With the evolution of the music business and the shifting influence of large record labels, the artist manager is now – more than ever – at the center of an artist's career. Artist managers are tasked with keeping abreast of the music industry and supporting the artists under their management while simultaneously managing their own careers. Including key industry insights, exclusive planning guidance, management tools, and strategies for a successful career, Artist Management for the Music Business has the tools to support any new or experienced artist manager. Through its analysis of over a dozen case studies, lessons, and contract examples, author Paul Allen provides a focused look at managing artists' careers. This follow-up to the best-selling second edition features a new chapter on entrepreneurship including detailed information on how to run an artist management enterprise as a business and includes coverage of anticipating risks, reacting to challenges, and basic money management. The chapter also contains additional sections on the effective use of social media, the Web, and handling online promotion. For additional resources, visit the book's website at www.artistmanagementonline.com.

With so few therapeutic outlets readily available to young people, schools have evolved into mental health centers for many students. Yet schools are hampered by limited access to resources needed to provide mental health promotion, prevention, and intervention services. Like its acclaimed predecessor, the Second Edition of the Handbook of School Mental Health offers ways for professionals to maximize resources, make and strengthen valuable connections, and attain more effective school-based services and programming. At the same time, the Handbook provides strategies and recommendations in critical areas, such as workforce development, interdisciplinary collaborations, youth/family engagement, consultation, funding, and policy concerns, summarizes the state of current research, and offers directions for further study. Chapters model best practices for promoting wellness and safety, early detection of emotional and behavioral problems, and school-based interventions for students with anxiety, depression, attention deficit hyperactivity disorder, and other common challenges. In spotlighting this range of issues, the contributors have created a comprehensive game plan for advancing the field. Among the Handbook's topics: Pre-service training for school mental health clinicians. Cognitive-behavioral interventions for trauma in schools. Increasing parental engagement in school-based interventions. Models of psychiatric consultation to schools. Culturally competent behavioral and emotional screening. Bullying from a school mental health perspective. Prevention and intervention strategies related to a variety of mental health problems in schools. The Second Edition of the Handbook of School Mental Health is an essential reference for researchers, graduate students, and other professionals in child and school psychology, special and general education, public health, school nursing, occupational therapy, psychiatry, social work and counseling, educational policy, and family advocacy.

Lydia Bals identifies different types of offshoring, concluding that the buy option of offshore outsourcing versus hybrid or make options is directly related to purchasing. Her in-depth analysis specifically focuses on the sourcing of marketing services. In this context, the investigations of purchasing/marketing integration provide a conceptual model of barriers to purchasing involvement in sourcing of services. Moreover, she seeks to shed light on issues of providing incentives for advertising agencies from an agency theory perspective.

More than ever before, children are apparently being recognised as social actors and citizens. Yet public policy often involves increased control and surveillance of children. This book explores the contradiction. It shows how different ways of thinking about children produce different childhoods, different public provisions for children (including schools) and different ways of working with children. It argues that how we understand children and make public provision for them involves political and ethical choices. Through case studies and the analysis of policy and practice drawn from a number of countries, the authors describe an approach to public provision for children which they term 'children's services'. They then propose an alternative approach named 'children's spaces', and go on to consider an alternative theory, practice and profession of work with children: pedagogy and the pedagogue. This ground breaking book will be essential reading for tutors and students on higher education or in-service courses in early childhood, education, play, social work and social policy, as well as practitioners and policy makers in these areas.

Health workers who provide services to persons with severe mental illness are frequently under enormous stress; burnout is common. Alleviating such stress is the objective of Interactive Staff Training. The book provides rehabilitation and mental health professionals with a strategy to help them and their colleagues work as a well-integrated team. This strategy has been implemented in teams serving more than 10,000 persons with psychiatric disabilities. The text combines a careful description of the central theory behind the strategy with plenty of clinical anecdotes that illustrate its practical, everyday benefits.

