Management is told of the necessity of the policy document, and they support its development. A manager or administrator is assigned to the task and told to come up with something, and fast! Once security

policies are written, they must be treated as living documents.

As technology and business

requirements change, the policy must be updated to reflect the new environment--at least one review per year. Additionally, policies must include provisions for security awareness and

This Oracle Press eBook is filled with cutting-edge security techniques for Oracle Database 12c. It covers authentication, access control, encryption, auditing, controlling SQL input, data masking, validating configuration compliance, and more.

Each chapter covers a

The Cloud DBA-

Oracle provides an

overview of Database-

as-a-Service (DBaaS)

that you can use in

defining your cloud

adoption strategy. In-

depth details of various

cloud service providers
