Describes fundamental differences in learning beliefs between the Western mind model and the East Asian virtue model of learning.

If you want to communicate effectively with people - especially if you want to persuade them to act - you need to start from where they are, not from where you are. The failure to do this lies at the root of many communications damp squibs, disasters and social conflicts. Knowing about the Three Worlds gives you a head start in getting it right.These invisible 'Worlds' can only be truly revealed by large scale detailed surveys which identify the connections and correlations between attitudes and beliefs. These sets of attitudes and beliefs create three different versions of 'common sense', three distinct ways of seeing the world and of evaluating any offer or ask, any campaign or political idea, any past-time, hobby, social opportunity, any purchase, product or service.Because our place in one world or another is determined by meeting, or not yet having met, unconscious needs – of safety and security or identity, or for esteem of others or self esteem, or for things beyond that such as new ideas, innovations or ethics – we are not ordinarily aware that these worlds exist. This book details, for the first time, how the values mapping system developed by Cultural Dynamics Strategy and Marketing (CDSM), enables us to look beneath the fog of argument and opinion, and cut through the confusion of behaviours being undertaken for different reasons, to lay bare the 'social DNA' which lies beneath and drives much of our individual behaviour, relationships, politics and social dynamics.Based on a hugely detailed model of the UK population, the CDSM model has been statistically calibrated to fit the internationally validated values measurements of Prof Shalom Schwartz at the Hebrew University of Jerusalem. The Three Worlds exist in all countries, and with this book the reader will be able to recognize Settlers, Prospectors and Pioneers wherever they live.Companies and campaigners, from Greenpeace to Shell, from the National Trust to Unilever, from the US Marines to the BBC and from McDonald's to Arsenal Football Club, have used the Three Worlds insights to build strategies that work, in marketing, in environmental change campaigns, in team building and in communications. This book gives examples, principles and guidelines to enable anyone to do likewise.

This is a story which will make your heart sing - a story for all the family to read together. Young Judy discovers an unexpected package in her grandfather's old study. She has never met her grandfather (Poppy) as he died before she was born, but Judy is the one to unearth the puzzle which Poppy left for his family. To find the treasure which Poppy left, the family must first solve every riddle which he wrote on a beautiful scroll, and carefully wrapped in a rich purple velvet bag. Unless they solve the puzzles, they won't find the treasure. See if you can solve the puzzles before the family does. What has Poppy left them as an inheritance? Have fun with the story and enjoy the Omega Prize at the end.

The third edition of this text, formerly known as Principles of Engineering Production, has been thoroughly revised and updated and continues to provide students with a comprehensive overview of the technical considerations for the entire manufacturing process. In keeping with the developments in manufacturing technology, this new edition reflects the major advances in recent years, in particular, looking at the transition to computer controlled machinery and the developments in computer applications. Beginning with specification and standardisation, it analyses the key aspects of the manufacturing process and pays particular attention to the crucial considerations of quality and cost. In addition, the coverage of materials has been extended to account for the increased availability and complexity of non-metals. The addition of a number of case studies, new worked examples and problems, make this text an invaluable introduction to engineering manufacture. It is also a useful and straightforward reference text for the professional engineer.

With contributions by: Eit Berland, Rebecca A. Brown, Christiane Buuck, Joanna C. Davis-McElligatt, Rachel Dean-Ruzicka, Karly Marie Grice, Mary Beth Hines, Krystal Howard, Aaron Kashtan, Michael L. Kersulov, Catherine Kyle, David E. Low, Anuja Madan, Meghann Meeusen, Rachel L. Rickard Rebellino, Rebecca Rupert, Cathy Ryan, Joe Sutliff Sanders, Joseph Michael Sommers, Marni Stanley, Gwen Athene Tarbox, Sarah Thaller, Annette Wannamaker, and Lance Weldy One of the most significant transformations in literature for children and young adults during the last twenty years has been the resurgence of comics. Educators and librarians extol the benefits of comics reading, and increasingly, children's and YA comics and comics hybrids have won major prizes, including the Printz Award and the National Book Award. Despite the popularity and influence of children's and YA graphic novels, the genre has not received adequate scholarly attention. Graphic Novels for Children and Young Adults is the first book to offer a critical examination of children's and YA comics. The anthology is divided into five sections, structure and narration; transmedia; pedagogy; gender and sexuality; and identity, that reflect crucial issues and recurring topics in comics scholarship during the twenty-first century. The contributors are likewise drawn from a diverse array of disciplines--English, education, library science, and fine arts. Collectively, they analyze a variety of contemporary comics, including such highly popular series as Diary of a Wimpy Kid and Lumberjanes; Eisner award-winning graphic novels by Gene Luen Yang, Nate Powell, Mariko Tamaki, and Jillian Tamaki; as well as volumes frequently challenged for use in secondary classrooms, such as Raina Telgemeier's Drama and Sherman Alexie's The Absolutely True Diary of a Part-Time Indian.

