Physical Activity and Public Health Practice

Physical activity has far-reaching benefits for physical, mental, emotional, and social health and well-being for all segments of the population. Despite these documented health benefits and previous efforts to promote physical activity in the U.S. population, most Americans do not meet current public health guidelines for physical activity. Surveillance in public health is the ongoing systematic collection, analysis, and interpretation of outcome-specific data, which can then be used for planning, implementation and evaluation of public health practice. Surveillance of physical activity is a core public health function that is necessary for monitoring population engagement in physical activity, including participation in physical activity initiatives. Surveillance activities are guided by standard protocols and are used to establish baseline data and to track implementation and evaluation of interventions, programs, and policies that aim to increase physical activity. However, physical activity is challenging to assess because it is a complex and multidimensional behavior that varies by type, intensity, setting, motives, and environmental and social influences. The lack of surveillance systems to assess both physical activity behaviors (including walking) and physical activity environments (such as the walkability of communities) is a critical gap. Implementing Strategies to Enhance Public Health Surveillance of Physical Activity in the United States develops strategies that support the implementation of recommended actions to improve national physical activity surveillance. This report also examines and builds upon existing recommended actions.

Recreational facilities

"This study examined the economic effects of public park and recreation operations in Bismarck, Devils Lake, Dickinson, Grand Forks, Fargo, Jamestown, Mandan, Minot, Valley City, Wahpeton, West Fargo, Williston, and the North Dakota Parks and Recreation Department (NDPRD).

Participating park districts and NDPRD provided information on the number

and type of leagues, programs, sport events, facilities, and community activities that were affiliated with, sponsored by, or used park and recreation district or state park facilities. Data were collected by park and recreation districts and state park personnel at a sample of events, activities, programs, and facilities over the course of one year. Intercept surveys and on-line survey instruments were used to solicit information on local and in-state spending by state parks and park and recreation district programs, events, and facility participants, spectators, and visitors. Park and recreation districts provided data on the number of individuals that participated in various events, activities, programs, and facilities by sponsorship category."--Executive summary.

Roscoe's Bandits

Introduction to Recreation and Leisure, Third Edition, gives students a broad view of the field, offering them a solid foundation for understanding the industry they plan to enter upon graduation.

Students learn from the perspectives of 52 leading professors, professionals, and emerging scholars from the United States, Canada, Brazil, China, and around the globe. Led by new editors, Tyler Tapps and Mary Sara Wells, these experts introduce recreation and leisure foundational concepts, delivery systems, and programming services.

Students benefit from the diversity of perspectives and viewpoints from around the world as they learn about the similarities and differences in the industry from an international perspective. The following are new to this edition:

• New editors and contributors from around the world, including emerging scholars • Updated data throughout the book • New chapter sections • An expanded chapter on international perspectives on sustainability and ecotourism • Real-world connections to recreation and leisure theories that help students consider career options • A web study guide with On the Job learning activities, a glossary, chapter overviews, article summaries, and recommendations of websites to explore

A Strong Foundational Overview Introduction to Recreation and Leisure grounds students in the historical, philosophical, and social aspects of the industry. The authors offer fresh insights into community parks and recreation departments, nonprofit organizations, and commercial recreation and ecotourism enterprises. Students learn about various enriching educational programs and services for people of all ages. "The text encompasses a variety of services, including recreational sport management, outdoor and adventure recreation, health and wellness,

and arts and culture,” says Tapps. “It also exposes students to career options and supports them as they explore their interests and prepare for challenging careers in the industry.” **Text Contents** The book is organized into three parts. In part I, students learn about the foundations of recreation and leisure, including the historical, philosophical, and social issues that have shaped the field. Part II explores various sectors of the field, including leisure service delivery systems, public recreation, the nonprofit sector, the for-profit sector (such as event and ecotourism enterprises), and therapeutic recreation, among others. Part III focuses on the programming of recreation and leisure services, including program delivery systems, recreational sport management, outdoor and adventure recreation, the nature of recreation and leisure as a profession, and more. Each chapter includes learning objectives that highlight the chapter’s important concepts, as well as an Outstanding Graduates feature that introduces former students who have gone on to successful careers in the field. A glossary of important terms is included in the web study guide and instructor guide, which are part of the ancillary package.

Ancillaries The text is supported by an instructor guide, a test package, a PowerPoint presentation package, and a web study guide that contains chapter summaries and learning experiences. These resources make it easier for instructors to prepare for and manage their courses, and they help students retain what they learn from the text.

Guidance for Students Making Career Choices This fully updated text, with its insights and perspectives from top professionals and professors from around the globe, opens up the world of recreation and leisure for students, offering them vital information that will help them make informed choices as they move forward in pursuit of careers in this growing field. With its cutting-edge view of recreation and leisure services, *Introduction to Recreation and Leisure* prepares students for success in the field of recreation and leisure.

