

Paper Plate Clock Face Template

Filled with materials and activities to be photocopied, this volume is an essential tool for any preschool teacher.

While much research has been done on experiential learning opportunities in study abroad settings, there are fewer publications devoted to experiential learning in the domestic context. This volume aims to fill that gap by providing a collection of chapters highlighting research-based innovations in experiential learning in domestic settings. The book focuses on three experiential learning contexts: community engagement experiences, professional engagement experiences and other unique experiential contexts such as language camps and houses. The collection focuses on the US context but the research projects and curricular innovations described here can serve as models for educators working in other local contexts and will encourage interested practitioners to explore experiential learning opportunities in their local areas. It will also provide the reader with a better understanding of this growing field of inquiry and should appeal to graduate students and researchers who are interested in experiential language learning.

50 Fantastic Ideas for Circle Time

Hands-On Mathematics, Grade 2

Circle time stimulates learning in all areas of development – from the improvement of social skills and positive relationships to encouraging children to listen to each other within a caring and respectful environment. Judith Harries brings together creative ideas for circle time where learning can be shared and music and drama can be enjoyed. The book includes circle time activities and games that cover all of the Early Learning Goals through the sharing of thoughts, feelings and experiences. It can also be used across the curriculum, including helping children with literacy and mathematics through phonics and number games. This timeless collection of ideas featuring colourful and fun photography is a fantastic resource with many new activities for circle time, as well as some old favourites.

Bringing German to Life provides an innovative and refreshing cross-curricular approach to teaching languages in primary schools, combining art, design and foreign languages with various aspects of the National Primary Curriculum such as Literacy, Numeracy and PE. This unique practical resource comprises an engaging storyline about a day in the life of two German children and gives an opportunity for learners to re-enact their day, using finger puppets, handmade crafts and exciting games to practise new language. Each of the 14 sections begins with a short accessible dialogue in German and is followed by suggestions for using the new vocabulary in pairs, small groups or as a whole class. The main story is accompanied by fun craft activities linked to the story (one for each section, ie 14 in total) for children to create in class using the templates and instructions provided. A wide range of further activities follows, consisting of lively games, songs and opportunities to communicate

simple ideas. Language extensions are suggested, focussing on imaginative writing and reading ideas linked to the theme of each section. Written to support the new foreign languages programme of study, the book also includes: * Cross-curricular links to numerous subjects including Literacy, Numeracy, PE and ICT * Classroom games and activities * Photocopiable resources and templates for fun classroom activities and projects * Language extension activities. Bringing German to Life can be read on three levels to suit a variety of classroom situations. First, the story can be told 'straight' with the whole class participating in the dialogues. Second, the story can be combined with the craft activities after each main section. 14 doing and making activities match the storyline and provide a colourful, eye-catching display and learning focus in the classroom or for Open Days or Assemblies. Teachers can use as many or as few as they wish. The resultant crafts can be used for very effective classroom displays/open days/assemblies etc. Finally, the language extension activities can be used alongside the art/craft/design activities as desired. The aim of these activities is to extend the target language in a relevant context through a variety of methods such as songs, playlets, simple communicative exchanges, games with numbers etc.

Time, is one book in the Britannica Discovery Library Series that is correlated to national curriculum standards. The Britannica Discovery Library is a charming, lavishly illustrated 12-volume set of "concepts and values" books specifically created for young learners ages three to six. Children are introduced to various texts and genres, including rhymes, narratives, puzzles, and riddles. Key vocabulary words are highlighted throughout and defined at the back of each book. The set is ideal for pre-readers and early readers as each volume contains activities to build language, critical thinking, and comprehension skills.

Everything You Need to Stitch, Sculpt, Bead and Build

An interactive spin-the-wheel and pull-the-tab book all about color. This adorable board book is filled with bright colors and interactive surprises for little hands. Will the rainbow chameleon blend in, or stand out? Spin the wheel and pull the tabs of this sturdy book to change the chameleon's colors. Rainbow Chameleon changes colors in order to hide from a snake, a wolf, and a crocodile. But sometimes he also has to change color in order to be noticed—especially when a new friend who he wants to impress enters the picture. This playful, hands-on journey features color dials and pull-tabs perfect for toddlers. The beautiful, lively illustrations and engaging story make for a book that kids will want to read again and again.

The purpose of this desk manual is to provide teachers with a variety of ideas for planning lessons and developing units. The 350 techniques presented can easily be modified and adapted for use with most grades.

Provides literature-based activities for teaching math to students in grades one through three, each with activities, reproducible patterns, and recording sheets.

The Special Educator's Tool Kit is an informative yet practical guide to help teachers and parents involved in educating children with Special Educational Needs. It is simple in its layout and practical in its approach. It is a working resource manual to support established lesson plans, existing syllabuses and ongoing research. The book takes the form of a Tool Kit to provide the reader with ideas to make the class room a place of learning, discovery and fun. The tools relate to ideas for planning, assessment, learning and activities to use in the classroom. This book aims to equip teachers and parents to understand the clinical, developmental and educational needs of special children so that they can create meaningful, measurable and unique learning experiences for them. It will also be of benefit to those involved in the training and supervision of mainstream and special needs teachers and medical professionals who provide care for these children and their families.

One of the areas of study students find most difficult to master--and are most fearful of--is math. Yet the core math skills acquired in the first four years of school form the basis of all future academic success. Get Ready for Standardized Tests, the first and only grade-specific test prep series, now features hands-on guidance on helping kids master the all-important basic math skills while arming parents with the tools they need to help their children succeed.

Introduces the principles of the metric system and their application in everyday situations.
