This book provides a detailed snapshot of cultural policies in China, Japan, Singapore, South Korea and Taiwan. In addition to an historical overview of the culture-state relationships in East Asia, it provides an analysis of contemporary developments occurring in the regions' cultural policies and the challenges they are facing.

The presented book focuses on providing guidance in the subject of General Studies, to the aspirants of Main Examination conducted by the BPSC (Bihar Public Service Commission). In order to generate awareness in the aspirants about the trend of questions asked in the examination, solved papers of 66th to 48th examinations of BPSC have also been included. Analytical answers to the questions are given in an easy-to-understand language.

An introduction to the field of applied ontology with examples derived particularly from biomedicine, covering theoretical components, design

practices, and practical applications. In the era of “big data,” science is increasingly information driven, and the potential for computers to store, manage, and integrate massive amounts of data has given rise to such new disciplinary fields as biomedical informatics. Applied ontology offers a strategy for the organization of scientific information in computer-tractable form, drawing on concepts not only from computer and information science but also from linguistics, logic, and philosophy. This book provides an introduction to the field of applied ontology that is of particular relevance to biomedicine, covering theoretical components of ontologies, best practices for ontology design, and examples of biomedical ontologies in use. After defining an ontology as a representation of the types of entities in a given domain, the book distinguishes between different kinds of ontologies and taxonomies, and shows how applied ontology draws on more traditional ideas from metaphysics. It presents the core features of the Basic Formal Ontology (BFO), now used by over one hundred ontology projects around the world, and offers examples of domain ontologies that utilize BFO. The book also describes Web Ontology Language (OWL), a common framework for Semantic Web technologies. Throughout, the book provides concrete recommendations for the design and construction of domain ontologies.

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Today we are witnessing dramatic changes in the way scientific and scholarly knowledge is created, codified, and communicated. This transformation is connected to the use of digital technologies and the virtualization of knowledge. In this book, scholars from a range of disciplines consider just what, if anything, is new when knowledge is produced in new ways. Does knowledge itself change when the tools of knowledge acquisition, representation, and distribution become digital? Issues of knowledge creation and dissemination go beyond the development and use of new computational tools. The book, which draws on work from the Virtual Knowledge Studio, brings together research on scientific practice, infrastructure, and technology. Focusing on issues of digital scholarship in the humanities and social sciences, the contributors discuss who can be considered legitimate knowledge creators, the value of "invisible" labor, the role of data visualization in policy making, the visualization of uncertainty, the conceptualization of openness in scholarly communication, data floods in the social sciences, and how expectations about future research shape research practices. The

contributors combine an appreciation of the transformative power of the virtual with a commitment to the empirical study of practice and use. The hardcover edition does not include a dust jacket.

The Thoroughly Updated 13th edition of Target MH-CET 2022 book covers Previous Solved Papers (2007 to 2021) and 5 Mock tests as per latest pattern. China, with the world's largest population, numerous ethnic groups and vast geographical space, is also rich in languages. Since 2006, China's State Language Commission has been publishing annual reports on what is called "language life" in China. These reports cover language policy and planning initiatives at the national, provincial and local levels, new trends in language use in a variety of social domains, and major events concerning languages in mainland China, Hong Kong, Macau and Taiwan. Now for the first time, these reports are available in English for anyone interested in Chinese language and linguistics, China's language, education and social policies, as well as everyday language use among the ordinary people in China. The invaluable data contained in these reports provide an essential reference to researchers, professionals, policy makers, and China watchers.
