

## Parents Guide To Raising A Gifted Child

**LEARN TO MEET THE NEEDS OF YOUR GIFTED CHILD** Though academic abilities have always been important in determining whether your child is gifted, talent in the visual or performing arts, leadership qualities, and intellectual curiosity are just as vital. But unless we as parents help nurture those talents, our gifted children can become bored, socially aggressive, or, ironically, underachievers in the classroom. Here is a practical, informative, and authoritative primer for raising and educating our gifted children from pre-school to adolescence. Beginning with sensible strategies to determine whether--and in which areas--your child is gifted, this book takes parents through selecting an appropriate day-care center, a school, and a home reference library. It helps us figure out where our role stops and the school's role begins, as well as detailing ways to keep our children's creativity alive and how to cope with sibling rivalry and our own doubts and fears. Also included are a recommended reading list, a special section on the roles of the computer and television in your gifted child's life, and much more.

A guide for parents to help children of all ages process the onslaught of unfiltered information in the digital age. Education is not solely about acquiring information and skills across subject areas, but also about understanding how and why we believe what we do. At a time when online media has created a virtual firehose of information and opinions, parents and teachers worry how students will interpret what they read and see. Amid the noise, it has become increasingly important to examine different perspectives with both curiosity and discernment. But how do parents teach these skills to their children? Drawing on more than twenty years' experience homeschooling and developing curricula, Julie Bogart offers practical tools to help children at every stage of development to grow in their ability to explore the world around them, examine how their loyalties and biases affect their beliefs, and generate fresh insight rather than simply recycling what they've been taught. Full of accessible stories and activities for children of all ages, *Raising Critical Thinkers* helps parents to nurture passionate learners with thoughtful minds and empathetic hearts.

Take coparenting to the next level and provide a stable environment for your children as you and your spouse begin tackling your separation or divorce. For parents who are separating and want to put their children first, birdnesting could be the interim custody solution you've been looking for. Instead of the children splitting their time being shuttled between mom and dad's separate homes, birdnesting allows the children to stay in the "nest" and instead, requires mom and dad to swap, allowing each parent to stay elsewhere when not with the children. Initially popularized by celebrities, this method of coparenting is now becoming more mainstream as a way to help ease children into a new family dynamic. Birdnesting takes work and commitment but with Dr. Ann Gold Buscho's guidance, you'll learn everything you need to know about this revolutionary method. In *The Parent's Guide to Birdnesting*, you will discover the pros and cons, the financial and interpersonal considerations, and if it's the right decision for you and your family.

A Parent's Guide to Changing the Messages from the Playground

The Rule Of 5

No matter who we are or where we come from, we all play on the same playground. There are certain collective societal messages we hear growing up that we either consciously or subconsciously believe. As a result, we develop certain belief systems from which we operate our lives. Raising LGBTQ Allies sheds light on the deeper, multi-faceted layers of homophobia. It opens up a conversation with parents around the possibility they may have an LGBTQ child, and shows how heteronormativity can be harmful if not addressed clearly and early. Although not every parent will have an LGBTQ child, their child will jump rope or play tag with a child who is LGBTQ. By showing readers the importance of having open and authentic conversations with children at a young age, Chris Tompkins walks parents through the many ways they can prevent new generations from adopting homophobic and transphobic beliefs, while helping them explore their own subconscious biases. Offering specific actions parents, family members, and caregivers can take to help navigate conversations, address heteronormativity, and challenge societal beliefs, Raising LGBTQ Allies serves as a guide to help normalize being LGBTQ from a young age. Creating allies and a world where closets don't exist happens one child at a time. And it begins with each of us and what we say, as much as what we choose not to say.

*Today millions of kids are stuck in a world that doesn't respect, support, or embrace who they really are—these are what Deborah Reber is calling the “differently wired” kids, the one in five children with ADHD, dyslexia, Asperger’s, giftedness, anxiety, sensory processing disorder, and other neurodifferences. Their challenges are many. But for the parents who love them, the challenges are just as hard—struggling to find the right school, the right therapist, the right parenting group while feeling isolated and harboring endless internal doubts about what’s normal, what’s not, and how to handle it all. On the one hand it’s a book of saying NO, and how it’s time to say no to trying to fit your round-peg kid into society’s square holes, no to educational and social systems that don’t respect your child, no to the anxiety and fear that keep parents stuck. And then it’s a book of YES. By offering 18 paradigm shifts—what she calls “tilts”— Reber shows how to change everything. How to “Get Out of Isolation and Connect.” “Stop Fighting Who Your Child Is and Lean In.” “Let Go of What Others Think.” “Create a World Where Your Child Can Feel Secure.” “Find Your People (and Ditch the Rest).” “Help Your Kids Embrace Self-Discovery.” And through these alternative ways of being, discover how to stay open, pay attention, and become an exceptional parent to your exceptional child.*

