Becoming a Nurse

One Awesome Nurse

A Mother's Inspiring Crusade to Make Medical Care Safe

A Guide to Teaching and Learning Methods

Evidence-Based Faculty Development Through the Scholarship of Teaching and Learning (SoTL)

Nursing care professionals are an essential part of the medical profession, known for their care and the assistance that they offer to patients. However, nurses must also tackle the challenges of the modern workplace, including the utilization of new technologies, gender inequity, negative workplace environments including navigating exclusionary behaviors such as incivility and bullying and relieving stress and burnout. As such, it is crucial for nurses, nurse managers, and other medical professionals to remain up to date with the latest education and training techniques and discussions surrounding the significant challenges that nurses face. The Research Anthology on Nursing Education and Overcoming Challenges in the Workplace is a comprehensive reference book that compiles numerous chapters on the latest training and educational strategies for nurses and discusses challenges facing this branch of the medical field. The anthology presents challenges common within the medical field and techniques used to solve or prevent them as well as nurse perspectives on new medical technologies and their perceived use and performance. Covering topics such as e-training, ethics, patient safety, burnout, incivility, and more, this text provides essential information for nurses, teachers, care professionals, hospital staff, managers, practitioners, medical professionals, nursing home and care facilities, academicians, researchers, and students.

This volume is part of a series of 18 monographs on service learning and the academic disciplines. These essays focus on nursing, examining partnerships between education and practice, nurse and person, and profession and community. Chapters describe both theoretical and experiential ways in which nursing has begun to incorporate service-learning as a methodology in many diverse settings and with many communities of interest. Following the Introduction by Jane S. Norbeck, Charlene Connolly, and Jo Ellen Koerner, three theoretical essays include: "Humanistic Learning in the Context of Service: The Liberal Arts in Nursing Education" (Jean E. Bartels); "Preparing Nurses for Roles That Will Improve Community Health: Two National Programs Enhance Relationships between Providers and Educators" (Mary Kay Kohles, Maryalice Jordan-Marsh, and Margaret T. McNally); and "Service Education Partnerships Create Community Service-Learning Opportunities in a Rural Region" (Sharon P. Aadaalen, Mary Kay Hohenstein, Mary I. Huntley, and Annette J. McBeth). Seven essays on classroom applications follow, including: "Service-Learning as a Pedagogy in Nursing" (Elaine Cohen, Susan Johnson, Lois Nelson, and Connie Peterson); "Case Study of a Service-Learning Project in a Nurse-Managed Clinic for Homeless and Indigent Individuals" (Carol L. Macnee, Deborah H. White, and Jean C. Hemphill); "A Case Study in Service-Learning Using a Collaborative Community-Based Caring Model" (Evelyn C. Atchison and Patricia A. Tumminia); "Community Empowerment through Service-Learning" (Leanne C. Busby, Cathy Taylor, and Linda Norman); "Nursing Clinical Education in an Urban Public School System" (Donna Miles Curry, Kimberley X. Hickok, and Kate Cauley); "The Community as Classroom: Service-Learning in Tillery, North Carolina" (Mina P. Shah and Mary A. Glascoff); and "Service-Learning Lessons from the Chambered Nautilus" (Evelyn D. Quigley, Betty Sayers, and Ruth Hanson). Sets of samples syllabi and assignments are provided for four of the essays. A 65-item annotated bibliography, organized by topic, and a list of practitioners is appended. (All papers contain references.) (SM)

This book focuses on essential findings concerning emerging practices of student learning through the teaching and learning benefits of the electronic portfolio (ePortfolio) in a range of disciplines at Australian universities. It explores the latest research on ePortfolios, teaching quality, future research directions for tertiary learning and teaching, institutional agendas in higher education, and the role that the ePortfolios can play in supporting improvements in pedagogic practice and student outcomes. Included in these agendas is research into the development of higher education through the technologising of pedagogy, learner identities in discrete disciplines, and the praxis of individual university teachers. The book covers accounts of academic learning success and challenges across current higher education subject areas. By presenting case study accounts of ePortfolio use, it reveals the importance of defining and documenting how we can meaningfully develop learner portfolios in research, teaching and learning at Australian universities. With an intentional research base, the book draws on work conducted inside and outside Australia

and highlights how the ePortfolio can help tertiary staff prepare for the impact of a student-created portfolio on teaching, learning, and subsequent academic scholarship.

