

## Paper Jewels Making

Any paper can be upcycled into a variety of shapes and sizes of paper beads that can be used to make colorful, unique pieces of jewelry that no one would guess are made from paper. Fashioned from thin strips of paper and painted in a variety of ways, the beads you make can then be used to make elegant drop earrings, beaded necklaces, and bracelets. "The buzz...is real. I've read it and was blown away. It's a true nerve-shredder that keeps its mind-blowing secrets to the very end." —Stephen King

Catriona Ward's The Last House on Needless Street is a shocking and immersive read perfect for fans of Gone Girl and The Haunting of Hill House.
In a boarded-up house on a dead-end street at the edge of the wild Washington woods lives a family of three. A teenage girl who isn't allowed outside, not after last time. A man who drinks alone in front of his TV, trying to ignore the gaps in his memory. And a house cat who loves napping and reading the Bible. An unspeakable secret binds them together, but when a new neighbor moves in next door, what is buried out among the birch trees may come back to haunt them all.
"The new face of literary dark fiction." —Sarah Pinborough

This book shows how creative maths can really work. Exploring the ways in which maths skills can be learned through cross-curricular activities based on visual arts and music, the book presents maths as a phenomenal and exciting subject which holds no fears for children. The authors recognise that while maths-phobia prevails in our increasingly mathematicised world, attitudes and approaches to teaching the subject need to be reviewed, and issues such as gender stereotyping, which encourage maths-aphaty, need to be tackled at an early stage. Within this collection of classroom-based stories are detailed examples of integrative mathematic projects; these will give teachers the confidence to try out cross-curricular activities in their classes. The book also provides support with difficult areas such as assessment, planning and development. Fascinating to read in its own right this book will appeal to the specialist and non-specialist alike.

Presents the basic principles and tools of paper craft and provides detailed instructions for twenty art projects.

*Start Your Own Handmade Jewellery Business From Home If you're a jewelry designer or wanting to be, you'll know that inspiration strikes at the strangest of times. Art is a big part of designing jewelry, so understanding a lot of important concepts about beauty and symmetry is also essential in creating a memorable and lasting piece. When it comes to designing jewelry, many current jewelers say it comes from both the heart and the mind. This combined with the market you want to hit and how you want people to buy your jewelry, are important things to consider as well. In order to come up with a lasting and impressionable jewelry design, there are a few key things every potential or working jewelry designer must consider. Research Art and Design; Spend a Lot of Time Doing So In order to understand the concepts of art, you have to make a personal investment in figuring out how different elements interact. Color theory, perception and variation are three major components that are touched on with great designs. Talk to a Local Expert or Craft Store If you're lacking inspiration for designs, head in to the local craft store. Take a look around at all the different materials they offer and try to picture combinations in your head that would be appealing to you and perhaps to other people as well. Never Stop Drawing or Trying to Come Up with Ideas Even if you feel like you're at the end of your rope, try and try again. Buy yourself a good sketchbook and package of all the utensils you'll need to create the designs on paper, before you decide to spend money on the materials. Create a Space Your Comfortable With Designing cannot be something that faces constant distractions. Often you need to be fully focused in order to convey an idea on paper. Create a comfortable and enjoyable atmosphere that you can use to design and create pieces, which will have edge and flair.