We Heart L.A. Parks

HeartMemo

Physical Activity in Public Health Practice provides the first evidence-based, practical textbook to guide readers through the process of conceptualizing, justifying, implementing, and evaluating physical activity interventions across a broad array of settings and populations. Section One begins with an overview of epidemiology, measurement, critical milestones, and the importance of moving beyond individual-level physical activity intervention, to interventions aimed at policy-, systems-, and environmental-level changes. Section Two considers

planning interventions across a variety of settings and populations, including general concepts for implementation and evaluation, how to build effective coalitions, steps for developing community-, regional- or state-level strategic plans, and effectively translating policy into practice. Section Three addresses how to implement physical activity strategies across a variety of settings, including worksites, faith-based settings, healthcare settings, schools, and parks and recreation. This section also provides guidance on the complexities and challenges of targeting interventions for specific populations, such as families, older adults, persons with disabilities, as well as different strategies for urban and rural populations. Lastly, Section Four outlines effective strategies for how to evaluate interventions depending upon impact, outcome, and cost evaluation, and dissemination models for your intervention. Presented from both a research and a practice perspective while discussing the best available research, this book provides the basis for planning and implementing physical activity programs that work and can build healthier communities. This hands-on text incorporates learning objectives, real-world examples, case studies, and bulleted lists whenever possible so that the content can be digested easily not only in undergraduate and graduate course settings but also by public health workers and other health educators in practice. Written by world experts and augmented by practical applications, this textbook prepares public health students and practitioners to develop effective interventions and spur greater physical activity in their communities. Key Features: Provides effective strategies for properly measuring and increasing physical activity in communities Demonstrates how to carry out physical activity interventions across a variety of settings, including schools, communities, worksites and many more Discusses methods for directing physical activity interventions to specific populations Delivers strategies for building successful partnerships and coalitions Practical group activities, exercises, discussion questions, audio podcast discussions, and a full instructor packet accompany the textbook

Library Collaborations and Community Partnerships illustrates the value of libraries and their resources through an array of alliances to improve health and enhance people's lives. It is unique in its illustration of key principles of collaboration, partner engagement, shared leadership, project development and outcomes measurement, as well as the challenges inherent in collaborations among diverse partners. The book includes collaboration exemplars

focused on education, health, information literacy and capacity building for populations that experience access and resource disparities. It highlights the innovative use of existing assets, environments and diverse professions to broaden access to resources and information to those in need. The strategies, challenges, outcomes and lessons learned that are described in the volume have application for a variety of settings and populations. Highlighting the key role that libraries play in guiding successful interprofessional collaborations with communities, Library Collaborations and Community Partnerships should be of interest to academics, students and professionals engaged in library and information science, education, health care, social services and community organizations.

Sneakers' ABCs of Park Activities

"This study was intended to provide a comprehensive assessment of the economic contribution of public park and recreation agency programs, sports leagues, community activities, and public facilities. The study examined the economic effects of public park and recreation operations in Bismarck, Devils Lake, Dickinson, Grand Forks, Fargo, Jamestown, Mandan, Minot, Valley City, Wahpeton, West Fargo, Williston, and the North Dakota Parks and Recreation Department (NDPRD). Information on the number and type of leagues, programs, sports events, facilities, and community activities were obtained for each of the 12 park districts, along with information on special events held at North Dakota's 13 state parks. The economic assessment of park district programs, events, and facilities and visitation at the North Dakota's state parks required estimating spending by participants, spectators, visitors, and vendors over a range of activities, locations, and dates throughout the year. A combination of intercept surveys and on-line survey instruments were used to solicit information on local and instate spending by participants and visitors. Park district and agency personnel administered the intercept surveys."--Executive summary.

A Directory

The City of Atlanta Park Department. Recreation Division

Public parks are vital resources to all of us as places for exploration, celebration, education, recreation, and activism. We Heart L.A. Parks celebrates these important sites by featuring more than 50 public parks within the city of Los Angeles with original illustrations, personal stories, and fun activities, including two colorful fold-outs: an L.A. parks map and an L.A. Park Adventures board game. It is a coloring and activity book for all ages by contributors of all ages -- elementary-school kids to veteran artists -- who, through their art and words, fill these pages with their deep love for the city of Los Angeles, with all its beauty and complexities, and the public parks and recreation areas as all treasure. From hiking trails and waterfalls, to basketball courts and barbecue pits, to historic architecture and park vendors -- We Heart L.A. Parks highlights the diversity of our city's open spaces and how urban wildlife and humans can share these spaces and

flourish. It is a truly unique and artful guide to the city that reminds us how safe and accessible public parks strengthen communities
