realistic contexts. A high profile is given to skills development from the start of the course. Cross-curricular project work encourages students to communicate in English about their own lives and experiences. The strong cultural element helps students to establish a connection between language and life. Students are

questions and augments previous answers with new material, particularly in these areas: 1. Technology: As before, the book avoids recommending specific equipment, but weighs the merits of the types of technology available for audio and video recording,

transcription, preservation, and dissemination. Information about web sites is expanded, and more discussion is provided about how other oral history projects have posted their interviews online. 2. Teaching: The new edition addresses the use of oral history in

online teaching. It also expands the discussion of Institutional Review Boards (IRBs) with the latest information about compliance issues. 3. Presentation: Once interviews have been conducted, there are many opportunities for creative presentation. There is

extensively with theoretical issues, on the grounds that these emerge best from practice. But the third edition includes the latest thinking about memory and provides a sample of some of the theoretical issues surrounding oral sources. It will include examples of increased
