¾ Josephine Waggoner's writings offer a unique perspective on the Lakota. Witness will become a widely referenced primary source. Emily Levine has meticulously examined all known collections of Waggoner's manuscripts, sometimes comparing handwritten drafts with multiple typed copies to preserve information in full. Levine's extensive notes are well chosen and informative. Witness will interest both specialist and popular audiences. ã Raymond DeMallie, Chancellors' Professor of Anthropology and American Indian Studies at Indiana University¾ During the 1920s and 1930s, Josephine Waggoner (1871\_1943), a Lakota woman who had been educated at Hampton Normal and Agricultural Institute in Virginia, grew increasingly concerned that the history and culture of her people were being lost as elders died without passing along their knowledge. A skilled writer, Waggoner set out to record the lifeways of her people and correct much of the misinformation about them spread by white writers, journalists, and scholars of the day. To accomplish this task, she traveled to several Lakota and Dakota reservations to interview chiefs, elders, traditional tribal historians, and other tribal members, including women.¾¾ Published for the first time and augmented by extensive annotations, Witness offers a rare participant's perspective on nineteenth- and early twentieth-century Lakota and Dakota life. The first of Waggoner's two manuscripts presented here includes extraordinary firsthand and as-told-to historical stories by tribal members, such as accounts of life in the Powder River camps and at the agencies in the 1870s, the experiences of a mixed-blood H'kpa? a girl at the first off-reservation boarding school, and descriptions of traditional beliefs. The second manuscript consists of Waggoner's sixty biographies of Lakota and Dakota chiefs and headmen based on eyewitness accounts and interviews with the men themselves. Together these singular manuscripts provide new and extensive information on the history, culture, and experiences of the Lakota and Dakota peoples.

"This classic work on the language, grammar, tales, history, and culture of the Dakota Indians is the result of many years of linguistic study and personal experience spent in Minnesota by Stephen R. Riggs, who arrived as a Presbyterian missionary in 1837 ... In Dakota grammar, Riggs presents three interrelating aspects of language and culture, beginning with a detailed description of the Santee dialect of the Dakota language and its grammar. The texts of the traditional stories ... are each accompanied by full English translations. Riggs also provides an ethnographic overview of various aspects of Dakota culture and history that enhances the value of the book to all students of Dakota"--Back cover.

Reviews the most important literature on the functional morphology and natural history of molluscs over a period of half a century from 1925 to the present day, and draws extensively upon authoritative papers published mostly in the English language in a number of international journals during this period. By these means it is hoped to provide an anthology of what is most interesting in the literature in a number of selected topics. Appendices give some practical assistance for the dissection of selected examples. Jim Ka-Nipitehtew was a respected Cree Elder from Onion Lake, Saskatchewan, who spoke only Cree and provided these original counselling discourses. The book offers the speeches in Cree syllabics and in Roman Orthography as well as an English translation and commentary. The Elder offers guidance for First Nations people in these eight speeches that cover the proper performance of ceremonies, words of encouragement for youth, information about collecting medicinal plants, directions for proper behaviour toward women, proper preparations for the Pipe ceremony, the role of the Pipestem in the Making of Treaty 6, the importance of tobacco, and examples of improper ritual behaviour in ceremonies. One of the most important speeches is the narrative of the record for the treaty negotiations that took place in the summer of 1876. It was originally transmitted by Jim Ka-Nipitehtew directly to him and the authors comment on this remarkable chain of transmission. The book contains a Cree-English and an English-Cree Glossary. This is an important resource for Cree linguistics as well as those interested in understanding the Cree perspective on Treaty 6.

of the nation's oldest city—St. Augustine. This book is the first to be written about Menendez. It is based on scholarly research, but it is not just a work for the scholar. It was written for the education and enjoyment of any reader who wants to meet this remarkable man. Manucy has dramatized historic moments so that history comes alive and we find ourselves in the midst of it.

The Dakota people, alternatively referred to as Sioux Native Americans or Oceti Sakowin (The People of the Seven Council Fires), have a storied history that extends to a time well before the arrival of European settlers. This work offers a comprehensive history of the Dakota people

and is largely based on eyewitness accounts from the Dakota themselves, including legends, traditions, and winter counts. Included are detailed analyses of the various divisions (tribes and bands) of the Dakota people, including the Lakota and Nakota tribes. Topics explored include the Dakotas' early government, the role of women within the Dakota tribes, the rituals and rites of the Dakota people, and the influence of the white man in destroying Dakotan culture.

The Story of Johnson Farthing, Book Three

From the day Earth first made contact with aliens, the Otina have been a thorn in their side. It was the Otina who ambushed the treaty ceremony with the Hedali. It was the Otina who disrupted Earth's war effort against the Iltia'cor. And in the year since Earth stood victorious over its powerful enemy, it's become obvious that the Otina have infested the Earth system more than anyone realized. To make matters worse, Alex Ramirez has been captured by the Otina. The unpredictable and always combative marine has been put in an alien prison. But no prison can hold Alex unless he wants to stay. And he does not want to stay. As Alex looks for ways of escape, Earth forces are scouring the system looking for clues to where he might be. What they find, however, changes the way that humans will look at the galaxy forever. Mosar, that crucial element that Earth lacks, turns from the answer to the riddle. Humanity will have to set aside the rescue of one of its heroes in order to solve a mystery that threatens their entire race.
