**This book constitutes the thoroughly refereed post-conference proceedings of the 21st International Workshop on Job Scheduling Strategies for Parallel Processing, JSSPP 2017, held in Orlando, FL, USA, in June 2017. The 10 revised full papers presented in this book were carefully reviewed and selected from 20 submissions. The papers cover topics in the fields of design and evaluation of new scheduling**

approaches; performance evaluation of scheduling approaches; workloads; consideration of additional constraints in scheduling systems; scaling and composition of very large scheduling systems; cloud provider issues; interaction between schedulers on different levels; interaction between applications/workloads; experience reports from production systems or large scale compute campaigns.

The idea of a right to privacy, which arose in reaction to the rapid rise of newspapers, instant photography and the "paparazzi" of the 19th century, has evolved into a constitutional right in much of the developed world. It is enshrined in Hong Kong through Articles 28, 29, 30 and 39 of the Basic Law. Hong Kong stands proud as the first jurisdiction in Asia to enact legislation to safeguard personal data in the form of the Personal Data (Privacy) Ordinance, Cap 486 ("the Ordinance") which came into force in 1996. At its centre are the six Data Protection Principles based on the 1980 OECD Guidelines. The office of the Privacy Commissioner for Personal Data

was created under this legislation to provide oversight and ensure compliance. The Octopus scandal in mid-2010 eventually led to substantial changes being made to the Ordinance that were enacted in 2012 and 2013, the main amendments being the Direct Marketing provisions and the provision of legal assistance and representation to aggrieved persons. In this digital age, the Ordinance is proving to be the main safeguard of our privacy rights. The Data Protection Principles seek to create broad common principles based on fairness that apply to the public and private sectors. The passage of twenty years since the enactment of the Ordinance has given rise to a substantial body of case law and administrative decisions on these principles and the other provisions of the Ordinance. The new amendments have already been the subject of judicial scrutiny. This publication, which replaces its predecessor, has the dual aim of becoming a practitioner's guide on the important subject of personal data privacy, containing, as it does, a detailed exposition of the principles

and provisions in the Ordinance and a comprehensive source of reference materials, and of enabling the Privacy Commissioner to discharge his major duty to promote awareness and understanding of the Ordinance. The second edition includes not only a full discussion of these principles, but also summaries of all the seminal cases and Administrative Appeals Board rulings in this area, as well as a comprehensive list of all the pertinent cases.

The pressure is on during the interview process but with the right preparation, you can walk away with your dream job. This classic book uncovers what interviews are really like at America's top software and computer companies and provides you with the tools to succeed in any situation. The authors take you step-by-step through new problems and complex brainteasers they were asked during recent technical interviews. 50 interview scenarios are presented along with in-depth analysis of the possible solutions. The problem-solving process is clearly illustrated so you'll be able to easily apply what you've

learned during crunch time. You'll also find expert tips on what questions to ask, how to approach a problem, and how to recover if you become stuck. All of this will help you ace the interview and get the job you want. What you will learn from this book

Tips for effectively completing the job application

Ways to prepare for the entire programming interview process

How to find the kind of programming job that fits you best

Strategies for choosing a solution and what your approach says about you

How to improve your interviewing skills so that you can respond to any question or situation

Techniques for solving knowledge-based problems, logic puzzles, and programming problems

Who this book is for

This book is for programmers and developers applying for jobs in the software industry or in IT departments of major corporations.

Wrox Beginning guides are crafted to make learning programming languages and technologies easier than you think, providing a structured, tutorial format that will guide you through all the techniques involved.

Correctional Mental Health is a broad-based, balanced guide for students who are learning to treat criminal offenders in a correctional mental health practice. Featuring a wide selection of readings, this edited text offers a thorough grounding in theory, current research, professional practice, and clinical experience. It emphasizes a biopsychosocial approach to caring for the estimated 20% of all U.S. prisoners who have a serious mental disorder. Providing a balance between theoretical and practical perspectives throughout, the text also provides readers with a big-picture framework for assessing current correctional mental health and criminal justice issues, offering clear strategies for addressing these challenges.

Careers in the media have always been popular, but publishing is particularly competitive, with thousands of graduates trying to get a foot in the door. This targeted, practical guide is ideal for anyone who wants to work in publishing, whether on traditional books and magazines or online publications. It will help readers to get that all-

them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site *The Professor is In*, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including:

- When, where, and what to publish
- Writing a foolproof grant application
- Cultivating references and crafting

Tutoring today is a \$4 billion industry (yes—billion) with companies like Sylvan Learning Center and Kaplan Tutoring cashing in. So, what are parents of today's overextended students to do? Top professional tutor Marina Koestler Ruben empowers you to take a do-it-yourself approach to your child's after-school

enrichment. As a parent-tutor, you will learn how provide holistic academic support for your children and create an intellectual environment in the home—strengthening your relationship and improving parent-child communication in the process. Ruben’s accessible guide shows you how to balance big-picture curiosity with the academic nitty-gritties of homework assignments, organization, and electronic resources. Building on her proven “Six-Step Session” format, Ruben shares the secrets to tutoring children in any subject from kindergarten through high school—all with a warm, entertaining tone that will inspire you to inspire them.

