The European Union (EU) aims to put Europe on track toward a low-carbon economy. In this striking challenge, the EU Emissions Trading System (EU ETS) has been singled out as the Union's key climate policy instrument, ultimately aimed as a model for a global carbon market. The learning effect of the EU ETS could thus be tremendous. This study explores how the EU ETS actually works on the ground, affecting corporate climate strategies. It

covers general sector responses as well as systematic comparative studies of companies across the sectors. The latter enables improved understanding of causal effects and the role of interaction between different policy instruments and other factors that impact corporate climate strategies. The study explores a broad set of mechanisms at play potentially linking the EU ETS to company climate strategies. These include how corporate norms of responsibility are affected by the EU ETS and how economic incentives provide opportunities for innovation. The book's main

contribution lies in its systematic examination of corporate responses to the EU ETS from a broad empirical and analytical social science perspective covering companies in all main EU ETS sectors: electric power, oil, cement, steel and pulp and paper.

In order to make the criminal court system more effective there has been a growing trend to have courts participate in what is

essentially a rehabilitation strategy. Such courts are often referred to as “problem-solving” because they are working on root causes of criminal behavior as part of the dispensation of justice. This major shift in the role of the courts means that the court works closely with prosecutors, public defenders, probation officers, social workers, and other justice system partners to develop a strategy that pressures offenders to complete a treatment program which will ultimately, hopefully prevent recidivism. Research has shown that this kind of strategy has a two-fold benefit. It has been successful in helping offenders turn their lives around which leads to improved public safety and the ultimate saving of public funds. This book is the first to focus exclusively on problem solving courts, and as such it presents an overview of the rationale and scientific

evidence for such courts as well as individual sections on the key areas in which these courts are active. Thus there is specific attention paid to domestic violence, juvenile criminality, mental health, and more. Throughout, research findings are incorporated into general discussions of these courts operate and ideally what they are trying to accomplish. There is also discussion of how such courts should evolve in the future and the directions that further research should take.

The world needs a new economy. In spite of tremendous and growing material prosperity, inequality is on the rise and the current organization of the Earth's natural resources has failed to address the basic human needs of

billions of people. This book exposes the bottlenecks of the present path of economic growth and discusses the main path to alternatives. In spite of undeniable advances, all evidence points towards the growing depletion of the very ecosystems that societies depend on. A scientific publication system needs

Download Free Paper Book Intensive 2011

to provide two basic services: access and evaluation. The traditional publication system restricts the access to papers by requiring payment, and it restricts the evaluation of papers by relying on just 2-4 pre-publication peer reviews and by keeping the reviews secret. As a result, the current system suffers from a lack of quality and transparency of the peer-review evaluation process, and the only immediately available indication of a

Download Free Paper Book Intensive 2011

new paper's quality is the prestige of the journal it appeared in. Open access is now widely accepted as desirable and is slowly beginning to become a reality. However, the second essential element, evaluation, has received less attention. Open evaluation, an ongoing post-publication process of transparent peer review and rating of papers, promises to address the problems of the current system. However, it is unclear how exactly such a system should be

Download Free Paper Book Intensive 2011

designed. The evaluation system steers the attention of the scientific community and, thus, the very course of science. For better or worse, the most visible papers determine the direction of each field and guide funding and public policy decisions. Evaluation, therefore, is at the heart of the entire endeavor of science. As the number of scientific publications explodes, evaluation and selection will only gain importance. A grand challenge

Download Free Paper Book Intensive 2011

of our time, therefore, is to design the future system, by which we evaluate papers and decide which ones deserve broad attention. So far scientists have left the design of the evaluation process to journals and publishing companies. However, the steering mechanism of science should be designed by scientists. The cognitive, computational, and brain sciences are best prepared to take on this task, which will involve social and

Download Free Paper Book Intensive 2011

psychological considerations, software design, and modeling of the network of scientific papers and their interrelationships. This Research Topic in Frontiers in Computational Neuroscience collects visions for a future system of open evaluation. Because critical arguments about the current system abound, these papers will focus on constructive ideas and comprehensive designs for open evaluation systems. Design decisions

