built in lockstep
with the test topics
provided by Oracle

certification
program. Each
book is intended to
provide the
information that
will be tested in a

A poorly performing
database application
not only costs users
time, but also has an
impact on other
applications running
on the same
computer or the same
network. SQL Tuning
provides an essential

Acces PDF Oca
Oracle Database
Sql Expert Exam
Guide 170 047

next step for SQL
developers and
database
administrators who
want to extend their
SQL tuning expertise
and get the most from
their database
applications. There are
two basic issues to
focus on when tuning
SQL: how to find and
interpret the execution
plan of an SQL

Acces PDF Oca
Oracle Database
Sql Expert Exam
Guide 1-0 047

statement and how to change SQL to get a specific alternate execution plan. SQL Tuning provides answers to these questions and addresses a third issue that's even more important: how to find the optimal execution plan for the query to use. Author Dan Tow outlines a

Oracle Database
Sql Expert Exam
Guide 170 047

timesaving method
he's developed for
finding the optimum
execution
plan--rapidly and syst
ematically--regardless
of the complexity of
the SQL or the
database platform
being used. You'll
learn how to
understand and
control SQL execution
plans and how to

Oracle Database
Sql Expert Exam
Guide 120 047

diagram SQL queries to deduce the best execution plan for a query. Key chapters in the book include exercises to reinforce the concepts you've learned. SQL Tuning concludes by addressing special concerns and unique solutions to "unsolvable problems."Whether

you are a programmer
who develops SQL-
based applications or
a database
administrator or other
who troubleshoots
poorly tuned
applications, SQL
Tuning will arm you
with a reliable and
deterministic method
for tuning your SQL
queries to gain
optimal performance.

Annotation Oracle

RAC or Real Application Clusters is a grid computing solution that allows multiple nodes (servers) in a clustered system to mount and open a single database that resides on shared disk storage. Should a

(node) fail, the
database service
will still be
available on the
remaining nodes.
Oracle RAC is an
