Manual: A Manual to Assist  
Designers and Builders in Meeting  
the Accessibility Requirements of  
The Fair Housing Act provides clear  
and helpful guidance about ways to  
design and construct housing which  
complies with the Fair Housing Act.

The manual provides direct information about the accessibility requirements of the Act, which must be incorporated into the design, and construction of multifamily housing covered by the Act. It carries out two statutory responsibilities: (1) to

## Download File PDF Old Flagstones Manual Guide

provide clear statement of HUD's interpretation of the accessibility requirements of the Act so that readers may know what actions on their part will provide them with a "safe harbor"; and (2) to provide guidance in the form of

## Download File PDF Old Flagstones Manual Guide

recommendations which, although not binding meet the Department's obligation to provide technical assistance on alternative accessibility approaches which will comply with the Act, but may exceed its minimal requirements.

## Download File PDF Old Flagstones Manual Guide

The latter information allows housing providers to choose among alternative and also provides persons with disabilities with information on accessible design approaches. The Manual clarifies what are requirements under the Act and

what are HUD's technical assistance recommendations. The portions describing the requirements are clearly differentiated from the technical assistance recommendations.
