Now in hardcover, the twelfth installment of the Hugo-nominated, New York Times-bestselling Toby Daye urban fantasy series! Things are not okay. In the aftermath of Amandine's latest betrayal, October "Toby" Daye's fragile self-made family is on the verge of coming apart at the seams. Jazz can't sleep, Sylvester doesn't want to see her, and worst of all, Tybalt has withdrawn from her entirely, retreating into the Court of Cats as he tries to recover from his abduction. Toby is floundering, unable to help the people she loves most heal. She needs a distraction. She needs a quest. What she doesn't need is the abduction of her estranged human daughter, Gillian. What she doesn't need is to be accused of kidnapping her own child by her ex-boyfriend and his new wife, who seems to be harboring secrets of her own. There's no question of whether she'll take the case. The only question is whether she's emotionally prepared to survive it. Signs of Faerie's involvement are everywhere, and it's going to take all Toby's nerve and all her allies to get her through this web of old secrets, older hatreds, and new deceits. If she can't find Gillian before time runs out, her own child will pay the price. Two questions remain: Who in Faerie remembered Gillian existed? And what do they stand to gain? No matter how this ends, Toby's life will never be the same.

Focusing for the first time on why attorney general Robert F. Kennedy wasn't killed in 1963 instead of on why President John F. Kennedy was, Mark Shaw offers a stunning and provocative assassination theory that leads directly to the family patriarch, Joseph P. Kennedy. Mining fresh information and more than forty new interviews, Shaw weaves a spellbinding narrative involving Mafia don Carlos Marcello; Jack Ruby (Lee Harvey Oswald's killer); Ruby's attorney, Melvin Belli; and, ultimately, the Kennedy brothers and their father. Shaw addresses these tantalizing questions: Why, shortly after his brother's death, did a grief-stricken RFK tell a colleague, "I thought they would get one of us . . . I thought it would be me"? Why was Belli, an attorney with almost no defense experience (but proven ties to the Mafia), chosen as Jack Ruby's attorney? How does Belli's Mafia connection call into question his legal strategy, which ultimately led to the Ruby's first-degree murder conviction and death sentence? What was Joseph Kennedy's relationship to organized crime? And how was his insistence that JFK appoint RFK as attorney general tantamount to signing the president's death warrant? For fifty years, Shaw maintains, researchers investigating the president's murder in Dallas have been looking at the wrong motives and actors. The Poison Patriarch offers a shocking reassessment—one that is sure to alter the course of future assassination debates.

Population and Development addresses important issues at the heart of the problems of developing countries. How these countries address the common difficulties of population growth, including mortality and fertility decline, population redistribution including internal migration and urbanization, and also international migration, for both source countries and for destination countries. How and why has population change affected development – both positively and negatively? How and why has development affected population change – both growth and distribution? The book opens with an introduction, preceding the ten substantive chapters, covering some of the broader issues for population studies and development studies and the relationships between them. The first three chapters set out the main concepts and theoretical discussions on how population affects development and also how development affects population. Detailed chapters then cover each of the three main components of population change – fertility, mortality and finally migration. These are followed by chapters on the impacts of age structures, including the potential for a demographic dividend, and of the more qualitative aspects of human resource development through formal education and ICTs, with further chapters on population policies and population futures. The book incorporates illustrative text boxes and case studies on regions in Africa, the Middle East and Asia which elaborate the broader theoretical and conceptual substance of the ten major chapters. Each chapter has 'Discussion Questions' and 'Sources and Further Reading' sections, and there is an extensive integrated References section. The arguments of the book bring together a large but fairly loosely integrated literature from population studies, development studies and geography in a conceptually coordinated, empirically wide-ranging and challenging discussion. It is targeted at an audience in undergraduate courses in Geography and in Masters courses in Development Studies and Population Studies. The book's succinct but erudite structure means it can be used either as a course text book, or as a basic reference on a range of current issues and likely concerns at the interface between

Geography, Development Studies and Population Studies.
