This book assembles ten special studies, each devoted to an aspect of Fisher's multifaceted career or to exploring the intellectual and religious outlook of someone who was at the same time a moderniser, a reformer and an opponent of the Reformation. John Fisher's career provides an illuminating perspective on English religious and intellectual history in a crucial phase of development. As a churchman he became the foremost preacher in England, issuing a call to ecclesiastical reform and personal repentance that echoed the call of Savonarola at Florence. At the same time he provides an early example of the pastoral bishop that was to become the ideal of both the Reformation and the Counter Reformation. Finally in the crisis that paved the way for the English Reformation, he became the leading defender of Queen Catherine against the divorce suit of Henry VIII. He was among the small band who were executed in 1535 as conscientious objectors to the oaths of Succession and Royal Ecclesiastical Supremacy. He has been venerated as a Catholic martyr ever since.

Many Christians live as though they are effectively alone in the world. However, there is another realm of intelligent life that plays a role in the world—angelic beings. This book explores the doctrine of angels and demons, answering key questions about their nature and the implications for Christians' beliefs and behavior, helping readers see their place in the larger biblical plotline that includes supernatural beings. An understanding of the reality of angels and demons encourages believers to be vigilant in the light of spiritual warfare and to be confident in Christ's victory on the cross.

Four Years Above the Earth

The Australian Official Journal of Trademarks

When his student and close friend Oliver Smithies accepted his Nobel Prize in Medicine and Physiology, he singled Field out as someone who was important in his life, saying, "Field Morey, a distinguished flight instructor taught me to fly...but he taught me something more important than flying. He taught me that it is possible to overcome fear with knowledge." During his four years above the earth, throughout fifty-eight years of teaching more than one thousand pilots, Field overcame fear, faced weather, set records, had abundant fun...and as he puts it, "learned from my students...probably more than I taught." Since he grew up in an aviation family, it was expected that Field would fly. A contemporary of Charles Lindbergh, his father, Howard, taught him about airplanes, about operating an airport, about character and responsibility, while Lindbergh inspired him to imagine more and aim higher. Twice the FAA named Field Flight Instructor of the Year. Later, his name was added to the Wright Brothers Master Pilot Award. Along with Oliver Smithies, the pair set a world record, and when the Aviation Hall of Fame inducted him, it was a career highlight. In this memoir, Field recounts his coming-of-age in aviation and relates stories of memorable flights and remarkable adventures. With an awareness that his story is also his students' story, he recognizes the privilege of having been born when he was and pays tribute to his father, Howard Morey, an exemplary aviation pioneer, by thanking him every day for guiding him in the right direction. Yes, this is a story about flying, but it is much more. It

is a study of how excellence evolves, not always in a linear progression, but with passion and vision.