Download Free Paper Book Intensive 2011

include: Should the reviews and ratings be entirely transparent, or should some aspects be kept secret? Should other information, such as paper downloads be included in the evaluation? How can scientific objectivity be strengthened and political motivations weakened in the future system? Should the system include signed and authenticated reviews and ratings? Should the evaluation be an ongoing process, such that promising papers are more deeply

Download Free Paper Book Intensive 2011

evaluated? How can we bring science and statistics to the evaluation process (e.g. should rating averages come with error bars)? How should the evaluative information about each paper (e.g. peer ratings) be combined to prioritize the literature? Should different individuals and organizations be able to define their own evaluation formulae (e.g. weighting ratings according to different criteria)? How can we efficiently transition toward the

future system? Ideally, the future system will derive its authority from a scientific literature on community-based open evaluation. We hope that these papers will provide a starting point.

This Revised Reprint of our 8th edition, the "gold standard" in community health nursing, Public Health Nursing: Population-Centered Health Care in the Community, has been updated with a new Quality and Safety Education in Nursing (QSEN) appendix that features examples of incorporating knowledge, skills, and attitudes to improve quality

and safety in community/public health nursing practice. As with the previous version, this text provides comprehensive and up-to-date content to keep you at the forefront of the ever-changing community health climate and prepare you for an effective nursing career. In addition to concepts and interventions for individuals, families, and communities, this text also incorporates real-life applications of the public nurse's role, Healthy People 2020 initiatives, new chapters on forensics and genomics, plus timely coverage of disaster management and important client populations such as pregnant teens, the homeless, immigrants, and

more. Evidence-Based Practice boxes illustrate how the latest research findings apply to public/community health nursing. Separate chapters on disease outbreak investigation and disaster management describe the nurse's role in surveilling public health and managing these types of threats to public health. Separate unit on the public/community health nurse's role describes the different functions of the public/community health nurse within the community. Levels of Prevention boxes show how community/public health nurses deliver health care interventions at the primary, secondary, and tertiary levels of prevention. What Do You Think?, Did You

Know?, and How To? boxes use practical examples and critical thinking exercises to illustrate chapter content. The Cutting Edge highlights significant issues and new approaches to community-oriented nursing practice. Practice Application provides case studies with critical thinking questions. Separate chapters on community health initiatives thoroughly describe different approaches to promoting health among populations. Appendixes offer additional resources and key information, such as screening and assessment tools and clinical practice guidelines. NEW! Quality and Safety Education in Nursing (QSEN) appendix features examples of

incorporating knowledge, skills, and attitudes to improve quality and safety in community/public health nursing practice. NEW! Linking Content to Practice boxes provide real-life applications for chapter content. NEW! Healthy People 2020 feature boxes highlight the goals and objectives for promoting health and wellness over the next decade. NEW! Forensic Nursing in the Community chapter focuses on the unique role of forensic nurses in public health and safety, interpersonal violence, mass violence, and disasters. NEW! Genomics in Public Health Nursing chapter includes a history of genetics and genomics and their impact on

public/community health nursing care.

on recent experiences carried out in Italy (2011-2015) in the fields of research assessment, peer review, journal classification, and construction of indicators, and presents a systematic review of theoretical issues influencing the evaluation of Social Sciences and Humanities. Several chapters analyse original data made available through research assessment exercises. Other chapters are the result of dedicated and independent research carried out in 2014-2015 aimed at addressing some of the debated and open issues, for example in the evaluation of books, the use of Library Catalog Analysis or Google Scholar, the definition of research quality criteria on internationalization, as well as opening the way to innovative indicators. The book is therefore a timely and important contribution to the

