First written in response to a JACT survey of over 100 schools, and now endorsed by OCR, this textbook has become a standard resource for students in the UK and for readers across the world who are looking for a clear and thorough introduction to the language of the ancient Greeks. Revised throughout and enhanced by coloured artwork and text features, this edition will support the new OCR specification for Classical Greek (first teaching 2016). Part 1 covers the basics, whilst Part 2 introduces a wider range of grammatical forms and constructions, with a vocabulary of 435 words and reading material from Socrates and the Sophists to the world of myth, and finally to extended passages of lightly adapted Herodotus. Practice passages, exam papers and revision sentences for GCSE complete Part 2, which has a reference section covering the whole course. Written by a long-time school teacher and examiner, this two-part course is based on experience of what pupils find difficult, concentrating on the essentials and on the understanding of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. It aims to be user-friendly, but also to give pupils a firm foundation for further study.

Society for Educational Studies Annual Book Prize winner: 2nd Prize This ground-breaking volume draws upon a rich and variegated range of methodologies to understand more fully the practices, policies and resources available in and to religious education in British schools. The descriptions, explanations and analyses undertaken here draw on an innovative combination of policy work, ethnography, Delphi methods, Actor Network Theory, questionnaires, textual analysis as well as theological and philosophical insight. It traces the evolution of religious education in a post-religious age from the creation of policy to the everyday experiences of teachers and students in the classroom. It begins by analysing the way in which policy has evolved since the 1970s with an examination of the social forces that have shaped curriculum development. It goes on to explore the impact and intentions of a diverse group of stakeholders with sometimes competing accounts of the purposes of religious educations. It then examines the manner in which policy is, or is not, enacted in the classroom. Finally, it explores contradictions and confusions, successes and failures, and the ways in which wider public debates enter the classroom. The book also exposes the challenge religious education teachers have in using the language of religion.
