This Encyclopedia is the first to compile pseudonyms from all over the world, from all ages and occupations in a single work: some 500,000 pseudonyms of roughly 270,000 people are deciphered here. Besides pseudonyms in the narrower sense, initials, nick names, order names, birth and married names etc. are included. The volumes 1 to 9 list persons by their real names in alphabetical order. To make the unequivocal identification of a person easier, year and place of birth and death are provided where available, as are profession, nationality, the pseudonym under which the person was known, and finally, the sources used. The names of professions given in the source material have been translated into English especially for this encyclopaedia. In the second part, covering the volumes 10 to 16, the pseudonyms are listed alphabetically and the real names provided. Approx. 500,000 pseudonyms of about 270,000 persons First encyclopedia including pseudonyms from all over the world, all times and all occupations Essential research tool for anyone wishing to identify persons and names for his research within one single work

Though every year the Bible is the world's most popular, purchased, and translated book, the majority of people reading the Bible have never deeply studied it, and even among those who have, many still have numerous, lingering questions, such as: "Who wrote it?" "Is it historically reliable?""How were the books of the Bible selected?""Is it possible that some books are missing or that others will be added?""What is the over-arching storyline of the Bible and its primary message?""How do we study the Bible?""Why are there so many translations?""and "Which is the best translation?""The Bible's Uniqueness: An Introduction to Scripture answers these questions and more. In addition, strong apologetic evidence for the supernatural nature and absolute trustworthiness of Scripture is provided throughout-both to convince skeptics and increase the faith of believers. Let's learn about the Bible's uniqueness together with the Bible Teacher's Guide."The Bible Teacher's Guide ... will help any teacher study and get a better background for his/her Bible lessons. In addition, it will give direction and scope to teaching of the Word of God. Praise God for this contemporary introduction to the Word of God."-Dr. Elmer Towns; Co-founder of Liberty University

This completely new typeset of the monumental 1957 classic contains an extensive historical and theological introduction and detailed notations by George R. Knight, professor of church history at Andrews University.; Originally produced by the Ministerial Association of the General Conference of SDAs, Questions on Doctrine was widely acclaimed and heavily distributed in the late 1950s and early 1960s as a forthright answer to questions from evangelicals about key elements of Adventist doctrine. Controversy regarding the book's position on the nature of Christ and the atonment soon stopped its circulation.; Intended as a complete reference on the book itself, this new edition faithfully reproduces the original text of Questions on Doctrine, with in-text indicators of the original pagings. It includes later important documents that bring the work up to date. The original bibliography is followed by an updated selected bibliography.

Commentary on various historical or bibliographic topics is included in new footnotes throughout the text, all while preserving the reading integrity of the original edition.; George Knight's introductory essays provide the background for how the book came about and describe the interaction of the principal players involved in the dispute about a small section of content that shelved this classic work for more than a generation.; This new edition of Question on Doctrine beautifully preserves this outstanding and winsome work of Adventist apologetics to future generations of scholars, laypersons, and critics. It is an essential element of every Adventist library.

Here is an excellent resource for your Christian Education program. Daniel and Wade discuss the foundations of an effective Christian Education program, and tackle organizational and administrative issues involved with such a program. You will also find age specific information for all ages of learners. If you are a Christian Ed. Director, or a teacher who wants to better understand the elements of a C.E. program that will make a difference in the lives of the teachers and the students, this is the book for you.

The three neutrinos are ghostly elementary particles that exist all across the Universe. Though every second billions of them fly through us, they are extremely hard to detect. We used to think they had no mass, but recently discovered that in fact they have a tiny mass. The quest for the neutrino mass scale and mass ordering (specifying how the three masses are distributed) is an extremely exciting one, and will open the door towards new physics operating at energy scales we can only ever dream of reaching on Earth. This thesis explores the use of measurements of the Cosmic Microwave Background (the oldest light reaching us, a snapshot of the infant Universe) and maps of millions of galaxies to go after the neutrino mass scale and mass ordering. Neutrinos might teach us something about the mysterious dark energy powering the accelerated expansion of the Universe, or about cosmic inflation, which seeded the initial conditions for the Universe. Though extremely baffling, neutrinos are also an exceptionally exciting area of research, and cosmological observations promise to reveal a great deal about these elusive particles in the coming years.

This 1935 collection of Ellen G. White's admonitions is reprinted in the hope of arousing God's people to follow the divine blueprint of the medical work. The content of this book is briefly summarized in these two statements: "Loma Linda is to be not only a sanitarium, but an educational center. With the possession of this place comes the mighty responsibility of making the work of the institution educational in character. The school that is to be established at Loma Linda is to stand in the freedom of the truth." "Shall we represent before the world that our physicians must follow the pattern of the world, before they can be qualified to be successful physicians? This is the question that is now testing the faith of some of our brethren. Let not any of our brethren displease the Lord by a failure in their assemblies the idea that we need to obtain from unbelievers a higher education that that specified by the Lord."