Use your course's big ideas to accelerate students' growth as writers and critical thinkers The newly revised third edition of Engaging Ideas delivers a step-by-step guide for designing writing assignments and critical thinking activities that engage students with important subject-matter questions. This new edition of the celebrated book (now written by the co-author team of Bean and Melrey) uses leading and current research and theory to help you link active learning pedagogy to your courses' subject matter. You'll learn how to: Design formal and informal writing assignments that guide students toward thinking like experts in your discipline Use time-saving strategies for coaching the writing process and handling the paper load including alternatives to traditional grading such as portfolio assessment and contract grading Help students use self-assessment and peer response to improve their work Develop better ways than the traditional research paper to teach undergraduate reading and research Integrate social media, multimodal genres, and digital technology into the classroom to promote active learning This book demonstrates how writing can easily be integrated with other critical thinking activities such as inquiry discussions, simulation games, classroom debates, and interactive lectures. The reward of this book is watching students come to class better prepared, more vested in the questions your course investigates, more apt to study purposefully, and more likely to submit high-quality work. Perfect for higher education faculty and curriculum designers across all disciplines, Engaging Ideas will also earn a place in the libraries of graduate students in higher education.

Nursing education is facing a massive set of obstacles as the fields of medicine continues to progress at warp speed at the same time hospitals do not have enough doctors and depend more on nurses than anytime before. The result is overworked nurses running to keep it with the fields in which they must work. This book presents some analyses of nursing education at a critical juncture in the field.

Reflective Practice in Nursing Learning Matters

The "wrenching but inspiring" true story of a tragic medical mistake that turned a grieving mother into a national advocate (The Wall Street Journal). Sorrel King was a young mother of four when her eighteen-month-old daughter was badly burned by a faulty water heater in the family's new home. Taken to the world-renowned Johns Hopkins Hospital, Josie made a remarkable recovery. But as she was preparing to leave, the hospital's system of communication broke down and Josie was given a fatal shot of methadone, sending her into cardiac arrest. Within forty-eight hours, the King family went from planning a homecoming to planning a funeral. Dizzy with grief, falling into deep depression, and close to ending her marriage, Sorrel slowly pulled herself and her life back together. Accepting Hopkins' settlement, she and her husband established the Josie King Foundation. They began to implement basic programs in hospitals emphasizing communication between patients, family, and medical staff—programs like Family-Activated Rapid Response Teams, which are now in place in hospitals around the country. Today Sorrel and the work of the foundation have had a tremendous impact on health-care providers, making medical care safer for all of us, and earning Sorrel a well-deserved reputation as one of the leading voices in patient safety. "I cried . . . I cheered" at this account of one woman's unlikely path from full-time mom to nationally renowned patient advocate (Ann Hood). "Part indictment, part celebration, part catharsis" Josie's Story is the startling, moving, and inspirational chronicle of how a mother—and her unforgettable daughter—are transforming the face of American medicine (Richmond Times-Dispatch).

Essay from the year 2013 in the subject Pedagogy - Higher Education, grade: Pass, University of the West of England, Bristol, course: Facilitating Learning and Assessment in Practice, language: English, abstract: This essay aims to examine a teaching session delivered by myself to a student nurse during clinical practice, exploring the lesson plan for this session and various factors, which may have impacted on the learning processes involved. The clinical skill/competency which is being explored is the procedure for preparing and administering an intramuscular injection.

