SELF-ESTEEM develops and evolves throughout our lives as we build the image of ourselves, through our experiences with different people and activities. Experiences during our childhood play a particularly important role in the formation of our SELF-ESTEEM. There are many ways in which you can develop a MORE POSITIVE PERSPECTIVE and begin to change the way you think and feel about many situations you encounter on a daily basis. Changing your ATTITUDE and not falling back into negative thinking will take time, but as the days go by, the new perspective will become second nature. THIS BOOK HAS VERY PRECISE AND ESSENTIAL TOOLS TO ACTIVATE THE POWER OF YOUR SELF-ESTEEM.

An edition expanded with more than 100 pages of new content offers a blueprint for a better life, whether one's dream is escaping the rat race, experiencing high-end world travel, earning a monthly five-figure income with zero management or just living more and working less.

With the appearance of Grunch of Giants, R. Buckminster Fuller consummates his literary canon, his panoramic lifetime survey of all aspects of the responsibility of human beings for their own destiny. This book is a modern allegory - his long-gestated myth-of the villainy of capitalism and the fecklessness of classic economics. For Fuller, the academic discipline of economics is irrelevant since it derives from an invalid assumption of scarcity. In fact, he has long argued that future historians of our era may subsume our business practices as a branch of mythology; thus it is not surprising that the word economic appears nowhere in his text. Fuller's myth is no idle fairy tale, since he faces his question - the question of a technological imperative which only he could raise with the deadly seriousness of satire. That question is: Can our system of national political sovereignties and corporate profits survive the inevitable technology revolution require to obviate wars by effecting a worldwide rise in the standard of living. One of the functions of myth is to resolve contradictions in our culture. Grunch of Giants portrays the rising of multinationl corporations in the paradoxical role of function both as the epitome of capitalistic selfishness and as the inadvertent vehicle for the dissolution of national political boundaries - the last deterrent to a one-world economy. The result is more subversive of the property and profit values of the capitalist system than anything dreamed of since Karl Marx. —E.J. Applewhite, collaborator with RBF on Synergetics and Synergetics 2, author of Cosmic Fishing: A Memoir of Working With R. Buckminster Fuller

Providing a general overview of the accurate history of World War II which was essentially a continuation of World War I with the same sabre-rattling participants-The Ruling Elite describes the circumstances leading up to World War II. Author Deanna Spingola discusses how the diaspora-distributed international bankers living and prospering in Britain, France, and America influenced greedily, compromised, and complicit politicians in those nations. The Ruling Elite explains that through deceptive propaganda, those politicians persuaded naïve citizens to wage war against Germany, a peace-loving nation whose leaders were uncooperative with the bankers, which led to World War I. Following that war, German officials rejected the bankers and their money-lending scheme to save their nation and its citizens from the burden of debt. The aftermath of World War I-a deadly war that killed millions and imposed communism in numerous countries-impacted every banker-owned country in various ways: culturally, morally, politically, and economically. Researched through historical documents and scholarly works, The Ruling Elite describes how warmongers regularly project their criminal activities onto others, frequently blaming the victim, whether an individual or a nation. Spingola offers an unbiased look at World War II beginning with Hitler and the rebirth of Germany through the aftermath of the war."

Rich Dad's Guide to Becoming Rich...Without Cutting Up Your Credit Cards

The Business of the 21st Century

A first responder's harrowing account of 9/11—the inspirational true story of an American hero who gave nearly everything for others during one of New York City's darkest hours. On September 11, 2001, FDNY Battalion Chief Richard “Pitch” Picciotto answered the call heard around the world. In minutes, he was at Ground Zero of the worst terrorist attack on American soil, as the Twin Towers of the World Trade Center began to burn—and then to buckle. A veteran of the 1993 bombing of the World Trade Center, Picciotto was eerily familiar with the inside of the North Tower. And it was there that he concentrated his rescue efforts. It was in his smoky stairwells where he heard and felt the South Tower collapse. He made the call for firemen and rescue workers to evacuate, while he stayed behind with a skeleton team of men to help evacuate a group of disabled and infirm civilians. And it was in the rubble of the North Tower where Picciotto found himself buried—for more than four hours after the building's collapse.

