This book is for all people who are forced to use UNIX. It is a humorous book--pure entertainment--that maintains that UNIX is a computer virus with a user interface. It features letters from the thousands posted on the Internet's "UNIX-Haters" mailing list. It is not a computer handbook, tutorial, or reference. It is a self-help book that will let readers know they are not alone.

Books and Pamphlets, Including Serials and Contributions to Periodicals

Microsoft Office 97 from the Glencoe Visual Series is an exciting visual learning experience that gives your students the tools they need for competence and confidence in the use of Microsoft Office. It incorporates full-color illustrations, 3-D graphics, and even an inviting character who introduces concepts to reach today's visually oriented students. The text is accompanied by an applications workbook and a data disk containing templates so students can apply their skills as they learn them.
