It shows that killing and maiming, suffering and the death of animals were not insignificant topics to late medieval men, but constituted a complex set of issues, and could provoke very contradictory thoughts and feelings that varied according social and cultural milieus and particular cases and circumstances.

Martin Hengel gathers an encyclopedic amount of material, ancient and modern, to present an exhaustive survey of the early course of Hellenistic civilization as it related to developing Judaism. The result is a highly readable account of a largely unfamiliar world which is indispensable for those interested in Judaism and the birth of Christianity alike. An extensive section of notes and bibliography is included.

This book provides significant new insights into the Enlightenment in Portugal and its relationships with other European cultural movements using Eugénio dos Santos (1711–1760) as a common reference point. Eugénio dos Santos was a Portuguese architect and city planner who, among other projects, was responsible for the plans to rebuild Lisbon after the earthquake of 1st November 1755. His artistic and technical training, architectural production, aesthetic preferences and some of the books in his private library point to a person who embodied the transition between two moments in Portuguese culture, with their specific characteristics and particular reception of the practices and ideas that circulated among European intellectuals and practitioners. Over the 18 chapters of this volume, several specialists in different disciplinary areas discuss ideas, libraries, printed and handwritten documents, drawings, printing techniques, and architects, philosophers and writers of the 18th century, in order to offer a broad view of a time period closely associated with the construction of modernity.

Ne a Ioulis sur l'île de Ceos, Bacchylide a tot baigne dans la poésie. Neveu du grand poete Simonide, il fut recu avec lui dans les cenacles les plus brillants de Grece, notamment Athenes et Sparte. Rivale de Pindare, dont il l'etait le cadet, il chante lui aussi le tyran Hieron de Syracuse, et fut, comme, lui, un poete itinérant. Il connut sans doute l'exil, et mourut aux alentours de 450 avant Jesus-Christ. De lui nous avons conserve des epinicies, poemes ecrits pour les vainqueurs des concours sportifs, des hymnes des peans et des dithyrambes, poeme en l'honneur de Dionysos Notre édition regroupe en un volume l'ensemble des textes de Bacchylide, les dithyrambes, les epinicies et les fragments. La longue introduction de Jean Irigoïn presente les connaissances relatives a la vie et a l'oeuvre du rival de Pindare, et fait le point sur la question de l'exil, mentionne seulement par Plutarque. L'histoire du texte est relatee en detail, notamment la decouverte de 1897 du papyrus de Londres, de meme que la tradition indirecte. Une note bibliographique ainsi qu'un appendice concernant la langue et le style de Bacchylide, sont mis a la disposition du lecteur soucieux d'approfondir. Chaque groupement de texte est precede d'une notice documentee, tandis que des notes accompagnent la lecture. L'ouvrage est en outre enrichi d'un Index Nominum et d'une table des concordances.

The Silk and Spice Routes

An Introduction

The history of humankind is built on a series of technological innovations and inventions-from the horsebit and the wheel to the microchip and the computer. Over the centuries, the exchange of these technologies has inspired new developments and improvements. It is through trade that much of this exchange has taken place. Across Asia, the paths of the Silk and Spice Routes brought together many different peoples to trade and so gather knowledge of each other's science and inventions. In this way, some of the most fundamental technologies, including writing, weaving and agriculture, have evolved and developed. Splendidly illustrated with dozens of historic visuals, Inventions and Trade explores the process of invention technological exchange, and the massive contribution made to it by the Silk and Spice Routes.

Historians, classicists, and archeologists will welcome Professor Turner's lucid introduction to the field of Greek papyrology. The relatively recent rediscovery of Greek (and Latin) texts on papyrus has made possible greatly improved editions of classic works and has provided a deeper understanding of life in classical times. Professor Turner considers papyrus as a writing material, goes on to the problems of excavating for papyri, editing a papyrus text, determining its author and owners, and so on. He discusses the relation of papyri to Greek literature as well as to various types of non-literary

documents, and he assesses various contributions papyri have made to ancient history. A list of the principal editions of papyri is included. Originally published in 1968. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