The Regulation of the Legal Profession in Ireland is a new and insightful exploration of history, controversy and reform relating to the Irish legal system. During recent legislative debate over a professional reform bill, Alan Shatter--then the Minister of Justice in Ireland--publicly called this study, in its earlier form as a dissertation, "marvellous," and stated that it "should be compulsory reading for us all." He noted that the thesis "sets out the history of the legal profession and how it evolved. It evolved continually until approximately 1870 and then went into paralysis and nothing has changed since. ... It is extraordinarily curious that people think the world stopped in 1870." Professor Laurent Pech, formerly of the School of Law at NUI Galway and now Head of the Law Department at

Middlesex University London, has stated that this study "makes a decisive contribution to the on-going scholarly and policy debates on this issue, by evaluating the present regulatory framework and offering a number of suggestions to improve it in a context of increasing transnationalisation of the market for legal services." He added that Hosier's "innovative approach to the problem of lawyers' misconduct is, in particular, worth noting. This aspect of her work has the potential to help alleviate a problem which has been extremely costly for both the legal profession and wider society alike. Her doctoral research also provides a valuable insight into the impact of the Troika upon the regulation of the legal profession in so-called 'bailed-out countries.'" Professor Pech concluded that the author "should be congratulated for

having made an exceptional contribution to the current debate on the regulation of the legal profession both nationally and internationally. I have no doubt that her original and thought-provoking work will be useful to policy-makers and scholars alike." This book features Professor John Flood's new, substantive introduction, explaining the worldwide implications of professional reform efforts, the financial crisis that precipitated them, and the relation to regulation of the legal profession in other countries. It also includes the author's notable examination of the effect of the Troika's bailout conditions on law reform possibilities in Ireland. This part of the book was presented in the US at the 2013 annual conference of the Law and Society Association. Finally, the book adds a section on 2014 developments in

reform efforts in Ireland. A powerful new addition to the Dissertation Series from Quid Pro Books.

'A valuable corrective to the fraying narrative of [African] failure.' Foreign Affairs Not so long ago, Africa was being described as the hopeless continent. Recently, though, talk has turned to Africa rising, with enthusiastic voices

exclaiming the potential for economic growth across many of its countries. What, then, is the truth behind Africa's growth, or lack of it? In this provocative book, Morten Jerven fundamentally reframes the debate, challenging mainstream accounts of African economic history. Whilst for the past two decades experts have focused on explaining why there has been a 'chronic failure of growth' in Africa, Jerven shows that most African economies have been growing at a rapid pace since the mid nineties. In addition, African economies grew rapidly in the fifties, the sixties, and even into the seventies. Thus, African states were dismissed as incapable of development based largely on observations made during the 1980s and early 1990s. The result has been misguided analysis, and few practical

lessons learned. This is an essential account of the real impact economic growth has had on Africa, and what it means for the continent's future.

From a cutting-edge cultural commentator, a bold and brilliant challenge to cherished notions of the Internet as the great leveler of our age The Internet has been hailed as an unprecedented democratizing force, a place where everyone can be heard and all can participate equally. But

Download Free Paper Book Intensive 2011

how true is this claim? In a seminal dismantling of technoutopian visions, *The People's Platform* argues that for all that we "tweet" and "like" and "share," the Internet in fact reflects and amplifies real-world inequities at least as much as it ameliorates them. Online, just as off-line, attention and influence largely accrue to those who already have plenty of both. What we have seen so far, Astra Taylor says, has been not a revolution but a rearrangement. Although Silicon Valley tycoons have eclipsed Hollywood moguls, a handful of giants like Amazon, Apple, Google, and Facebook remain the gatekeepers. And the worst habits of the old media model—the pressure to seek easy celebrity, to be quick and sensational above all—have proliferated on the web, where "aggregating" the work of others is the

Download Free Paper Book Intensive 2011

surest way to attract eyeballs and ad revenue. When culture is "free," creative work has diminishing value and advertising fuels the system. The new order looks suspiciously like the old one. We can do better, Taylor insists. The online world does offer a unique opportunity, but a democratic culture that supports diverse voices and work of lasting value will not spring up from technology alone. If we want the Internet to truly be a people's platform, we will have to make it so.
