remedies that omission  
and brings together  
varied perspectives from  
artists, policy-makers,

in the Pacific, Africa,  
Latin America, and  
Europe to explore the  
challenges and  
opportunities of  
supporting the arts in the

The book offers a series of grounded analyses which cover: strategies for the sustainability of arts enterprises; innovative evaluation methods; theoretical engagements with questions of art, agency, and social change; artists' entanglements with legal and structural frameworks; processes of cultural mapping; and

Unfortunately, the quality of evaluation reports produced by many of implementing development agencies is often poor (Mayne and Schwartz, 2005). And hence, if the quality evaluation report is

compromised, then development agencies may draw wrong conclusions about ongoing and future intervention and lose their steering wheel. Thus, the quality of evaluation reports needs to be evaluated before they are used. Though there is

One major

conclusion of this  
study is that the  
evaluation reports of  
both organizations  
are qualified enough

which is adequate as

But this doesnt mean  
that both

there is no significant

they should be realistic enough in showing the evaluation questions vis-à-vis compatible and clear evaluation methodology that can answer the evaluation questions. Moreover, consultants and other stakeholders who are involved in

the evaluation process should be involved right from the beginning of ToR development and reach into consensus on what and how the evaluation team answers the agreed evaluation questions. Both organizations should give due attention to a

(planning of

evaluation process  
before embarking

should be a

pitfalls during the  
evaluation process.

# Where To Download Oecd Dac Evaluation Quality Standards World Bank

Though there is a practice of evaluation report review before it gets approved in both organizations, it is not as such enough. Hence, both organizations should begin the practice of peer review using OECD/DAC evaluation standards