How can formative assessment be used as a means to support teacher professional learning? This book presents several studies, from different countries, on approaches to formative assessment of teachers, both before they start working, and during their careers. These approaches draw on insights from studies into effective teacher professional development. Together, the chapters in this book provide an overview of the various ways in which formative assessment may be used to support teacher professional learning, and shed light on choices that can be made in designing such assessments. The studies illustrate how teachers may perceive formative assessment methods, how their learning processes might unfold during formative assessment processes, and which struggles they may have to deal with during the process. The book furthermore addresses questions concerning the impact of formative assessments on teacher learning. As such, this volume provides theoretical as well as practical prospects, as well as challenging ideas for how formative assessment may move further towards being an effective means for supporting teacher learning. This book was originally published as a special issue of Teachers and Teaching: Theory and Practice.

The healing text for nursing education is the transformative teaching of caring science. Creating a Caring Science Curriculum: A Relational Emancipatory Pedagogy for Nursing reflects the paramount scholarship of Caring Science educators. This second edition intertwines visionary thinking with blueprints, exemplars, and dynamic direction for the application of fundamental principles. It goes beyond the conventional by offering a model that serves as an emancipatory, ethical-philosophical, educational, and pedagogical learning guide for both teachers and students. Divided into five units, the text addresses the history of the caring curriculum revolution and its powerful presence within nursing. Unit I lays the foundation for a Caring Science curriculum. Unit II introduces intellectual and strategic blueprints for caring-based education, including action-oriented approaches for faculty-student relations, teaching/learning skills, pedagogical practices, critical-reflective-creative approaches to evolving human consciousness, and power relation dynamics. Unit III addresses curriculum structure and design, the evolution of a caring-based college of nursing, caring in advanced practice education, and the development of caring consciousness in nurse leaders. It also features real-world exemplars of Caring Science curricula. Unit IV includes an alternative approach to clinical and course-based evaluation, and the text concludes with an exploration of the future of the Caring Science curriculum as a way of emancipating the human spirit. Each chapter is structured to maximize engagement with reflective exercises and learning activities that encourage the integration of theory and practice into the learning process. New to This Edition: Updated chapters, case studies, and learning activities Six new chapters that provide guidance on how to create a Caring Science curriculum Exemplars from institutions that have developed Caring Science curricula Key Features: Provides a broad application of Caring Science for teachers, students, and nursing leaders Features case studies of teacher/student lived learning experiences within a caring-loving pedagogical environment Encourages the integration of theory and practice into the learning process with learning activities and reflective exercises Distills the expertise of world-renowned Caring Science scholars

A Reflective Guide in Nursing Education for Mentors of Student Nurses

This book is a clear and practical guide to help students develop critical thinking, writing and reflection skills. It explains what critical thinking is and how students should use it throughout their nursing programme. This new edition also provides an innovative new framework that helps students appreciate different levels of critical thinking and reflection to help nursing students appreciate the requirements of degree level study. The book demonstrates the transferable nature of critical thinking and reflection from academic contexts to the real practice of nursing. Key features: Clear and straightforward introduction to critical thinking directly written for nursing students, with chapters relating the subject to specific study and practice contexts Student example and scenarios throughout, including running case studies from four nursing students and further annotated examples of student's work on the website Each chapter is linked to the new NMC Standards and Essential Skills Clusters

Critical reflection, like all practice-based skills, can only be mastered by doing it. This practical user's guide takes the reader through a structured and coherent course in reflective practice, with frequent reflective writing exercises, discussion breaks and suggestions for further reading. With chapters on individual and group supervision, reflective writing, research and education, this book will be of interest to students and practitioners at all levels of nursing, midwifery, health visiting and social work.

