C. P. Ellis grew up in the poor white section of Durham, North Carolina, and as a young man joined the Ku Klux Klan. Ann Atwater, a single mother from the poor

black part of town, quit her job as a household domestic to join the civil rights fight. During the 1960s, as the country struggled with the explosive issue of race, Atwater and Ellis met on opposite sides of the public school integration issue. Their encounters were charged with hatred and suspicion. In an amazing set of transformations, however, each of them came to see how the other had been exploited by the South's rigid power structure, and they forged a friendship that flourished against a backdrop of unrelenting bigotry. Rich with details about the rhythms of daily life in the mid-twentieth-century South, The Best of Enemies offers a vivid portrait of a relationship that defied all odds. By placing this very personal story into broader context, Osha Gray Davidson demonstrates that race is intimately tied to issues of class, and that cooperation is possible--even in the most divisive situations--when people begin to listen to one another.

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

This NICET Level 1 Study Guide includes 150 questions referencing the NFPA 72 2013, NEC 2011, OSHA standards and technical/theoretical disciplines. Each question is accompanied by the answer and the standard or section of the code (NFPA, NEC and OSHA). Each question is a multiple choice (4 choices) similar to the format of the actual NICET exam. Questions are challenging enough to test your readiness. This study guide helps you prepare more efficiently for the exam.

1903 OSHA 2014 Edition Of DUVALL's Master Study Guide Series Instructors Manual is a complete front to back study guide and workbook set forth in sequential, easy to solve, multiple-choice questions with answers. Sequential means the questions follow the text material and do not jump around from section, paragraph or sentence but follow the text in simplified readable format. This proper sequence for the research and study is essential to developing basic research techniques required for the retention and comprehension of concentrated technical information at any educational level. Solving problems written for specific subject information on any subject is thereby enhanced. The material of the textbook is read, reread when the problem is researched then directed to the correct answer to derive and obtain the solution. This study guide, workbook procedure lightens the burden on the professors, instructors, and teachers for providing accurate information to the student. Further, the sequential steps enhance and encourage students with personal initiative to conduct additional home study. Education, and the basic research learning process is too important for playing guessing games. Thus, Each paragraph of 1903 OSHA - Inspections, Citations and Proposed Penalties each test question with its accompanying answer follows the exact identifying Sec. number as published by OSHA. As an example of this sequenced study guide workbook series procedure the question and answers for identifying Sec. (1903.1 Purpose and scope) will lead into the progression of multiple-choice questions through the entire 1903.1 problem set. Remembering that 1903.1 Purpose and scope defines the OSHA "General Duty Clause." In similar, sequential steps the multiple-choice questions for 1903.2 Posting of notice, 1903.3 Authority for inspection, 1903.4 Objection to inspection, 1903.5 Entry not a waiver, through and including 1903.22

Definitions. Included in 1903 for 2014 are multiple-choice questions for 1903.19 Appendices A, B, and C. Due to requests the OSHA Administrative Penalty Information Bulletin Effective October 1, 2010 for Federal OSHA with multiple-choice questions is a welcome addition to the 2014 Edition.
