In 1922, at the age of two, Petey's distraught parents commit him to the state's insane asylum, unaware that their son is actually suffering from severe cerebral palsy. Bound by his wheelchair and struggling to communicate with the people around him, Petey finds a way to remain kind and generous despite the horrific conditions in his new "home." Through the decades, he befriends several caretakers but is heartbroken when each eventually leaves him. Determined not to be hurt again, he vows to no longer let hope of lifelong friends and family torment him. That changes after he is moved into a nursing home and meets a young teen named Trevor Ladd; he sees something in the boy and decides to risk friendship one last time. Trevor, new to town and a bit of a loner, is at first weary of the old man in the wheelchair. But after hearing more of his story, Trevor learns that there is much more to Petey than meets the eye. Petey is a touching story of friendship, discovery, and the uplifting power of the human spirit.

The rapid growth of electronic commerce, along with changes in

information, computing, and communications, is having a profound effect on the United States economy. President Clinton recently directed the National Economic Council, in consultation with executive branch agencies, to analyze the economic implications of the Internet and electronic commerce domestically and internationally, and to consider new types of data collection and research that could be undertaken by public and private organizations. This book contains work presented at a conference held by executive branch agencies in May 1999 at the Department of Commerce. The goals of the conference were to assess current research on the digital economy, to engage the private sector in developing the research that informs investment and policy decisions, and to promote better understanding of the growth and socioeconomic implications of information technology and electronic commerce. Aspects of the digital economy addressed include macroeconomic assessment, organizational change, small business, access, market structure and competition, and employment and the workforce.

Excerpt from Scatalogic Rites of All Nations: A Dissertation Upon the Employment of Excrementitious Remedial Agents in Religion, Therapeutics, Divination, Witchcraft, Love-Philthers, in All Parts of the Globe The subject of Scatalogic or Stercoraceous Rites and Practices, however repellent it may be under some of its aspects, is none the less deserving of the profoundest consideration, - if for no other reason than that from the former universal dissemination of such aberrations of intellect, as well as of the religious impulses of the human race, and their present curtailment or restriction, the progress of humanity upward and onward may be measured. Philosophical and erudite thinkers of past ages have published treatises of greater or less magnitude upon this subject; among these authors, it may be sufficient, at this moment, to mention Sehurig, Etmuller, Flemming, Paullini, Beckherius, Rosinus Lentilius, and Levinus Lemnins. The historian Buckle regarded the subject as one well worthy of examination and study, as will appear from the text from the memoranda found in his scrap-books after his death. The

philosopher Boyle is credited with the paternity of a work which appeared over signature "B," bearing upon the same topic. The anonymous author or authors of the very learned pamphlet "Bibliotheca Scatologica," for the perusal of which I am indebted to the courtesy of Surgeon John S. Billings, collected a mass of most valuable bibliographical references. Quite recently there have appeared in the "Mitterlungen Gesselsch.," Wien, 1888, two pages of the work of Dr. M. Holler, "Volksmedizin und Aberglaube in Oberbayern Gegenwart und Vergangenheit," describing some of the excrementitious remedies still existing in the folk-medicine of Bavaria. for Human-Computer Interaction (EHCI 2001) held in Toronto, Canada in May 2001. The conference is organized by the International Federation of Information Processing (IFIP) Working Group 2.7 (13.4) for Interface User Engineering, Rick Kazman being the conference chair, Nicholas Graham and Philippe Palanque being the chairs of the program committee. The conference was co-located with ICSE 2001 and co-sponsored by ACM. The aim of the IFIP working group is to investigate the nature, concepts, and construction of user interfaces for software systems. The group's scope is: • to develop user interfaces based on knowledge of system and user behavior; • to develop frameworks for reasoning about interactive systems; and • to develop engineering models for user interfaces. Every three years, the working group holds a working conference. The Seventh one was held September 14-18 1998 in Heraklion, Greece. This year, we innovated by organizing a regular conference held over three days. Celebrating the sesquicentennial anniversary of the completion of the first transcontinental railroad in the

United States , After Promontory: One Hundred and Fifty Years of Transcontinental Railroading profiles the history and heritage of this historic event. Starting with the original Union Pacific–Central Pacific lines that met at Promontory Summit, Utah, in 1869, the book expands the narrative by considering all of the transcontinental routes in the United States and examining their impact on building this great nation. Exquisitely illustrated with full color photographs, After Promontory divides the western United States into three regions—central, southern, and northern—and offers a deep look at the transcontinental routes of each one. Renowned railroad historians Maury Klein, Keith Bryant, and Don Hofsommer offer their perspectives on these regions along with contributors H. Roger Grant and Rob Krebs.