Quality and Safety in Nursing First published in 2012, Quality and Safety in Nursing was the first volume of its kind to explore the role of the nursing community in improving quality of care and patient safety. Now in its third edition, this comprehensive resource remains essential reading for all those involved in equipping current and future nurses with the knowledge, skills, and attitudes (KSAs) needed to deliver exceptional care. The new edition begins with an overview of the Quality and Safety Education for Nurses (QSEN) initiative and its origins in the Future of Nursing report published in 2010, before defining each of the six QSEN competencies: patient-centered care, teamwork and collaboration, evidence based practice, quality improvement, safety and informatics. The content incorporates the 2020-2030 Future of Nursing recommendations, as well as the 2021 AACN Essentials for Education competencies. Finally, the text presents both teaching and clinical application strategies for building and implementing a culture of quality and safety across settings. Integrates QSEN into the classroom with practical approaches to redesigning chapters for reimaging classroom and clinical learning, applying reflective practices and transforming education and practice through inter-professional teamwork Provides new case studies and personal accounts highlighting key principles and their application in real-world scenarios Contains new and expanded material on assessment and evaluation, transition to practice, leadership and management, and primary, outpatient, and ambulatory care Offers a new discussion of future research directions and global perspectives on quality and safety Quality and Safety in Nursing, Third Edition is required reading for graduate students in nursing education programs, faculty in nursing schools, nursing and healthcare educators, clinical nurse specialists, clinical administrators, and those working in professional development and quality improvement.

The Third Edition covers the role of nursing in primary health care, the history of public health nursing, the science of population-based care inclusive of epidemiology and social epidemiology, evidence-based practice for population health. In addition, coverage of technology for research, data storage, retrieval, trend identification, as well as technological innovations for educational program delivery to a population and social networking are also featured.

Nursing and Informatics for the 21st Century is the follow-up to the highly successful, award-winning first edition. Published in 2006, the first edition was a critical resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national strategies and health policies around the globe. This updated edition, co-published by AMIA, examines the revolution that has occurred in nursing and explores the role IT is playing in this transformation, with a thoughtful examination of nursing practice, science and research, and education across the globe. With nearly 50 case studies written by nursing's leading innovators and recognized leaders across specific segments of the healthcare industry and the globe, the book presents a "snapshot" of nursing and IT adoption worldwide. The book provides in-depth analysis of nursing developments in the United States and an expanded global focus, including profiles of EHR initiatives in the Middle East and Asia. In addition, new topics in this second edition include nursing faculty development and results of a five-country international survey on nursing clinical education.

How can teachers introduce Islam to students when daily media headlines capricrejudice students' perception of the subject? Should Islam be taught differently in secular universities than in colleges with a clear faith-based mission? What are strategies for discussing Islam and violence without perpetuating stereotypes? The contributors of Teaching Islamic Studies in the Age of ISIS, Islamophobia, and the Internet address these challenges head-on and consider approaches to Islamic studies pedagogy, Islamophobia and violence, and suggestions for how to structure courses. These approaches acknowledge the particular challenges faced when teaching a topic that students might initially fear or distrust. Speaking from their own experience, they include examples of collaborative teaching models, reading and media suggestions, and ideas for group assignments that encourage deeper engagement and broader thinking. The contributors also share personal struggles when confronted with students (including Muslim students) and parents who suspected the courses might have ulterior motives. In an age of stereotypes and misrepresentations of Islam, this book offers a range of means by which teachers can encourage students to thoughtfully engage with the topic of Islam.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, a regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Educational developers play a central role in supporting faculty members and informing their ongoing professional development programming through the scholarship of teaching and learning (SoTL). SoTL presents an opportunity for faculty professional development that is action-oriented, evidence-based, and engaging for faculty members at any stage in their academic career. Evidence-Based Faculty Development Through the Scholarship of Teaching and Learning (SoTL) is a critical scholarly publication that examines SoTL research as a method of professional development for educational developers and higher education faculty members. Highlighting topics such as professional development, research ethics, and faculty engagement, this book is ideal for deans, professors, department chairs, academicians, administrators, educational developers, curriculum designers, researchers, and students.

Starting from the premise that our health status, vulnerability to accidents and disease, and life spans - as individuals and communities - are determined by the organization, delivery, and financing (or lack thereof) of health care, this book explores how educators and community caretakers teach the complex web of inter-connection between the micro level of individual health and well-being and the macro level of larger social structures. Through the lenses of courses in anthropology, ESL, gerontology, management information systems, nursing, nutrition, psychology, public health, and sociology, the contributors offer examples of intergenerational and interdisciplinary practice, and share cutting-edge academic creativity to model how to employ community service learning to promote social change.
