In the words of participants in Dr. Bragar?s leadership programs ? ?By using the leadership development program, I was able to put my leadership into practice. I learned how to inspire my staff to commit to results.? ?Dr. Ihsanullah Shahir, General Director of Human Resources, Ministry of Public Health, Afghanistan ?Joan helps leaders to refine their vision and align others around its implementation. In other words, she helps leaders to help themselves.? ?G. Sandy Diehl, III, former Senior Vice President, Global Strategy and Development, Otis Elevator Company ?I learned to be the change I want to see, and to make a difference. The use of the challenge model was very practical and enabled me and my colleagues to focus and achieve results.? ?Elizabeth Oywer, Registrar, Nursing Council of Kenya, Executive Representative of the International Council of Nurses, Africa ?I credit Joan for making me a better leader.? ?Jeff Freedman, CEO, Small Army Advertising Agency, Boston, Founder of Be Bold, Be Bald Cancer Treatment Fundraiser

mHealth Multidisciplinary Verticals

Private Health Sector Assessment in Kenya

An Economic and Policy Perspective

Mental, neurological, and substance use (MNS) disorders have a substantial impact on global health and well-being. Disorders such as depression, alcohol abuse, and schizophrenia constitute about 13 percent of the total burden of disease. Worldwide, MNS disorders are the leading cause of disability, and the 10th leading cause of death. Despite this high burden, there is a significant shortage of resources available to prevent, diagnose, and treat MNS disorders. Approximately four out of five people with serious MNS disorders living in low- and middle-income countries do not receive needed health services. This treatment gap is particularly high in Sub-Saharan Africa (SSA). Challenges to MNS care in SSA countries include a lack of trained mental health professionals, few mental health facilities, and low prioritization for MNS disorders in budget allocations. African countries, on average, have one psychiatrist for every 2 million people, whereas European countries have one psychiatrist per 12,000 people. Expanding on previous efforts to address the development and improvement of sustainable mental health systems in SSA, the Institute of Medicine convened this 2015 workshop series, bringing together key stakeholders to examine country-specific opportunities to improve the health care infrastructure in order to better prevent, diagnose, and treat MNS disorders. Providing Sustainable Mental and Neurological Health Care in Ghana and Kenya summarizes the presentations and discussions from these workshops.

An in-depth overview of the emerging concept; Mobile Health (mHealth), mHealth Multidisciplinary Verticals links applications and technologies to key market and vendor players. It also highlights interdependencies and synergies between various stakeholders which drive the research forces behind mHealth. The book explores the trends and directions where this vertical market is headed. Divided into nine sections, the book covers a number of multidisciplinary verticals within the field of mHealth such as: Preventive and curative medicine Consumer and patient-centric approaches Psychological, behavioral, and mental verticals Social perspectives Education, adoption, and acceptance Aged care and the aging population Regional, geographical, and public-health perspectives Technology implications Cloud applications The book collates emerging and diverse mHealth applications into a single resource. The result of extensive research, the book is a collaborative effort between experts from more than 20 countries, who have been carefully reviewed and selected by the team of

reviewers. It takes a multidisciplinary approach to health informatics and provides a roadmap to current and future directions of mHealth.

How Nurse Educators Are Changing the World

Providing Sustainable Mental and Neurological Health Care in Ghana and Kenya

African Health Leaders

This paper broadly examines the health sector in Kenya, by synthesizing an assessment of the health sector with an analysis of the market. After considering the legal and regulatory framework, the policy enforcement, the human resource capacity, and the financing of health systems, the paper makes recommendations for policy makers.

This book advances new understandings of how technologies have been harnessed to improve the health of populations; whether the technologies really empower those who use information by providing them with a choice of information; how they shape health policy discourses; how the health information relates to traditional belief systems and local philosophies; the implications for health communicators; how certain forms of silence are produced when media articulates and problematizes only a few health issues and sidelines others; and much more. The book brings together current research and discussions on the three areas of policy, practices and theoretical perspectives related to health communication approaches in developing countries, presenting well-researched and documented essays that will prove helpful for academic and scholarly inquiry in this area.

Kenya Gazette

Workshop Summary

Health Communication in the Changing Media Landscape

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

This paper reviews how women in the developing world access and use information and communication technology (ICT). It examines the discourse and controversies surrounding the digital gender divide, including links to poverty and illiteracy. Major themes concerning women and ICTs are explored, such as women in the ICT workforce, how girls and women relate differently to ICT, and opportunities and barriers for women in science and technology in

general. Current research relating to gender and ICT is often country-specific and is more prevalent in developed countries than in developing countries. This paper suggests where additional research is needed on barriers to women s entry and access to ICT. The overall objective of this paper is to influence policy dialogue around women and ICT for development by raising awareness of the digital gender divide. Economic opportunity for women in ICT will not be realized until policies address gender considerations and ensure that ICT investment contributes to more sustainable and equitable development.
