re-written and six new chapters added, with additional coverage of dietary effects of milk and meat, antibiotics in animal production, and the economic, political and ethical dimensions of meat consumption.

The overall message is clearly that we must eat less meat to help secure a more sustainable and equitable world.

China's agriculture and rural society has undergone rapid changes in recent years.

Many poorer farmers and younger people have moved to cities, and yet China has an immense challenge to feed a growing and more affluent population. This book provides a 'bottom-up view' of China's

development of China's agriculture from ancient times to the present day.

This shows the importance of balancing in the Chinese model as compared to the one-sided imposition of continual modernization in the western model. It is argued that such balancing is at the core of the current Sannong policy, referring to the

three ruralities of food sovereignty, wellbeing for peasant households and an attractive countryside.

Environmental and sustainable development concerns permeate numerous aspects of society, including economic activity.

Many countries now run their economies based on such sustainable
