'A very practical book, which focuses on sound advice from an expert in D&T education.. Here you will find a wealth of ideas for putting into practice. What shines through is the depth of experience that Newton brings to the work.. This is an invaluable resource for any primary school and deserves to be widely read. I have no doubt that teachers will rate it highly' - Primary Science Review. 'As the focus in

education is on developing a more creative curriculum, this book is a must for both experienced teachers and students alike'-. Linda Johnston, Head Teacher, Sedgefield Hardwick Primary Sch. Written by experienced teachers and teacher trainers, this series offers practical teaching ideas within a clear, theoretical framework. Each title includes a photocopiable 'Task File' of training and reflection activities to reinforce theories and practical ideas presented.

Water for Life

Speaking is a dynamic,
interpersonal process and
one that strongly

influences how we are perceived by others in a range of formal and everyday contexts. Despite this, speaking is often researched and taught as if it is simply writing delivered in a different mode. In *Teaching and Researching Speaking*, Rebecca Hughes suggests that we have less understanding than we might of important meaning-making aspects of speech such as prosody, gaze, affect, and the ways speakers collaborate and negotiate with one another in interaction. This

thoroughly revised and updated second edition looks to the future of the field, offering: A new chapter on assessment, discussing 'high stakes' oral language testing contexts such as immigration New material considering access to spoken data via the worldwide web and new technologies that allow neurolinguistic insights formerly hidden from view Summaries and case studies to help the reader understand how to approach researching speaking and encourages practitioners

to question the models of speaking that they are using in their classrooms. Reviewing materials and assessment practices in the light of current knowledge about spoken language, and highlighting areas for new work and collaboration between researchers and practitioners, this book will be a valuable resource for anyone involved in language teaching.

" London is one of the great cities
of the world. It is the biggest city in
Britain and in Europe. In 1900, it
was the biggest city in the world. In
this book you will find a lot of

interesting information about London. You will read about its history from Roman times. You will learn about its famous people and the shops, museums and palaces of this exciting city." -- rear cover.

My name is Dovey Coe and I reckon it do 't matter if you like me or not. I ' m here to lay the record straight, to let you know them folks saying I done a terrible thing are liars. I aim to prove it, too. I hated Parnell Caraway as much as the next person, but I didn ' t kill him. Dovey Coe says what ' s on her mind, so it ' s no secret that she can ' t stand Parnell Caraway. Parnell may be the son of the richest man in town, but he ' s mean and snobby, and Dovey can ' t stand the fact that

he ' s courting her sister, Caroline, or the way he treats her brother, Amos, as if he were stupid just because he can ' t hear. So when Parnell turns up dead, and Dovey ' s in the room where his body is discovered, she soon finds herself on trial for murder. Can the outspoken Dovey sit still and trust a city slicker lawyer who ' s still wet behind the ears to get her out of the biggest mess of her life?

workshop proceedings of
the Second International**

Symposium, SETE 2017, held in conjunction with ICWL 2017, Cape Town, South Africa, in September 2017. The 52 full and 13 short papers were carefully reviewed and selected from 123 submissions. This symposium attempts to provide opportunities for the crossfertilization of knowledge and ideas from researchers in diverse fields that make up this interdisciplinary research area.

Designed for students preparing for the Cambridge exams, each book in this series offers

both students and teachers comprehensive support, including revision sections, mini dictionaries and appendices in the students' books, and model answers, photocopiable tests and marking schemes in the teacher's books. The books can be used either as free-standing supplementary material, or as a complete exam preparation series. They are designed to develop the essential language skills and sub-skills students need for each exam paper; they also offer specific training and guidance for each part of

the exams, with an abundance of practice based on realistic test tasks.

Educators know it's important to get students to engage in "higher-order thinking." But what does higher-order thinking actually look like? And how can K-12 classroom teachers assess it across the disciplines? Author, consultant, and former classroom teacher Susan M. Brookhart answers these questions and more in this straightforward, practical guide to assessment that can help teachers

determine if students are actually displaying the kind of complex thinking that current content standards emphasize. Brookhart begins by laying out principles for assessment in general and for assessment of higher-order thinking in particular. She then defines and describes aspects of higher-order thinking according to the categories established in leading taxonomies, giving specific guidance on how to assess students in the following areas: * Analysis, evaluation, and creation * Logic and reasoning *
