**The objective(s) of Article 102 TFEU, what exactly makes a practice abusive and the standard of harm under Article 102 TFEU have not yet been settled. This lack of clarity creates uncertainty for businesses and, coupled with the current state of economics in this area, raises an important question of legitimacy. Using law and economic approaches, this book inquires into the possible objectives of Article 102 TFEU and proposes a modern approach to interpreting 'abuse'. In doing so, this book establishes an overarching concept of 'abuse' that conforms**

**to the historical roots of the provision, to the text of the provision itself, and to modern economic thinking on unilateral conduct. This book therefore inquires into what Article 102 TFEU is about, what it can be about and what it should be about regarding both objectives and scope. The book demonstrates that the separation of exploitative abuse from exclusionary abuse is artificial and unsound. It examines the roots of Article 102 TFEU and the historical context of the adoption of the Treaty, the case law, policy and literature on exploitative abuses and, where relevant, on exclusionary abuses. The book investigates potential objectives, such as fairness and welfare, as well as the potential conflict between such objectives. Finally, it critically assesses the European Commission's modernisation of Article 102 TFEU, before proposing a reformed approach to 'abuse' which is centred on three necessary and sufficient conditions: exploitation, exclusion and a lack of an increase in efficiency.**

Frank Machovec argues that the assumption of perfect information has done untold economic damage. It has provided the rationale for active state intervention and has obscured the extent to which entrepreneurial activity depends upon the exploitation of asymmetric information.

To write everything about nothing, or to write nothing about everything: this is the problem. (Anonym, circa 1996-97) The first idea to write a book on Mathematical Economics, more or less ordered in a historical sequence, occurred to me in 1995, when I was asked, by Istituto delta Enciclopedia Italiana, to write the entry "Storia dell'economia 1 2 matematica" , for the collective work "Storia del XX Secolo". I thought that it would be interesting to elaborate on the text

presented to the editors, to turn it into a book aiming at giving a panorama of what, in my opinion, are the main 20th century contributions to mathematical economics. Of course, only a narrow set of the contributions made by economic theorists could be included, both for space limitations and necessity, because of the limited competence of any single author. For instance, I have paid very limited attention to what is now called Macroeconomics, and also to Game Theory, which actually has grown so much as to acquire scientific independence as a living branch of applied mathematics. For the same reason, I have also left completely untouched such fields as Mathematical Finance, Public Economics, Theory of Taxation, etc. I have always based my presentation on published material only, assuming that what is contained in working papers still waits to be confirmed, possibly in the first years of the 21st century.

Article 102 TFEU prohibits the abuse of a dominant position as incompatible with the internal market. Its application in practice has been controversial with goals as diverse as the preservation of an undistorted competitive process, the protection of economic freedom, the maximisation of consumer welfare, social welfare, or economic efficiency all cited as possible or desirable objectives. These conflicting aims have raised complex questions as to how abuses can be assessed and how a dominant position should be defined. This book addresses the conceptual problems underlying the tests to be applied under Article 102 in light of the objectives of EU competition law. Adopting an interdisciplinary approach, the book covers all the main issues relating to Article 102, including its objectives, its relationship with other principles and provisions of EU law, the criteria for the assessment of individual abusive practices, and the definition of dominance. It provides an in-depth doctrinal and normative commentary of the case law with the aim of establishing an intellectually robust and practically workable analytical framework for abuse of dominance.

***Foundational Principles of Contract Law not only sets out the principles and rules of contract law, it places more emphasis on what the principles and rules of contract law should be, based on policy, morality, and experience. A major premise of the book is that the best way to grasp contract law is to understand it from a critical perspective as an organic, dynamic subject. When contract law is approached in this way it is much easier to grasp and learn than when it is presented simply as a static collection of principles and rules. Professor Eisenberg covers almost all areas of contract law, including the enforceability of promises, remedies for breach of contract, problems of assent, form contracts, the effect of mistake and changed circumstances, interpretation, and problems of performance. Although the emphasis of the book is on the principles and rules of contract law, it also covers important theories in contract law, such as the theory of efficient breach, the theory of overreliance, the normative theory of contracts, formalism, and theories of contract interpretation. The story written in the Ramayana seems to be very simple and straightforward, but it hides many secrets in its bosom. For the layman it is a story of good versus evil with evil getting a beating and good, being victorious, getting a rousing welcome. But there are many details that, if read carefully, reveal many secrets that have been hidden from the general society. The present author has tried to reveal those secrets but because of lack of space has limited himself to the revelation of just a few of those secrets. After a proper study, it seems that Ravana was not as bad as has been made out to be. It seems he had many grand ideas, but because the war was lost, the ideas also died. One of them, not mentioned in the book because of the lack of full details is that he had a medical system similar to the Red Cross that we have today. Similarly, there are many other details of Ravana that have been described. It turns out that Ravana was not that bad a person nor was it that Rama that did not have any fault in him. Ramayana emphasises that the victor is always a good and revered person and the loser is cursed by society.***
