This book is pragmatic and is not theoretical or conceptual.
The book is intended for newcomers to learn to earn a daily
income from financial market by trading a relatively new
investment vehicle called Binary options. With binary
options being available to retail traders through electronic
trading platforms and a variety of brokerage firms offering
a range of assets to trade, it has become easier than before
to take advantage of this short term investment vehicle and
make a decent daily income for a disciplined trader. The
book provides a detailed insight into binary options as
traded in financial markets with a view to improve upon the
odds by using a range of tools and resources. This book
introduces a reader to the financial market with a brief
discussion on various types of markets and what instrument
and assets are available for trade. This is followed by a
detailed discussion on the tools of trade or the set of
tools required by a trader for technical analysis and
understand the market, learn to use those to predict the
possible price movement of an asset. A complete chapter has
been devoted to mental preparation as trading is in the mind
and the best tool one can possess for being successful in any
kind of trading. Because of the short term nature of
investment, a trader will have to make relatively quick
decision on a range of aspects of the asset being traded. As
such, several setups have been discussed at lengths which
are predicated on certain outcome. From how to configure the

In this book, you will discover: Advanced Options Trading Strategies You Need to Know About Trading 101: What Is A 'Day Trading' The Right Way to Buy Options The 3 Best Stocks for Options Trading Sell Options on The Expiration Day Don't Overcomplicate Your Trading Scalping: An Effective and High Trading Strategy Aggressive Options Trading ...And much more What you do before the market opens is crucial to your entire trade day. Most traders will begin their days around 6 AM EST, as this gives them plenty of time to get their day prepared before the market opens. The more prepared you are in advance, the better you will be able to utilize your time once the market opens to conduct actual trades and position yourself for maximum profits. Before the market opens, there are four tasks that every single trader should engage in to help them get prepared for the day ahead. These include conducting a market overview, locating potential trades, designing their watch list, and checking their existing positions. We are going to discuss how each of these tasks occurs so that you can get a feel for how you can build the beginning of your trade day around these strategies.

Market Overview The first thing you need to do is conduct a market overview, which will allow you to catch up on what has happened overnight. Stocks tend to change overnight, so paying attention to this information is key in helping you lay the foundation for your trades ahead. Once you know where the market is at, you can get a feel for how that might be influencing your existing trades and how it might affect the next trades you plan on making. The easiest way to conduct a market overview is to check out news platforms like CNBC or MarketWatch, as these tend to provide the best and most recent information regarding the stock market. You want to pay attention to the overall market sentiment, the sector sentiments, and the current holdings. For the market sentiment, you want to see whether the

general market is bullish or bearish, get a feel for what the key economic reports are, and pay attention to inflation and currency. Are you ready to be in the TOP 10% of successful traders? "Scroll up and Click the Add to Cart button"