The hit movie La Bamba (based on the life of Richie Valens), the versatile singer Linda Ronstadt, and the popular rock group Los Lobos all have roots in the dynamic music of the Mexican-American community in East Los Angeles. With the recent "Eastside Renaissance" in the area, barrio music has taken on symbolic power throughout the Southwest, yet its story has remained undocumented and virtually untold. In Barrio Rhythm, Steven Loza brings this hidden history to life, demonstrating the music's essential role in the cultural development of East Los Angeles and its influence on mainstream popular culture. Drawing from oral histories and other primary sources, as well as from appropriate representative songs, Loza provides a historical overview of the music from the nineteenth century to the present and offers in-depth profiles of nine Mexican-American artists, groups, and entrepreneurs in Southern California from the post-World War II era to the present. His interviews with many of today's most influential barrio musicians, including members of Los Lobos, Eddie Cano, Lalo Guerrero, and Willie chronicle the cultural forces active in this complex urban community.

Presents a fictional account of the tragic lives of Maximilian and Carlota, the short-lived Emperor and Empress of Mexico, and explores the events that first appointed the couple and then swiftly removed them from power.

Symposium on Revelation

Noted New Testament scholar Poythress provides an understandable and practical look into Revelation in this insightful commentary. Poythress focuses on Revelation's core message and ensures that its details do not cloud the big picture. He shows Revelation to be a picture book, not a puzzle book, relevant and applicable to the daily lives of Christians.

Should women teach men? Should they exercise authority over men? What about ordaining women? Even those who agree that Scripture must determine our answers do not agree on what it teaches. And too often differing sides have not been willing to listen to one another. Here in ove volume are the views of four deeply committed evangelicals that focus the discussion on the issues. Robert Culver argues for what might be called the traditional view that women should not exercise authority over or teach men. Susan Foh suggests a modified view which would allow for women to teach but not to hold positions of authority. Walter Liefeld presents a case for plural ministry that questions ordination as a means of conferring authority. Alvera Mickelsen defends the full equality of men and women in the church. What makes this book especially helpful is that the writers all respond to the other essays, pointing out weaknesses and hidden assumptions.

The latest edition of this handbook provides answers to questions on astronomy and the universe and contains the answers to ten new questions. DeYoung explains how astronomy tells much about God's vast creation and His daily care for us.

Perfected science is but an idealization that provides a useful contrast to highlight the limited character of what we do and can attain. This lies at the core of various debates in the philosophy of science and Rescher's discussion focuses on the question: how far could science go in principle—what are the theoretical limits on science? He concentrates on what science can discover, not what it should discover. He explores in detail the existence of limits or limitations on scientific inquiry, especially those that, in principle, preclude the full realization of the aims of science, as opposed to those that relate to economic obstacles to scientific progress. Rescher also places his argument within the politics of the day, where "strident calls of ideological extremes surround us," ranging from the exaggeration that "science can do anything"—to the antiscientism that views science as a costly diversion we would be well advised to abandon. Rescher offers a middle path between these two extremes and provides an appreciation of the actual powers and limitations of science, not only to philosophers of science but also to a larger, less specialized audience.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The Biblical Foundation for the Best-selling Left Behind Series . . . In the twinkling of an eye, millions of people across the world vanish, resulting in highway catastrophes, plane crashes, utility breakdowns, and more. Chaos reigns. With the stage set, a dictator emerges who persecutes Christians horribly. But tribulation is about to give way to incredible joy -- for the return of the King of Kings is at hand. In Revelation Unveiled, Dr. Tim LaHaye, co-author with Jerry Jenkins of the best-selling novels Left Behind and Tribulation Force, reveals the scriptural foundation of this series. Revelation Unveiled explains such critical topics as: - The rapture of the church - The Return of Christ - The Great Tribulation - The Final Battle against Satan and His Hosts - The Seven Seals - The Millenial Reign - The Seven Trumpets - The Seven Bowls of Wrath - The Great White Throne - The Destruction of Babylon - The New Heaven and New Earth -- Previously titled Revelation Illustrated and Made Plain, this revised and updated commentary includes numerous charts. With simple and accessible language, Revelation Unveiled will help you better understand this mysterious, final book of the Bible and its implications.

Have you ever wondered why we Christians do what we do for church every Sunday morning? Why do we “dress up” for church? Why does the pastor preach a sermon each week? Why do we have pews, steeples, and choirs? This ground-breaking book, now in affordable softcover, makes an unsettling proposal: most of what Christians do in present-day churches is rooted, not in the New Testament, but in pagan culture and rituals developed long after the death of the apostles. Coauthors Frank Viola and George Barna support their thesis with compelling historical evidence and extensive footnotes that document the origins of modern Christian church practices. In the process, the authors uncover the problems that emerge when the church functions more like a business organization than the living organism it was created to be. As you reconsider Christ’s revolutionary plan for his church—to be the head of a fully functioning body in which all believers play an active role—you’ll be challenged to decide whether you can ever do church the same way again.

From the bestselling author of the acclaimed Chaos and Genius comes a thoughtful and provocative exploration of the big ideas of the modern era: Information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa’s talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live.