*Why cutting up your credit cards won't make you rich A popular TV personality often says, "Take out your credit cards and cut them into pieces." While that is sound advice for people who are not financially responsible, it is inadequate advice for anyone who wants to become rich or financially free. In other words, just cutting up your credit cards will not make you rich. What does make you rich is financial education...unfortunately a type of education we do not receive in school. If a person has a solid financial education, they would know that there are two kinds of debt...good debt and bad debt. A person with a sound financial education would know how to use good debt to make them richer faster...much faster than a person who only saves money and has no debt. Rich Dad's Guide to Becoming Rich * Are you in credit card debt? * Is job security dead? * Is your financial security threatened? * Is a high-paying job the answer? * Is your money working for you? * Do you have good debt or bad debt? We all need more financial education. We need to know how to have our money work hard for us so we don't have to spend our lives working for money. That is why we need more sophisticated financial education...not oversimplified and childish financial tips such as cut up your credit cards or save more money. If you are ready to increase your financial education and enjoy your credit cards, then this book is for you.*

SINOSSI: Padre Ricco Padre Povero (1997) coniuga l'autobiografia e i consigli personali dell'autore per diventare economicamente indipendenti e finanziariamente liberi. In questo libro dichiarato bestseller dal New York Times, l'autore svela ciò che la società non ci ha mai insegnato ma soprattutto ciò che le classi più abbienti insegnano ai propri credi per diventare (e rimanere) benestanti. Nel manuale l'autore cita inoltre la propria carriera di imprenditore e il suo pensiero di 47 anni come prove di ciò che sostiene. La maggior parte di noi conosce l'espressione "ricerca del successo" ma se ci fosse chiesto, come la definiremmo? Una definizione potrebbe essere "Una routine di lavoro infinita che beneficia tutti tranne sé stessi". Questo significa che tu svolgi tutto il lavoro mentre gli altri - il governo, gli esattori delle tasse e i tuoi capi - si prendono la maggior parte del merito che spetterebbe a te. Di solito quando parliamo di "ricerca del successo" ci riferiamo a qualcosa di cui tutti noi facciamo parte e che allo stesso tempo però odiamo. Allora per quale motivo continuiamo questa ricerca? Perché la vita della maggior parte di noi è dominata dalla paura della disapprovazione della società. Buona lettura o buon ascolto.

Robert Kiyosaki's new book 8 Lessons in Leadership draws from his years at the Merchant Marine Academy at Kings Point and his service in the United Sates Marine Corps. With compelling stories and examples and a engaging way of comparing and contrasting two very different cultures and value systems, Robert shares the challenges he faced in transitioning to civilian lifehellipwhere chain of command and team-oversight and black and white--were muddy and distorted. "Permission to speak freely, sir?" Count on it. This is Robert Kiyosaki--and he does just that, in the forthright and no-nonsense style that readers have come to expect and appreciate. From Robert's perspective, military training shapes lives and supports entrepreneurship. The training, discipline, and leadership skills taught in the military can be leveraged for huge success in the civilian world of business. Highlights of 8 Lessons in Leadership include sections on Mission and Team, Discipline, Respect, Authority, Speed, the Power of Connectivity, Leaders as Teachers, Sales and Leadership.

10TH ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401k match. Why the guru's grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

The U.S. government, complicit with the well-connected corporations, since the so-called Civil War, continues to wage war and destruction. Lincoln's revolutionary war, supported by Marx and Engels, caused at least 618,222 and perhaps as many as 700,000 deaths, including about 50,000 Confederate civilians. Soldiers who were fighting, dying and killing during that war were in training for future wars. If Americans could kill fellow citizens, then they would use force against foreign citizens, in behalf of the government. That war foreshadowed the devastating Wars, Korea, Vietnam, the First Gulf War and the current wars in the Middle East. They do not include the bombings in the Baltic and elsewhere of the CIA's covert warfare wherein millions of people died. In the First World War, soldiers killed 9,911,000 people in action, and wounded 21,219,500 people, while 7,750,000 people were missing in action for a total of 38, 880,500. In the Second World War, there were over 24,000,000 military deaths and 49,000,000 civilian deaths totaling 73,000,000 deaths, not including the number of wounded or missing. That a best-selling author, neuroscientist, and computer engineer unveils a theory of intelligence that will revolutionize our understanding of the brain and the future of AI For all of neuroscience's advances, we've made little progress on its biggest question: How do simple cells in the brain create intelligence? Jeff Hawkins and his team discovered that the brain uses maplike structures to build a model of the world—not just one model, but hundreds of thousands of models of everything we know. This discovery allows Hawkins to answer important questions about level thought. A Thousand Brains heralds a revolution in the understanding of intelligence. It is a big-think book, in every sense of the word. One of the Financial Times' Best Books of 2021 One of Bill Gates' Five Favorite Books of 2021