A practical guide for graduating anthropology students on how to present their anthropological knowledge, skills, and abilities to employers to begin a career. Businesses worldwide are faced with major challenges related to the progressive (and many times unavoidable) incorporation of information technologies into their processes. Often, organizations don’t suitably react to the new requirements of these technologies, resulting in outdated policies, practices, and strategies. *Human Resource Management in the Digital Economy: Creating Synergy between Competency Models and Information* is a reference for both practitioners and academics that demonstrates how to implement e-management and competency models in companies. This book offers perspectives on the impact of integrated e-human resource policies and provides recommendations for addressing the shift from traditional human resource policies to new

perspectives.

Revised Tutorial Lectures

**The 23rd EUROCALL conference was organised by the Cyprus University of Technology Language Centre. The theme of the conference was “CALL communities and Culture”. Between the 24th and 27th August 2016, over 135 presentations were delivered and 27 posters were presented; 84 of these presentations appear in this volume of selected peer-reviewed short papers.**

**This book presents revised versions of tutorial lectures given at the IEEE/CS symposium on modeling, analysis, and simulation of computer and telecommunication systems held in Orlando, FL, USA in October 2003. The lectures are grouped in three parts on performance and QoS of modern wired and wireless networks, current advances in performance modeling and simulation, and other specific applications of these methodologies. This tutorial book is targeted to both practitioners and researchers. The practitioner will benefit from numerous pointers to performance and QoS issues; the pedagogical style and plenty of references can be of great use in solving practical problems. The researcher and advanced student are offered a representative set of topics not only**

**for their research value but also for their novelty and use in identifying areas of active research.**

**This Job Application Tracker, organizer is a perfect way to stay organized with your job search. When you're going through the job hunting process, it's important to be prepared and have all your information in one place. The interior includes prompts and space to record the following: Company - Write the name of the company, contact, their position, phone, email and notes. Position - Record the position you are applying for. Found On - Log where you found the opportunity. Agency - Did you go through an agency or recruiter? Direct - Did you find them directly yourself? Salary - Write the salary they offer. Applied On - Record the date you put in your application. Location - Log the location. Commute Time - Write the commute time for you. Notes - Blank lined space for writing any additional important information you want such as whether you had an interview, how it went, how long your unemployment has been, how long you've been looking for a job, interviews coming up, etc. Also makes a great gift. Size is 8.5x11, soft matte finish cover, 100 pages, black ink, white paper, paperback.**

## **Creating Synergy between Competency Models and Information**

### **Resources in Vocational Education**

***This thesis explores the economics of online labor markets. The first paper evaluates a market intervention that sought to improve efficiency within the world's largest online labor market. The second paper provides an illustration of how online labor markets can serve as a platform for helping researchers study economic questions using natural field experiments. The third paper examines the role of supervision within a firm using detailed productivity data. In the first paper, we report the results of an experiment that increased job application costs in an online labor market. More specifically, we made it costlier to apply to jobs by adding required questions to job applications that were designed to elicit high-bandwidth information about workers. Our experimental design allows us to separate the effect of a costly ordeal vs. the role of information by randomizing whether employers see workers' answers. We find that our ordeal reduced the number of applicants by as much as 29% and reduced hires by as much as 3.6%. Overall, the applicant pool that underwent the ordeal had higher earnings and hourly wages, but not better past job performance. The ordeal also discouraged non-North American workers. We find no evidence that employers spent more***

***when vacancies were filled, but some evidence that employer satisfaction improved. These improvements were the result of information provision rather than selection. Finally, we did not find any heterogeneity in outcomes across job category, contract types, or employer experience. In the second paper, we conduct the first natural field experiment to explore the relationship between the "meaningfulness" of a task and worker effort. We employed over 2,500 workers from Amazon's Mechanical Turk (MTurk), an online labor market, to label medical images. Although given an identical task, we experimentally manipulated how the task was framed. Subjects in the meaningful treatment were told that they were labeling tumor cells in order to assist medical researchers, subjects in the zero-context condition (the control group) were not told the purpose of the task, and, in stark contrast, subjects in the shredded treatment were not given context and were additionally told that their work would be discarded. We found that when a task was framed more meaningfully, workers were more likely to participate. We also found that the meaningful treatment increased the quantity of output (with an insignificant change in quality) while the shredded treatment decreased the quality of output (with no change in quantity). We believe these results will generalize to other short-term labor markets. Our study also***

***discusses MTurk as an exciting platform for running natural field experiments in economics. In the third paper, we investigate whether greater supervision translates into higher quality work. We analyze data from a firm that supplies answers for one of the most popular question-and-answer ("Q&A") websites in the world. As a result of the firm's staffing process, the assignment of supervisors to workers is as good as random, and workers are exposed to supervisors who put forth varying degrees of "effort" (a measure based on a supervisor's propensity to correct work). Using this exogenous variation, we estimate the net effect of greater supervision and find that a one-standard-deviation increase in supervisor effort reduces the number of bad answers by between four and six percent. By decomposing the total effect into the separate effects on corrected and uncorrected answers, we conclude that supervisor effort tends to lower the number of good answers among uncorrected answers. Interestingly, observable worker behaviors (i.e., answer length and time to answer a question) seemed unaffected by supervision. None of the results vary with worker experience. This book will help those who are struggling with Life's demands. It will show the reader how to accomplish their purpose in this demanding fast pace of events that we all face time-to-time.