A virtual "Who is Who" in Asia, from Tel Aviv to Tokyo, on the eve of WW2. Gunther introduces the history and national characteristics of each nation, together with the biographies of their statesmen, politicians and war lords. Full of details and anecdotes, this is a superb accomplishment.

This book explores the factors that influence violent rebellious political organisations to transform into other entities, such as political parties, criminal organisations and terrorist organisations. From the end of the Second World War until 1990, many events in the world centred on the bipolar struggle between the United States and the USSR. Although there were numerous civil wars occurring during the Cold War era, many of these conflicts went virtually unnoticed unless they were linked to the Cold War struggle for ideological dominance. In the aftermath of the fall of the Soviet Union, the number of intra-state conflicts was prevalent around the globe. Along with the occurrence of civil wars, a variety of violent political movements also developed. Examining cases from Latin America, Africa, Europe, and Asia, this book addresses how violent political movements transform during and after conflict into new types of organisations using the collective political violence transformative (CPVT) model. The study uses a combination of pre-existing literature from the fields of sociology and political science, archival research, and interviews with movement members (former and active) conducted by the author. In studying the Provisional IRA and Sinn Féin, the Spear of the Nation (MK) and the African National Congress (ANC), the Abu Sayyaf Group and the Revolutionary Armed Forces of Colombia (FARC-EP), Transforming Violent Political Movements paints a picture of organisations that have to respond to their environments to survive. This book will be of much interest to students of political violence, terrorism, war and conflict studies, security studies and IR.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Forensic Microbiology

Brian and his friends are not part of the cool crowd. They're the misfits and the troublemakers—the ones who jump their high school's fence to skip class regularly. So when a deadly virus breaks out, they're the only ones with a chance of surviving. The virus turns Brian's classmates and teachers into bloodthirsty attackers who don't die easily. The whole school goes on lockdown, but Brian and his best friend, Chad, are safe (and stuck) in the theater department—far from Brian's sister, Kenzie, and his ex-girlfriend with a panic attack problem, Laura. Brian and Chad, along with some of the theater kids Brian had never given the time of day before, decide to find the girls and bring them to the safety of the theater. But it won't be easy, and it will test everything they thought they knew about themselves and their classmates. Praise for SICK "The gore and action will leave enthralled readers thrilled and then sated with each kill on either side." —Booklist "Between the pacing and the heroes' salty, blue language (full of lovingly creative, genital-inspired insults), reluctant readers who love zombies will devour it, right up to the abrupt end." —Kirkus Reviews "Sick is well written, with great detail, even if it is a little gory." —VOYA Magazine Awards 2014 Quick Picks for Reluctant Young Readers list from YALSA

Forensic Microbiology focuses on newly emerging areas of microbiology relevant to medicolegal and criminal investigations: postmortem changes, establishing cause of death, estimating postmortem interval, and trace evidence analysis. Recent developments in sequencing technology allow researchers, and potentially practitioners, to examine microbial communities at unprecedented resolution and in multidisciplinary contexts. This detailed study of microbes facilitates the development of new forensic tools that use the structure and function of microbial communities as physical evidence. Chapters cover: Experiment design Data analysis Sample preservation The influence of microbes on results from autopsy, toxicology, and histology Decomposition ecology Trace evidence This diverse, rapidly evolving field of study has the potential to provide high quality microbial evidence which can be replicated across laboratories, providing spatial and temporal evidence which could be crucial in a broad range of investigative contexts. This book is intended as a resource for students, microbiologists, investigators, pathologists, and other forensic science professionals.
