This is a basic book on the theory of color mixing -- but it's not your ordinary color theory book by any means. This one comes from Helen Van Wyk, recognized by her many thousands of fans and by her contemporaries as the quintessential expert on color mixing. She explains color mixing clearly so that oil and acrylic painters will learn how to put color theory into action. They'll see how they can paint any subject with the six basic colors plus white and gray.

**Landscapes in Oil is the first-ever comprehensive guide to classical
landscape painting reinterpreted for the twenty-first century.**

**Drawing from the tradition established by American painters of the
Hudson River School--artists like Thomas Cole, Frederic Church, and
George Inness--author and painter Ken Salaz reveals great masters'
philosophy and methods, updating their approaches for the
contemporary landscape painter. Beginning painters are given the
basic tools and step-by-step demonstrations, intermediate painters
are challenged with unpublished techniques that allow them to break
through to the next level, and advanced painters learn to apply their
skills under unified theories. Landscapes in Oil devotes a chapter to**

each of the fundamental elements of landscape painting--drawing, value, color, composition, and light quality--and offers critical advice on selecting tools and materials, choosing colors, and structuring your palette for best results. Emphasizing the necessity of plein air drawing and painting, Salaz demonstrates how to translate small, quick studies made outdoors into full-scale studio paintings. He provides detailed step-by-step breakdowns of the creation of four of his own paintings, focusing not only on application but also on the ideas that underpin every decision a landscape painter must make. The scores of landscape masterworks, past and present, that illustrate this book have been carefully chosen for their aesthetic power and because each embodies a specific aspect of the landscape painter's craft. For Salaz, landscape painting is a noble pursuit, and the goal of the landscape artist is not to paint "pretty pictures" but to create compelling images that express human beings' profound connection to nature in all its diversity and grandeur. At a time when classical landscape is enjoying a renaissance in art schools, ateliers, and galleries across North America, this book is an essential resource for beginning and experienced painters alike.

Complemented by five hundred full-color images, this practical guide to color for visual artists provides a basic introduction to color

theory, the color wheel, and the art of mixing pigments, from primary colors to neutrals, flesh tones, and metallics, and offers helpful guidelines on mixing media, creative ideas for color use, interviews with leading artists, and sample works. Original. 20,000 first printing.

About the Expert Manaal Javed has been painting in oils for more than four years. She puts her soul onto the canvas by playing with colors. She paints in a number of mediums, including acrylics and water paints. Oil painting is her favorite type of painting because an oil painting can be refined after it is completed. She critiques her work after completion and puts in the elements which she feels is incomplete in the painting. Hand and eye coordination makes her arrange all the elements in her painting beautifully and, of course, her imagination is like the cherry on top. She has always been a quiet person who does not let her feelings come out. For her, painting is a way to communicate with people. She had this advice to others who are learning oil painting, "Play with colors, feel free and break all the rules... and put the best on the canvas. Always critique your work; it is the key to improvement. Nothing is difficult in this world, just practice and you will create masterpieces in no time!!! Believe in yourself and let your imagination do the rest." HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.