The Retail and Food Services sectors play an important role in Singapore. They add to the vibrancy of the economy and contribute to the social well-being of Singaporeans. At the same time, they are often highlighted and scrutinised for their low productivity performance and high reliance on manpower. There is to date a lack of local literature that addresses the issues faced by the two sectors at the enterprise and worker levels. This timely book includes major topics in services productivity in the Singapore context, with emphasis on Retail and Food Services. Topics covered include the key productivity levers of the services sectors: holistic productivity measurement framework, effective entrepreneurship, manpower management, promotion by social media, marketing, costing process and accounting sophistication. These areas are explored through literature reviews and in-depth interviews with companies and consumers. The chapters also include recommendations for policy makers and industry stakeholders. Written in a simple and accessible manner, this book will serve as an insightful guide to researchers, policy-makers, industry practitioners and enterprises and those who are keen to learn from the Singapore experience.

The advent of the fourth industrial revolution, Industry 4.0, brings about both opportunities and challenges that are likely to set developed economies even farther apart from emerging economies. This book, through the perspective of researchers in the emerging markets, presents analyses on a number of issues important to entrepreneurial finance, such as debt financing, mergers and acquisitions, stock market efficiency, resource allocation and consumption, and sustainable development. It aims at improving our understanding of the financing needs as well as the financial risks involved in entrepreneurial endeavors in less developed settings in the new era.

The first textbook to teach students how to build data analytic solutions on large data sets using cloud-based technologies. This is the first textbook to teach students how to build data analytic solutions on large data sets (specifically in cloud-based technologies for data storage, transmission and mashup, and AI techniques to analyze this data. This textbook is designed to train college students to master modern cloud computing systems in operating principles, architecture, algorithms, programming models and software tools for big data mining, analytics, and cognitive applications. The book will be suitable for use in one-semester computer science or electrical engineering courses on cloud computing, machine learning, cognitive computing, or big data science. The book will also be very useful as a reference for professionals who want to work in cloud computing and data science. Cloud and Cognitive Computing begins with two introductory chapters on data science, and adaptive computing that lay the foundation for the rest of the book. Subsequent chapters cover topics including cloud architecture, mashup services, virtual machines, Docker containers, mobile clouds, IoT and AI, inter-cloud performance and benchmarks, with a focus on Google's Brain Project, DeepMind, and X-Lab programs, IBKai HwangM SyNapse, Bluemix programs, cognitive initiatives, and neurocomputers. The book then covers machine learning algorithms and software tools and application development, applying the tools in machine learning, social media, deep learning, and cognitive applications. All cloud systems are illustrated with big data and cognitive application examples.

Cachon 1e is designed for undergraduate students taking an introductory course in operations management. This text will share many of the strengths of Matching Supply with Demand: An Introduction to Operations Management (3e). Operations Management by Cachon comprehensively spans the relevant domain of topics, is accessible to a typical undergraduate student (i.e., limited real world business experience), incorporates the latest research and knowledge, and provides thorough pedagogical support for instructors along with innovative learning support for students. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Operations Management in the Supply Chain: Decisions and Cases is an ideal book for the instructor seeking a short text with cases. This book employs a cross-functional perspective that emphasizes strategy and critical thinking, appealing to non-majors and practical for use in an MBA level or undergraduate course in operations management. The size and focus of the book also make the text attractive for the cross-functional curriculum where students are required to purchase more than one text. The sixteen cases offer variety in length and rigor; and several are from Ivey, Stanford, and Darden. This mix makes the book appropriate for both undergraduates and MBA students.

Implement practical solutions in business continuity management and organizational resilience guided by international best practice from ISO 22301:2019. Business continuity management and resilience are critical to maintaining a healthy business, but many organizations either do nothing (leaving themselves exposed to disruption), take short cuts (leaving major gaps) or fail to properly engage senior stakeholders. This book is a straightforward guide to delivering an effective business continuity capability, including practical solutions built from the author's personal experience managing hundreds of projects in a variety of business settings. Business Continuity Management compares incident management, crisis response and business continuity and how to explain their importance to senior decision makers to ensure appropriate investment. Readers will benefit from case studies of organizational crises and disruptions, including Home Depot, Nissan, RBS, Facebook, Equifax and KFC, and an exploration of lessons learned from the COVID-19 pandemic. With key performance indicators, templates and checklists covering planning, response, reporting and assurance, this book is the essential reference for business continuity and resilience which can be tailored to any organization.
