A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism. Today, data science is a form of power. It has been used to expose injustice, improve health outcomes, and topple governments. But it has also been used to discriminate, police, and surveil. This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and data science are overwhelmingly white, male, and techno-heroic. In Data Feminism, Catherine D'Ignazio and Lauren Klein present a new way of thinking about data science and data ethics—one that is informed by intersectional feminist thought. Illustrating data feminism in action, D'Ignazio and Klein show how challenges to the male/female binary can help challenge other hierarchical (and empirically wrong) classification systems. They explain how, for example, an understanding of emotion can expand our ideas about effective data visualization, and how the concept of invisible labor can expose the significant human efforts required by our automated systems. And they show why the data never, ever “speak for themselves.” Data Feminism offers strategies for data scientists seeking to learn how feminism can help them work toward justice, and for feminists who want to focus their efforts on the growing field of data science. But Data Feminism is about much more than gender. It is about power, about who has it and who doesn't, and about how those differentials of power can be challenged and changed.

Jill goes along with the rest of the fifth-grade class in tormenting a classmate and then finds out what it is like when she, too, becomes a target. Reissued with a fresh new look and cover art. Simultaneous.

"In a small town in Maine, recently widowed Eveleth "Evvie" Drake rarely leaves her house. Everyone in town, including her best friend, Andy, thinks grief keeps her locked inside, and she doesn't correct them. In New York, Dean Tenney, former major-league pitcher and Andy's childhood friend, is struggling with a case of the "yips": he can't throw straight anymore, and he can't figure out why. An invitation from Andy to stay in Maine for a few months seems like the perfect chance to hit the reset button. When Dean moves into an apartment at the back of Evvie's house, the two make a deal: Dean won't ask about Evvie's late husband, and Evvie won't ask about Dean's baseball career. Rules, though, have a funny way of being broken--and what starts as an unexpected friendship soon turns into something more. But before they can find out what might lie ahead, they'll have to wrestle a few demons: the bonds they've broken, the plans they've changed, and the secrets they've kept. They'll need a lot of help, but in life, as in baseball, there's always a chance--right up until the last out"--

In this “long overdue manifesto on gender equality in the workplace, a practical playbook with tips you can put into action immediately...simply priceless” (Angela Duckworth, bestselling author of Grit), The No Club offers a timely solution to achieving equity at work: unburden women's careers from work that goes unrewarded. The No Club started when four women, crushed by endless to-do lists faster than ever, they still trailed behind male colleagues. And so, they vowed to say no to requests that pulled them away from the work that mattered most to their careers. This book reveals how their over-a-decade-long journey and subsequent groundbreaking research showing that women everywhere are unfairly burdened with “non-promotable work,” a tremendous problem we can—and must—plan the office party, screening interns, attending to that time-consuming client, or simply helping others with their work. A woman, most often, takes on these tasks. In study after study, professors Linda Babcock (bestselling author of Women Don't Ask), Brenda Peyser, Lise Vesterlund, and Laurie Weingart—the original “No Club”—document that women are disproportionately asked and expected to do. Overcommitted and underutilized as companies forfeit revenue, productivity, and top talent. The No Club walks you through how to change your workload, empowering women to make savvy decisions about the work they take on. The authors also illuminate how organizations can reassess how they assign and reward work to level the playing field. With hard data, personal anecdotes from women, and innovative advice from the authors' consulting Fortune 500 companies, this book will forever change the conversation about how we advance women's careers and achieve equity in the 21st century.

From an award-winning writer at the New York Times Magazine and a contributor to the 1619 Project comes a landmark book that tells the full story of racial health disparities in America, revealing the toll racism takes on individuals and the health of our nation. In 2018, Linda Villarosa's New York Times Magazine article on maternal and infant mortality among black mothers and babies in America caused an awakening. Hundreds of studies had previously established a link between racial discrimination and the health of Black Americans, with little progress toward solutions. But Villarosa's article exposing that a Black woman with a college education is as likely to die or nearly die in childbirth as a white woman with an eighth grade education made racial disparities in health care impossible to ignore. Now, in Under the Skin, Linda Villarosa lays bare the forces in the American health-care system and in American society that cause Black people to “live sicker and die quicker” compared to their white counterparts. Today's medical texts and instruments still carry fallacious slavery-era assumptions that Black bodies are fundamentally different from white bodies. Study after study of medical settings show worse treatment and outcomes for Black patients. Black people live in dirtier, more polluted communities due to environmental racism and neglect from all levels of government. And, most powerfully, Villarosa describes the new understanding that coping with the daily scourge of racism ages Black people prematurely. Anchored by unforgettable human stories and offering incontrovertible proof, Under the Skin is dramatic, tragic, and necessary reading. Little fish Adri promises to remember his parents' words of wisdom about how to live his life, such as "Find your own way. You don't have to follow the crowd" and "Make wishes on the stars in the nighttime sky."

Bringing Up B  b   meets Last Child in the Woods in this "fascinating exploration of the importance of the outdoors to childhood development" (Kirkus Reviews) from a Swedish-American mother who sets out to discover if the nature-centric parenting philosophy of her native Scandinavia holds the key to healthier, happier lives for her American children. Could the Scandinavian philosophy of "There's no such thing as bad weather, only bad clothes" hold the key to happier, healthier lives for American children? When Swedish-born Linda   keson McGurk moved to Indiana, she quickly learned that the nature-centric parenting philosophies of her native Scandinavia were not the norm. In Sweden, children play outdoors year-round, regardless of the weather, and letting babies nap outside in freezing temperatures is common and recommended by physicians. Preschoolers spend their days climbing trees, catching frogs, and learning to compost, and environmental education is a key part of the public-school curriculum. In the US, McGurk found the playgrounds deserted, and preschoolers were getting drilled on academics with little time for free play in nature. And when a swimming outing at a nearby creek ended with a fine from a park officer, McGurk realized that the parenting philosophies of her native country and her adopted homeland were worlds apart. Struggling to decide what was best for her family, McGurk embarked on a six-month journey to Sweden with her two daughters to see how their lives would change in a place where spending time in nature is considered essential to a good childhood. Insightful and lively, There's No Such Thing as Bad Weather is a fascinating personal narrative that illustrates how Scandinavian culture could hold the key to raising healthy, resilient, and confident children in America.
