The twelfth-century French poet Chr é tien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator

of medieval verse who is himself a poet provides a translation of Chr é tien ' s major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past. Jakobov written in response to her friends tragic death in 2015 as a victim of rape and murder. The poems discuss the World from the eyes of a woman, the pain and the beauty that lies therein. The old lady on this train is looking at me, staring at me, she's been doing it since New Eltham, I can feel her eyes on the sweat on my neck. I turn ro catch her out, and she flicks her head back to her book, like she's subtle, but she ain't. I wish she'd just punch me, y'know? The punch I can take, but the look . . . all these frightened half-glances they . . . they just . . .

Pynchon's Sound of Music is dedicated to cataloging, exploring, and interpreting the manifold manifestations of music in Thomas Pynchon's work. An original mix of close and distant readings, this monograph employs a variety of disciplines--from literary studies and musicology to philosophy, media theory, and history--to explain Pynchon through

music and music through Pynchon. Encyclopedic and eclectic in its approach, Pynchon's *Sound of Music* discusses the author's use of instruments such as the kazoo, harmonica, and saxophone and embarks on close readings of the most salient and musically tantalizing passages. Zooming out to a bird's eye view, Christian Hänggi puts Pynchon's historical musical references and allusions into perspective to trace the trends and tendencies in the development of the author's interest in music. A treasure trove for fans and an invaluable source for future scholarship, this book includes the Pynchon

Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method

may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of

During the nineteenth century, Britain became the first gaslit society, with electric lighting arriving in 1878. At the

same time, the British government significantly expanded its power to observe and monitor its subjects. How did such enormous changes in the way people saw and were seen affect Victorian culture? To answer that question, Chris Otter mounts an ambitious history of illumination and vision in Britain, drawing on extensive research into everything from the science of perception and lighting technologies to urban design and government administration. He explores how light facilitated such practices as safe transportation and private reading, as well as institutional efforts to collect knowledge. And he contends that, contrary to presumptions that illumination helped create a society controlled by intrusive surveillance, the new radiance often led to greater personal freedom and

We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. This book describes the concept, characteristics, methodology, design,

management, business, recent advances and future technologies of plant factories with artificial lighting (PFAL) and indoor vertical farms. The third wave of PFAL business started in around 2010 in Japan and Taiwan, and in USA and Europe it began in about 2013 after the rapid advances in LED technology. The book discusses the basic and advanced developments in recent PFALs and future smart PFALs that emerged in 2016. There is an emerging interest around the

globe in smart PFAL R&D and business, which are expected to play an important role in urban agriculture in the coming decades. It is also expected that they will contribute to solving the trilemma of food, environment and natural resources with increasing urban populations and decreasing agricultural populations and arable land area. Current obstacles to successful PFAL R&D and business are: 1) no well-accepted concepts and methodology for PFAL design and

management, 2) lack of understanding of the environmental effects on plant growth and development and hydroponics among engineers; 3) lack of understanding of the technical and engineering aspects of PFAL among horticulturists; 4) lack of knowledge of the technical challenges and opportunities in future PFAL businesses among business professionals, policy makers, and investors and 5) lack of a suitable textbook on the recent

advances in PFAL technologies and business for graduate students and young researchers. This book covers all the aspects of successful smart PFAL R & D and business.