*In this inspiring book, Harvard-trained child and adult psychiatrist and expert in human motivation Dr. Shimi Kang provides a guide to the art and science of inspiring children to develop their own internal drive and a lifelong love of learning. Drawing on the latest neuroscience and behavioral research, Dr. Kang shows why pushy "tiger parents" and permissive "jellyfish parents" actually hinder self-motivation. She proposes a powerful new parenting model: the intelligent, joyful, playful, highly social dolphin. Dolphin parents focus on maintaining balance in their children's lives to gently yet authoritatively guide them toward lasting health, happiness, and success. As the medical director for Child and Youth Mental Health community programs in Vancouver, British Columbia, Dr. Kang has witnessed firsthand the consequences of parental pressure: anxiety disorders, high stress levels, suicides, and addictions. As the mother of three children and as the daughter of immigrant parents who struggled to give their children the "best" in life-Dr. Kang's mother could not read and her father taught her math while they drove around in his taxicab-Dr. Kang argues that often the simplest "benefits" we give our children are the most valuable. By trusting our deepest intuitions about what is best for our kids, we will in turn allow them to develop key dolphin traits to enable them to thrive in an increasingly complex world: adaptability, community-mindedness, creativity, and critical thinking. Life is a journey through ever-changing waters, and dolphin parents know that the most valuable help we can give our children is to assist them in developing their own inner compass. Combining irrefutable science with unforgettable real-life stories, The Dolphin Way walks readers through Dr. Kang's four-part method for cultivating self-motivation. The book makes a powerful case that we are not forced to choose between being permissive or controlling. The third option-the option that will prepare our kids for success in a future that will require adaptability-is the dolphin way.*

**Raising children is the most important responsibility we have. Are you doing all you can to be the best parent possible? Dr. Garrett Soldano has spent his entire adult life applying the Universal Laws to athletics and entrepreneurship. He now applies these same laws to successful parenting. Turning his efforts to creating a simple yet easy to understand guide for parents, he has outlined a clear path for setting a solid foundation of values for children. How many times do we see children follow their parents down the same road toward self-destruction falling prey to behaviors like alcoholism, drug abuse, eating disorders, self-esteem issues, relationship social difficulties or financial problems? Our children are a product of their environment. Therefore, as parents we must be a positive influence--not only in how we react to situations and events but also by monitoring ourselves constantly in everything that we do and don't do. With the wealth of knowledge available today there is no excuse to sit back and not take action against the debacle we are witnessing with our youth. In God's True Law, Dr. Garrett Soldano describes the definite science to being a successful parent. It is built upon a foundation of his life experiences growing up in poverty. The story begins with his two very young parents, completely raw in their skills, living in a trailer park and struggling to make ends meet, who still succeeded in pulling themselves up while providing their sons with all the prerequisites to move forward in life. Based on his experiences and observations, Dr. Soldano began to study, formalize, and apply the lessons of Universal Laws to parenting. The teachings in this revolutionary book, if applied correctly, will make sure parents' aspirations take root, legacies grow and family trees flourish for generations to come.**

Our search for answers has intensified. With so much information out there, many of us have become confused. Well fret no more. In this book, I outline simple actionable steps to keep your children protected from chronic disease and viral illnesses.**

**Parenting with Grace**

**Advice, Information, Inspiration, and Support for Raising Your Child from Diagnosis through Adulthood**

When children lose someone they love, life is never the same. In this sympathetic book, the authors advocate an open, honest approach, suggesting that our instinctive desire to "protect" children from the reality of death may be more harmful than helpful.

Laced with humor, practical examples, and thought-provoking quizzes, this updated second edition helps parents discover their own God-given instructional manual for creating a highly individualized, completely Catholic parenting plan for raising children.

From the author of the "hysterically funny and unsettlingly fascinating"\* New York Times bestseller *Unmentionable*, a hilarious illustrated guide to the secrets of Victorian child-rearing [\*Jenny Lawson] Feminist historian Therese Oneill is back, to educate you on what to expect when you're expecting . . . a Victorian baby!
